but I spent my career implementing and evaluating small health promotion projects in the community This divergence between training and practice has informed me on why promoting health is possible but difficult From a sociological perspective it is clear to me that American society is not particularly health promoting For example computers are increasingly promoting sedentary behavior both at work and at play A fast paced society encourages us to seek convenient food and drink choices and ubiquitous advertising to the tune of tens of billions of dollars per year promotes questionable foods and drinks over good nutrition And the considerable stress engendered by a dynamic society can lead to smoking excessive alcohol consumption or engaging in other risky behaviors

Health Promotion and Aging Steven M.
