Insights into Education presents the educational philosophy of J Krishnamurti in an easy to use topic based format It is a practical handbook that comes alive when used as an introduction to group investigation and dialogue What it offers to teachers everywhere is an inroad into the many matters of concern with which they are faced on a daily basis That we cannot continue as we have been doing with rote learning fact finding and a modicum of analysis as the building blocks of education is obvious to anyone who is at all concerned with teaching and learning in a world with accelerating technological advancement alienation and despair It is these very issues that are tackled here sometimes implicitly but always at depth What Krishnamurti proposes and here discloses is a different approach to learning

altogether one that distinguishes itself radically from what we normally understand by that term the accumulation of knowledge with its application and testing By narrowing down our understanding to the pragmatic and the measurable we forfeit the opportunity to probe deeply and to awaken intelligence in our students and in ourselves What is meant by intelligence in this context is not the capacity to memorize and measure but that subtler ability to see the whole which comes alive in a human being when he she sees the limits of the measurable To awaken this intelligence is the goal of education O Insights into Education presents the educational philosophy of J Krishnamurti in an easy to use topic based format It is a practical handbook that comes alive when used as an introduction to group investigation and dialogue What it offers to teachers everywhere is an inroad into the many matters of concern with which they are faced on a daily basis That we cannot continue as we have been doing with rote learning fact finding and a modicum of analysis as the building blocks of education is obvious to anyone who is at all concerned with teaching and learning in a world with accelerating technological advancement alienation and despair It is these very issues that are tackled here sometimes implicitly but always at depth What Krishnamurti proposes and here discloses is a different approach to learning altogether one that distinguishes itself radically from what we normally understand by that term the accumulation of knowledge with its application and testing By narrowing down our understanding to the pragmatic and the measurable we forfeit the opportunity to probe deeply and to awaken intelligence in our students and in ourselves What is meant by intelligence in this context is not the capacity to memorize and measure but that subtler ability to see the whole which comes alive in a human being when he she sees the limits of the measurable To awaken this intelligence is the goal of education Education :An Eternal Asset (Articles United)
