**Handbook of Psychosocial Interventions with Older Adults** Sherry M. Cummings, Nancy P. Kropf, 2013-09-13 In the past decade evidence based practice EBP has emerged as one of the most important movements to improve the effectiveness of clinical care As the number of older adults continues to grow it is essential that practitioners have knowledge of effective strategies to improve both the medical and the psychosocial aspects of older persons lives The purpose of this work is to present systematic reviews of research based psychosocial interventions for older adults and their caregivers The interventions presented focus on a variety of critical issues facing older adults today including medical illnesses cardiac disease diabetes arthritis pain cancer and HIV AIDS mental health cognitive disorders depression anxiety dementia substance abuse and social functioning developmental disabilities end of life dementia caregivers grandparent caregivers For each of these areas the prevalence of the problem the demographics of those affected and the nature and consequences of the problem are discussed The empirical literature is then reviewed A treatment summary highlights the type and nature of research supporting the interventions reviewed and is followed by a conclusion section that summarizes the status of intervention research for the specified issue A Treatment Resource Appendix for each area is included These appendices highlight manuals books articles and web resources that detail the treatment approaches and methodologies discussed This book was previously published as a special issue of the Journal of Gerontological Social Work

**Disability Across the Developmental Life Span** Julie Smart, 2011-11-14 This is the only text to provide comprehensive coverage of human growth and development a requirement mandated by the Council of Rehabilitation Education CORE for a master s degree in rehabilitation counseling and for Licensed Professional Counselor certification Written by an eminent leader in the field of disability studies this book reflects a significant change in perceptions of individuals with disabilities from being defined foremost by their disability to being viewed as normal individuals with a disability It provides an understanding of traditional human growth and development that will enhance the practice of disability counseling by enabling an understanding of a client s childhood and prior life experiences The book begins with a focus on developmental theories and tasks followed by a discussion of cultural and ethical considerations in human development It considers the major theories of human development as they relate to people with and without disabilities and

career theories with a focus on the concept of choice The book addresses specific developmental stages including a description of developmental tasks risks disability applications specific disabilities common to a particular stage and cultural and ethical issues all supported by case examples Key Features Fulfills the required CORE mandated course on human growth and development and the disability experience Addresses disability across the lifespan in relation to developmental stages Authored by highly a respected expert in disability studies      Health and Mortality Among Elderly Populations Graziella Caselli, Alan D. Lopez, 1996 In both developed and developing countries the elderly have enjoyed significant declines in mortality and increased survival At the same time these trends have also given rise to many uncertainties and demands on resources which are often not given their due attention Future mortality declines particularly among the elderly are often overshadowed by fears of their increasing share of the total population and the demands that this places on society to resolve the problems stemming from longer survival problems for example which are not just a question of guaranteeing longer life but also of ensuring an acceptable health status In recent years there has been a substantial literature on many facets of the daily lives of the elderly This volume is a further contribution to the literature pinpointing the most recent trends in the survival of the elderly and in their physical and mental health It also describes possible scenarios for the early decades of the twenty first century To delineate current knowledge with regard to the health and survival of the elderly is a first step towards preparing projections and improving the efficacy of health policies for the elderly The first section of this volume is dedicated to a discussion about the age at which people become elderly and to the application of evolutionary theory to demographic models of human mortality The second section looks in more detail at different aspects of morbidity and mortality trends and their underlying causes The third section deals with mortality projections ranging from the hypotheses to problems of methodology The fourth section covers social and health strategies to improve the survival and quality of life of the elderly in view of the fact that more and more people may expect to live longer and longer and perhaps in increasingly better health      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1992      Disability Across the Developmental Lifespan, Second Edition Julie Smart, 2019-12-01 This is the only text to examine the experience of disability in relation to theories of human growth and development It provides a foundational and comprehensive examination of disability that encompasses the intellectual psychiatric physical and social arenas The second edition is updated to underscore its versatility as an introductory text about the developmental tasks of people with disabilities for all the helping professions Reorganized to illuminate the book's interdisciplinary focus it includes new demographics new case studies and first person accounts discussions on cultural aspects of disabilities family concerns and more The text delivers practice guidelines for each of the conventional life stages and describes the developmental tasks of individuals with disabilities IWDs It emphasizes the positive trend in the perception of IWDs as normal and underscores the fact that IWDs have the same motivations emotions and goals as those without disabilities Learning activities suggestions for writing

**Social Work** Matthias J. Naleppa, William James Reid, 2003 This eminently practical book applies the task centered model to  
gerontological practice across various settings community based hospital based home healthcare etc The book features in  
depth coverage of specific client problems such as physical or mental health caregiving home and personal safety senior  
living and long term care arrangements A series of task planners offer a menu of possible actions that can resolve or alleviate  
a designated problem

