Educational Media and Technology Yearbook 2006 Robert Maribe Branch, Michael Orey, V. J. McClendon, 2006-03-30 The 2006 volume of the 31-year-old Educational Media and Technology Yearbook series continues the legacy of its predecessors. It highlights the major trends of the previous year, noting both renewed interest in multicultural perspectives and the ever-growing interest in online learning. It discusses advances in the school and library media worlds, which continue to reel from budget cuts and hiring freezes. It profiles two outstanding individuals: Michael Molenda, Associate Professor, Instructional Systems Technology, Indiana University, Bloomington; and Ron Oliver, Foundation Professor of Interactive Multimedia, Edith Cowan University, Perth, Western Australia. It also identifies instructional technology-related organizations and graduate programs in North America. The book concludes with a bibliography of journals, books, ERIC documents, journal articles, and nonprint resources. As a repository of so much valuable data and information, it is quite simply a volume no self-respecting media and technology professional should be without.

Preparing Teachers for a Changing World Linda Darling-Hammond, John Bransford, 2012-07-12 Based on rapid advances in what is known about how people learn and how to teach effectively, this important book examines the core concepts and central pedagogies that should be at the heart of any teacher education program. Stemming from the results of a commission sponsored by the National Academy of Education, *Preparing Teachers for a Changing World* recommends the creation of an informed teacher education curriculum with the common elements that represent state-of-the-art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom. *Preparing Teachers for a Changing World* recommends that, in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education in
