seventeenth century Amsterdam the role played by its inns and taverns specifically the doolhoven Doolhoven were a type of labyrinth unique to early modern Amsterdam Offering guest lodgings these licensed public houses also housed remarkable displays of artwork in their gardens and galleries The main attractions were inventive displays of moving mechanical figures automata and a famed set of waxwork portraits of the rulers of Protestant Europe Publicized as the most innovative artworks on display in Amsterdam the doolhoven exhibits presented the mercantile city as a global center of artistic and technological advancement This evocative tour through the doolhoven pub gardens where drinking entertainment and the acquisition of knowledge mingled in encounters with lively displays of animated artifacts shows that the exhibits had a forceful and transformative impact on visitors one that moved them toward Protestant reform Deeply researched and decidedly original The Moving Statues of Seventeenth Century Amsterdam uncovers a wealth of information about these nearly forgotten public pleasure parks situating them within popular culture religious controversies global trade relations and intellectual debates of the seventeenth century It will appeal in particular to scholars in art history and early modern studies Experimental Self-Portraits in Early French Photography Jillian Lerner,2020-11-16 This book explores a range of experimental self portraits made in France between 1840 and 1870 including remarkable images by Hippolyte Bayard Nadar Duchenne de Boulogne and Countess de Castiglione Adapting photography for different social purposes each of these pioneers showcased their own body as a living artifact and iconic attraction Jillian Lerner considers performative portraits that exhibit uncanny transformations of identity and embodiment She highlights the tactical importance of photographic demonstrations promotions conversations and the mongrel forms of montage painted photographs and captioned specimens The author shows how photographic practices are mobilized in diverse cultural contexts and enmeshed with the histories of art science publicity urban spectacle and private life in nineteenth century France Tracing calculated and creative approaches to a new medium this research also contributes to an archaeology of the present It furnishes a prehistory of the selfie and offers historical perspectives on the forces that reshape human perception and social experience This interdisciplinary study will appeal to readers interested in the history of photography art visual culture and media studies **Futures of the Past** Ivy Roberts,2020-07-09 Science fiction boasts a deceptively long history extending as far back as the 19th century This anthology pairs original essays that introduce short stories of vintage science fiction Critical introductions written by international experts contextualize these stories from the 19th and early 20th centuries Inclusions range from legendary authors like Mary Shelley and Edgar Allan Poe to lesser known figures like E P Mitchell George Parsons Lathrop and Franklin Ruth **Medical Muses** Asti Hustvedt,2012-01-01 In 1862 the Salpêtrière Hospital in Paris became the epicenter of the study of hysteria the mysterious illness then thought to affect half of all women There prominent neurologist Jean Martin Charcot's contentious methods caused furore within the church and divided the medical community Treatments included hypnosis piercing and the evocation of demons and despite the controversy they caused the experiments became a fascinating and fashionable public

spectacle Medical Muses tells the stories of the women institutionalised in the Salpêtrière. Theirs is a tale of science and ideology, medicine and the occult of hypnotism, sadism, love and theatre. Combining hospital records, municipal archives, memoirs and letters, Medical Muses sheds new light on a crucial moment in psychiatric history. Descartes' Baby Paul Bloom, 2009-04-27 All humans see the world in two fundamentally different ways: even babies have a rich understanding of both the physical and social worlds. They expect objects to obey principles of physics, and they're startled when things disappear or defy gravity. Yet they can also read emotions and respond with anger, sympathy and joy. In *Descartes' Baby*, Paul Bloom draws on a wealth of scientific discoveries to show how these two ways of knowing give rise to such uniquely human traits as humor, disgust, religion, art and morality. How our dualist perspective developed throughout our lives profoundly influences our thoughts, feelings and actions: is the subject of this richly rewarding book. **I, Yantra** Signe Cohen, 2024-02-01 What does it mean to be human? I Yantra examines ancient Indian narratives about robots and mechanically constructed beings to explore how their Hindu, Jain and Buddhist authors approached this question. Making translations of many of these texts available in English for the first time, author Signe Cohen argues that they shed considerable light on South Asian religious notions of humanity, self and agency. She also documents connections between ancient and modern responses to the ethical problems of