**Handbook of Social Work in Health and Aging** Barbara Berkman, 2006-02-09 The Handbook of  
Social Work in Health and Aging is the first reference to combine the fields of health care aging and social work in a single  
authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with  
issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on  
practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care  
and the resources available to best serve older adults and their families The volume's 102 original chapters and 13 overviews  
written by the most experienced and prominent gerontological health care scholars in the United States and across the world  
provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for  
effectively assessing and treating older adults and their families new models for intervention in both community based  
practice and institutional care and knowledge of significant policy and research issues in health and aging A truly  
monumental resource this handbook represents the best research on health and aging available to social workers today

Family Caregiving Across the Lifespan Eva Kahana, David E. Biegel, May Wykle, 1994-03-16 Published in cooperation with  
the Center for Practice Innovations Mandel School of Applied Social Sciences Case Western Reserve University Increased life  
expectancy the deinstitutionalization of persons with mental illness the rise of home health care and advances in medical  
technology have resulted in greater numbers of dependent people requiring care by family members The frail elderly the  
chronically mentally ill and the physically disabled are examples of such groups who now receive their daily care in the  
community How do families accept the burden of this care What are the physical and emotional demands of such caregiving  
Are the families prepared to assume this role Family Caregiving Across the Lifespan considers the broad spectrum of chronic

illnesses that necessitate family caregiving throughout the lifespan and expands the caregiving paradigm by including in its focus both members of the caregiving dyad and significant non family caregivers It also explores the social context in which care is provided an entire section of the volume is devoted to discussions of the interface between informal and formal caregivers and society at large Among the other subjects this volume addresses are the negative consequences of family caregiving the value of providing support to caregivers and caregivers of persons living with AIDS Family Caregiving Across the Lifespan is important reading for those in social work nursing family medicine and clinical psychology Family Caregiving Across the Lifespan represents a significant milestone in the continuing maturation of this vital area of long term care The title is an understatement of the authors accomplishments Rather than offering narrow boxes or labels the book invites the reader to join in a broadened perspective on caregiving so that it can more fully reflect the richness of the lives of all involved For those who encounter Family Caregiving Across the Lifespan as part of their continuing study of caregiving the book provides the integrating milestone of caregiving literature Journal of Case Management This volume is a useful compendium of articles on family caregiving The fourteen chapters in this volume address many important topics in family caregiving One of the book s major contributions is its clarification that family caregiving to frail or chronically ill people has no age limitation although there are unique issues at different points in the development of individuals and families The book has exceptional merit It expands our understanding of family caregiving provides important ideas for future research offers research findings that enhance our understanding of family care and presents a very useful review of the literature This book would be a beneficial addition to the library of all researchers in the area of caregiving They will discover worthwhile conceptualizations and gain new insights that can inform their research Practitioners should also benefit from this collection The chapters addressing interaction between formal and informal caregivers should give practitioners a deeper understanding of how to be more effective in dealing with informal caregivers and care recipients Ageing Society One paper in this volume deserves particular notice because it attempts to do what many of the authors feel is most critical in caregiving research but also most difficult namely to analyze the effectiveness of caregiving the effect of provision of care on elder health outcomes This is an important and original conceptualization of the problem Steven M Albert Contemporary Gerontology This book is both unique and valuable because it embraces Brody s observation that family caregiving is not limited to a specific segment of the life span Moreover the book is not limited to filial caregiving but entertains an impressive variety of contexts of family caregiving This book will be a valuable text in graduate level courses Journal of Marriage and the Family

**Trauma and Transformation** Richard G. Tedeschi, Lawrence G. Calhoun, 1995-06-20 That personal growth often occurs in people who have experienced traumatic events is an acknowledged but under researched phenomenon This book fills the gap the authors use a cognitive framework to explore this finding focusing upon changes in belief systems reported by trauma survivors Tedeschi and Calhoun weave together literature from fields as diverse as philosophy religion and

psychology and incorporate major research findings into the effect of trauma With case examples from the authors research and clinical work information is presented in a manner accessible to clinicians In addition one chapter is written specifically for trauma survivors Current Catalog National Library of Medicine (U.S.),1992 *Aging* Harry R. Moody,2006-01-13

