Facts about Heart Disease and Women, 1997 *Heart Disease and High Blood Pressure* Kenneth Charles Hutchin, 1964

Hypertension and Hypertensive Heart Disease, An Issue of Cardiology Clinics George A. Mensah, 2010-11-28

Hypertensive heart disease the number one cause of death associated with hypertension refers to coronary artery disease heart failure and enlargement of the heart that occurs because of high blood pressure This issue summarizes the current state of the art in diagnosing treating and preventing this potentially fatal disease so that cardiologists can offer the best current treatment to their patients **Hypertension and Hypertensive Heart Disease** George A. Mensah, 2010

Hypertensive heart disease the number one cause of death associated with hypertension refers to coronary artery disease heart failure and enlargement of the heart that occur because of high blood pressure This issue summarizes the current state of the art in diagnosing treating and preventing this potentially fatal disease so that cardiologists can offer the best current treatment to their patients The High Blood Pressure Solution Richard D. Moore, 2001-05-01 Proves that the majority of cases of stroke heart attack and hypertension can easily be prevented by maintaining the proper ratio of potassium to sodium in the diet Updated with scientific evidence from a recent Finnish study showing a 60 percent decline in deaths attributed to strokes and heart attacks Provides a comprehensive program for balancing body chemistry at the cellular level High blood pressure is entirely preventable without reliance on synthetic drugs Dr Moore s approach is simple by maintaining the proper ratio of potassium to sodium in the diet blood pressure can be regulated at the cellular level preventing the development of hypertension and the high incidence of strokes and heart attacks associated with it Dr Moore updates this edition with a new preface reporting on the latest scientific research in support of his program The most striking results come from Finland where for several decades sodium chloride has been replaced nationwide with a commercial sodium potassium mixture resulting in a 60 percent decline nationwide in deaths attributed to strokes and heart attacks Extrapolated to America the Finnish statistics would mean 360 000 strokes prevented and 96 000 lives saved every year Dr Moore makes it clear that high blood pressure is only one symptom of an entire systemic imbalance He outlines a safe effective program that focuses on nutrition weight loss and exercise to bring the entire body chemistry into balance For those currently taking blood pressure medications he includes a chapter on working with your physician to ensure that any reduction in hypertension drugs can be effected gradually and safely Hypertensive Cardiovascular Disease: Pathophysiology and Treatment A. Amery, R.

Fagard, P. Lijnen, J. Staessen, 2012-12-06 Hypertension is a major world wide health problem With high blood pressure there is a greater risk of stroke heart attack heart failure kidney disease and renal failure Far too few people realize what the risks are and what can be done to prevent these risks even in the countries where pro grams in hypertension research are active and the full significance of hyper tension is best understood Some studies of the known hypertensive popu lation indicate that one half or less are receiving adequate treatment and of those on therapy only half have their high blood pressure

satisfactorily controlled These realizations emphasize the need to inform all segments of society throughout the world on the importance of detection and control of high blood pressure The great incidence of hypertension makes it of para mount importance that all practicing physicians have available the latest information on diagnosis and treatment of hypertensive cardiovascular dis ease This treatise on hypertension arrives at a time when there is an increasing recognition the world over of the importance of detecting and treating high blood pressure The book has been edited by Dr A Amery and his asso ciates in the University of Leuven Professor Amery is one of the leaders in the field of hypertension and serves on the Council of the International Society of Hypertension
