Bureau of Agricultural Economics,1954 **Advances in drought analytical tools for better understanding of current and future climate change** ,2023-03-14 **Natural Hazards and Disasters** Bimal Kanti Paul,2020-12-07 This two volume encyclopedia provides the science behind such heart pumping geophysical hazards as volcanic eruptions earthquakes cyclones and floods as well as authoritative entries on notable natural disasters around the world and the agencies that help those they impact Natural Hazards and Disasters explores the sometimes harsh effects of

nature on human life The set discusses the physical science behind specific types of hazards and disasters such as blizzards and tsunamis their impact on our lives how damage is mitigated or prevented recovery and reconstruction and the current research and technology used for managing or even eliminating the hazards Written by experts in the field the set also explores a variety of extreme events from around the world including the 2010 2011 Christchurch Earthquakes New Zealand the 2017 2018 Thomas Fire United States and the 2018 Kerala Floods India Also covered are the world s major international and nonprofit aid agencies like the Salvation Army and Oxfam that assist disaster victims Water stress and human

migration: a global, georeferenced review of empirical research Food and Agriculture Organization of the United Nations,2018-06-19 This report assesses and maps 184 peer reviewed empirical research articles selected for their focus on linkages between water stress and human migration First and most importantly this literature asserts that migration is universal Migration is an extremely common social process and is normal in almost every society on earth Moreover migration is not a pathological response to environmental change Environment influenced migration is rarely if ever a resource threat to the regions to which people move The literature does however observe that negative social outcomes can result from narratives that stigmatize migrants and or cast migrants as a security threat especially when these narratives are used to justify increased surveillance and monitoring of these people **Risk Assessment and Resilience of Extreme**

Weather-Induced Disasters Lingling Shen,Wentao Yang,Yanfang Sang,Qi Zhang,Kaushal Gnyawali,Xiya Zhang,2025-06-09 Under the impacts of climate change the frequency and intensity of extreme weather events are increasing posing significant challenges to global socio economic development Extreme weather characterized by unexpected unusual severe or unseasonal rainstorms droughts extreme temperatures and wildfires often leads to secondary hazards such as landslides debris flows mountain torrents urban waterlogging and agro meteorological hazards These cascading disaster chains exhibit unique spatial differences and require comprehensive risk assessment and resilience management Recent advancements in meteorological observation networks radar and satellite detection accuracy and new meteorological data products have improved the monitoring and forecasting of extreme weather events However the regional dependencies and unpredictability of these events necessitate further research to better understand and mitigate the associated risks There is a pressing need to link extreme weather forecasts with the prediction of secondary disasters to enhance preparedness and response strategies This research topic aims to explore the risk assessment and resilience management of extreme weather induced disasters The primary objectives include understanding the mechanisms of extreme weather events improving forecasting techniques and developing effective strategies to mitigate the impacts of cascading secondary hazards Specific questions to be addressed include How can we enhance the accuracy of extreme weather forecasts What are the best practices for managing urban flooding and waterlogging How can we improve the resilience of communities to agro meteorological and hydro meteorological disasters By addressing these questions the research aims to contribute to more effective disaster risk

reduction and resilience building efforts To gather further insights into the risk assessment and resilience of extreme weather induced disasters we welcome articles addressing but not limited to the following themes Forecast of extreme weather events and cascading hazards Urban flooding and waterlogging Risk assessment and management of agro meteorological disasters Monitoring warning and risk assessment of hydro meteorological and geological disasters landslides debris flow mountain torrents etc Analysis and review of major meteorological disaster chain events Research on developing disaster resilience

Banking Institutions and Natural Disasters Andi Duqi, 2023-07-21 This book looks more closely at how natural disasters impact bank activity and how banks can support economic recovery after a natural disaster The importance of banks in this context is underscored by increasing regulatory attention on their role in fostering a sustainable future but also on the risks that climate change poses to bank stability Humanity has tried to cope with the short and long term economic consequences of natural disasters for centuries However the severity of these events is constantly increasing in magnitude due to the alteration of the earth's climate and the environment They pose a serious threat to the lives of millions of people especially in less developed countries At the same time the international community has acknowledged that weather hazards impact and countries resilience to them are affected by various socio economic factors such as the well functioning of financial institutions especially commercial banks Banks will inevitably adapt their strategies to address concerns arising from climate change In doing this the book discusses partnerships with international cooperation institutions other financial intermediaries and local governments so that the green transition ensures an inclusive growth for all especially the most vulnerable parts of our societies This book is of interest to researchers academics and students of sustainable finance and climate finance

Managing the Health Risks of Climate Change Kurebwa, Jeffrey, Makwerere, David, 2024-11-29 Climate change presents a fundamental threat to human health It has affected the physical environment and all aspects of both natural and human systems It is therefore a threat multiplier undermining and potentially reversing health progress made during the last three decades As climatic conditions change more frequent and intensifying weather and climate events are observed such as storms extreme heat floods droughts and wildfires These weather and climate hazards affect health both directly and indirectly increasing the risk of deaths non communicable diseases the emergence and spread of infectious diseases and health emergencies Managing these health risks requires coordinated global efforts to strengthen public health systems and build resilience in vulnerable communities Managing the Health Risks of Climate Change provides new evidence on the health risks posed by climate change offering a comprehensive analysis of how environmental changes are impacting human health It further explores emerging strategies for managing these risks highlighting innovative approaches to adaptation mitigation and the strengthening of health systems to better prepare for and respond to climate related health challenges Covering topics such as air conditioning persons with disabilities and women's health this book is an excellent resource for academicians researchers policymakers health practitioners and more