Welcome to the world s most unique and dynamic textbook on aging Widely praised and adopted in previous editions the Fifth Edition of *Aging* once again presents key issues in an engaging and accessible fashion Organized unlike any other traditional textbook author Harry R Moody presents basic concepts followed by controversies supported by carefully chosen adapted readings The result is the most captivating introduction to gerontology available today *Disability Studies Quarterly* ,1990 Social Cognition and Individual Change Aaron M. Brower,Paula Nurius,1993-10-19 Use the following for Social Work catalogs Social Cognition and Individual Change provides a much needed link among several perspectives in social work practice such as the ecological or generalist model and the myriad of atheoretical techniques that social work practitioners must choose from This new social work practice book makes more concrete and practical the basic premises of person environment interaction and starting where the client is It details the processes through which people perceive and interpret the social world how problems arise and how understanding these processes can significantly sharpen our assessments intervention planning goal selection and evaluation It draws upon the best up to date work in cognitive and emotional functioning self concept formation and change and coping with stress This book goes beyond introductory practice texts in describing how social work theory can guide practice Special topics include clinical reasoning the structure of memory and social cognitive explanations for psychodynamic phenomenon Social Cognition and Individual Change should be included in courses for advanced practice and social work practice theory Use this ad copy for psych In recent years there have been some major developments in the area of person environment interaction specifically the study of social cognition Although knowledge of this literature is critical for the helping professional social cognition in clients has been among the more difficult to adequately assess and use for intervention Until now Clear and succinct Social Cognition and Individual Change offers a comprehensive introduction to a cognitive ecological approach to counseling and clinical practice To provide a solid conceptual grounding for the reader the theoretical underpinnings of the cognitive ecological model are described in detail including its key components strengths and limitations The model is then applied to relevant stages of practice such as assessment goal setting intervention planning and evaluation In addition the authors provide numerous examples to illustrate how practitioners can use the model to enhance their work Among the other topics covered are social perception and the practitioner and feedback and follow through Social Cognition and Individual Change is perfectly suitable for courses on human behavior in the social environment and courses on practice methods Human service practitioners who would like an updated resource to fill a gap in their social psychological training will also appreciate this volume The structure of this book allows one to use it for training students as well as a resource for professional practitioners The material presented in each

chapter is reinforced by the material in the succeeding chapter The authors systematically develop the theoretical underpinnings and practice behaviors requisite for empowering clients and workers Families in Society Use this for social work catalog In this era of the cognitive revolution books that address the use of cognitive techniques to facilitate personal change are abundant None however match the conceptual depth and clarity offered by Brower and Nurius By using clear conceptual descriptions vivid and relevant examples step by step procedural guidelines chapter introductions and capsule summaries Brower and Nurius deftly follow their own prescriptions about how to capture attention prime associations and facilitate recall from the foreword by Sharon B Berlin The University of Chicago Use this quote for Psych crowd Brower and Nurius have put together a valuable and practical blend of theory and research from areas of social cognition self psychology and counseling practice I recommend it highly Michael J Mahoney University of North Texas *A World Growing Old* Daniel Callahan,1996-08-01 For much of the developed world health care for a surging elderly population looms as one of the most daunting problems of the coming decade In this book contributors from diverse disciplinary backgrounds and countries discuss resource allocation for the elderly and debate plans for the years ahead Essays focus on five general issues the meaning of old age the goals of medicine and health care for the elderly the balance between the needs of the young and old the pressures of other social priorities and the role of families especially the burden on women in long term care In consideration of the difficult moral and practical issues involved the editors conclude the volume with a special report containing policy recommendations from representatives of eight countries the United States Belgium the Czech Republic Germany Hungary the Netherlands Sweden and the United Kingdom This important volume will be of interest to policymakers and a broad spectrum of health care professionals as well as to anyone interested in the fate of the elderly or in coming health care challenges *Integrating Conventional & Alternative Therapies* Charlotte Eliopoulos,1999 Your patients hear about alternative therapies for chronic conditions from a wide range of sources some reputable and some not Here s your opportunity to become well informed on a variety of therapies helping your patients take charge of their own care and outcomes and enhancing their overall quality of life **Helping Couples and Families Navigate Illness and Disability** John S. Rolland,2018-04-20 Couples and families face daunting challenges as they cope with serious illness and disability This book gives clinicians a roadmap for helping affected individuals and their loved ones live well with a wide range of child adult and later life conditions John S Rolland describes ways to intervene with emerging challenges over the course of long term or life threatening disorders Using vivid case examples he illustrates how clinicians can help families harness their strengths for positive adaptation and relational growth Rolland s integrated systemic approach is useful for preventive screening consultations brief counseling more intensive therapy and multifamily groups across health care settings and disciplines This book significantly advances the clinical utility of Rolland s earlier landmark volume *Families Illness and Disability* Choice ,1995 **The Oxford Handbook of Social Work in Health and Aging** Daniel B. Kaplan,Barbara Berkman,2016 This

Second Edition of the Handbook addresses the evolving interdisciplinary health care context and the broader social work practice environment as well as advances in the knowledge base which guides social work service delivery in health and aging. This includes recent enhancements in the theories of gerontology, innovations in clinical interventions and major developments in the social policies that structure and finance health care and senior services. In addition, the policy reforms of the 2010 Patient Protection and Affordable Care Act set in motion a host of changes in the United States healthcare system with potentially profound implications for the programs and services which provide care to older adults and their families. In this volume, the most experienced and prominent gerontological health care scholars address a variety of populations that social workers serve and the arenas in which they practice, followed by detailed recommendations of best practices for an array of physical and mental health conditions. The volume's unprecedented attention to diversity, health care trends and implications for practice, research, policy, make the publication a major event in the field of gerontological social work. This is a Must Read for all social work, social work educators, practitioners and students interested in older adults and their families.
