Nussbaum, 2001-03-01 This collection highlights the current efforts by scholars and researchers to understand the aging process as it relates to the health of older adults With contributions from international scholars in communication psychology public health medicine nursing and other areas this volume emphasizes communication as a critical research education policy and practice issue for the design provision and evaluation of health and social services for older adults Organized into sections addressing communication developments in the healthcare arena issues in provider patient communication and the relationships between family communication and health The chapters cover

critical topics related to successful aging such as Alzheimer's disease, managed care and older adults' communication issues of severe dementia and healthcare decision making within families. The editors have designed this volume to be accessible to a broad audience including scholars and students of aging and communication, healthcare practitioners with older clients and aging individuals and their families who are pursuing strategies for successful aging. The chapters represent the highest levels of current scholarship on communication, aging and health, providing a strong foundation for future research. Each contribution also addresses the applied implications of this research, offering practical guidance to readers dealing with these issues in their own lives. As a whole, *Aging, Communication and Health* represents a major advance toward understanding the importance and application of communication for successful aging.

EBOOK: Older People And Community Care Beverly Hughes, 1995-09-16 *Older People and Community Care* sets social and health care practice with older people firmly in the context of the new community care arrangements and the consequent organizational trends towards a market culture. However, it also questions the relative lack of attention given by professionals to issues of structural inequality in old age compared, for example, to race and gender. Thus the book tackles a double agenda: How can community care practice be suffused with anti-ageist values and principles? Addressing this question, the book sets out the foundation knowledge and values which must underpin the development of anti-discriminatory community care practice and examines the implications for practitioners in terms of the essential skills and inherent dilemmas which arise. *Older People and Community Care* is essential reading for all those working with and managing services to older people and who aspire to make empowerment for older people a reality.

Drugs And The Older Population Peter Crome, Gary Ford, 2000-07-12 This book is designed for all those with a scientific interest in drug treatment and the older population. The authors have all been chosen for their expertise in the field and have been drawn from both sides of the Atlantic and South Africa. The contents fall into two parts: general principles of drug use as they apply to the elderly and specific chapters dealing with common clinical areas. The editors aim to provide a concise, up-to-date, evidence-based resource book.

Nursing Older Adults Jan Reed, Charlotte Clarke, Ann MacFarlane, 2011-06-16 This timely textbook aims to provide adult nurses with the principles and practice insights needed to deliver exceptional care in partnership with older adults. Written by a world-renowned author team and includes contributions by older people, ensuring their needs and concerns about nursing care are reflected across the book. This important book considers the social perspectives, wider issues and themes such as ageism, policy, services and demographics. Evaluates daily activities and needs including mobility, nutrition, communication, sexuality and leisure. Features scenarios based on real situations and narratives from older people. Examines the use of affirmative language to promote wellbeing and dignity when nursing older adults. *Nursing Older Adults* will help nurses to better appreciate the experiences and strengths of older people. The book emphasises the importance of undertaking a collaborative approach when shaping the care that older people receive in a variety of healthcare settings.