what precisely constitutes a sentient being and what rights such a being should have. Situated at the intersection of humanities and bioethics, this cross-disciplinary study will be of interest to scholars of South Asian languages and literature as well as specialists in religion and technology. *Hidden in Plain Sight* Colin Williamson, 2015-10-22 What does it mean to describe cinematic effects as movie magic, to compare filmmakers to magicians, or to say that the cinema is all a trick? The heyday of stage illusionism was over a century ago, so why do such performances still serve as a key reference point for understanding filmmaking, especially now that so much of the cinema rests on the use of computers? To answer these questions, Colin Williamson situates film within a long tradition of magical practices that combine art and science, involve deception and discovery, and evoke two forms of wonder: both awe at the illusion displayed and curiosity about how it was performed. He thus considers how even as they mystify audiences, cinematic illusions also inspire them to learn more about the technologies and techniques behind moving images. Tracing the overlaps between the worlds of magic and filmmaking, *Hidden in Plain Sight* examines how professional illusionists and their tricks have been represented onscreen while also considering stage magicians who have stepped behind the camera. From Georges Méliès to Ricky Jay, Williamson offers an insightful, wide-ranging investigation of how the cinema has functioned as a device of wonder for more than a century, while also exploring how several key filmmakers from Orson Welles to Christopher Nolan and Martin Scorsese employ the rhetoric of magic. Examining pre-cinematic visual culture, animation, nonfiction film and the digital trickery of today's CGI spectacles, *Hidden in Plain Sight* provides an eye-opening look at the powerful ways that magic has shaped our modes of perception and our experiences of the cinema. **Minds, Bodies, Machines, 1770-1930** D. Coleman, H. Fraser, 2011-04-11 It is during the

nineteenth century the age of machinery that we begin to witness a sustained exploration of the literal and discursive entanglements of minds bodies machines This book explores the impact of technology upon conceptions of language consciousness human cognition and the boundaries between materialist and esoteric sciences **Power and Progress** Daron Acemoglu, Simon Johnson, 2023-05-16 Awarded the 2024 Nobel Prize in Economics Daron Acemoglu and Simon Johnson overturn conventional wisdom about how economies work revealing the untold story of who wins and who loses the rewards of prosperity in a work that fundamentally transforms how we look at and understand the world Throughout history technological change whether it takes the form of agricultural improvements in the Middle Ages the Industrial Revolution or today s artificial intelligence has been viewed as a main driver of prosperity working in the public interest The reality though is that technology is shaped by what powerful people want and believe generating riches social respect cultural prominence and further political voice for those already powerful For most of the rest of us there is the illusion of progress Daron Acemoglu and Simon Johnson debunk modern techno optimism through a dazzling original account of how technological choices have changed the course of history From vivid stories of how the economic surplus of the Middle Ages was appropriated by an ecclesiastical elite to build cathedrals while the peasants starved to the making of vast fortunes from digital technologies today as millions are pushed towards poverty we see how the path of technology is determined and who influences its trajectory To achieve the true potential of innovation we need to ensure technology is creating new jobs and opportunities rather than marginalizing most people through automated work and political passivity We need to use the tremendous digital advances of the last half century to create useful and empowering tools and seize back control from a small elite of hubristic messianic tech leaders pursuing their own interests With their breakthrough economic theory and manifesto for building a better society Acemoglu and Johnson provide the understanding and vision to reimagine and reshape the path of technology and create true shared prosperity *Robots* Rebecca Stefoff, 2008-01-30 Provides a brief history of robotics describes tasks for which robots are useful and suggests future development *The Animatic Apparatus* Deborah Levitt, 2018-05-25 Unprecedented kinds of experience and new modes of life are now produced by simulations from the CGI of Hollywood blockbusters to animal cloning to increasingly sophisticated military training software while animation has become an increasingly powerful pop cultural form Today the extraordinary new practices and radical objects of simulation and animation are transforming our neoliberal biopolitical culture of life The Animatic Apparatus offers a genealogy for the animatic regime and imagines its alternative futures countering the conservative neoliberal notion of life s sacred inviolability with a new concept and ethics of animatic life
