### **WHY PHYSICAL EDUCATION?**

In modern physical education parlance, it is education through “movement”, “Wunderlich (1967) says of movement: It provides sensory data. It broadens the perceptive horizon. It stimulates function and structure of all bodily organs. It is the means by which an individual learns about himself in relation to his ambient environment. What education through movement more particularly entails in addition is the taking of that culture-based family of activities and processes—games, dance, gymnastics, athletic sports and outdoor pursuits — as a means through which the teacher can help effect desirable outcomes, regardless of whether or not those activities have intrinsic worth of their own.

Physical education performs three functions: biologic integrative, and social. Biologic function refers to the enhancement of the individual's growth and development through body movement. Integrative function
