care in Canada Varcarolis's Canadian Psychiatric Mental Health Nursing 3rd Edition uses a practical clinical perspective to provide a clear understanding of this often intimidating subject. It provides a foundation in nursing techniques and a guide to psychobiological disorders such as bipolar and depressive disorders, trauma, interventions, and interventions for distinct populations such as children and older adults. Adapted to meet the needs of Canadian nurses by Cheryl L. Pollard and Sonya L. Jakubec, this market-leading text prepares you for practice with real-world examples presented within a Canadian legal, ethical, and cultural context. Canadian focus throughout includes key considerations such as our nation's cultural and social diversity with federal/provincial/territorial distinctions. Canadian research and statistics reflect mental health and mental health practice in Canada. Research Highlight boxes are updated with examples of Indigenous research methodologies by Indigenous researchers and settler allies. DSM-5 boxes provide criteria for disorders covered by the American Psychological Association. Learning features include key terms and concepts, learning objectives, key points to remember, critical thinking, and chapter reviews reinforcing important information and helping to apply textbook content to the clinical setting. Assessment Guidelines boxes summarize the steps of patient assessment for various disorders. Drug Treatment boxes feature the most current generic and trade names for drugs used in Canada. Patient and Family Teaching boxes provide important details that should be discussed with patients and care givers. Integrative Therapy boxes highlight the different types of therapy that may be used to enhance treatment. Considering Culture boxes discuss the importance of cultural safety in providing competent care to diverse populations within various clinical situations. NEW Safety Tip boxes highlight important issues of safety for psychiatric mental health care, patient experiences, and nursing interventions. NEW Added mental health content covers Indigenous populations, migrant populations, and gender differences with a focus on cultural safety, equity, informed approaches, relational, and trauma-informed practices. Updated Chapter 29 covers recovery, survivorship, and public mental health approaches. Enhanced topics include substance use disorders, harm reduction, and support among nurses. Changes related to Medical Assistance in Dying (MAiD) legislation and mental health in view of climate change and the COVID-19 pandemic.

Second Takeoff: Strategies For Malaysia's Economic Resurgence Chin Tong Liew, 2024-07-01. The Malaysian economy is at a crossroads amid global and regional shifts in geopolitics. Malaysia is in a prime position to benefit from the renewed appetite for investment into the region. If Malaysia gets its priorities right, this could be the beginning of the country's next economic takeoff. An updated collection of Chin Tong's writings on economics, society, and governance over the years, this book provides policy suggestions to catapult Malaysia's development to the league of high-income nations amid ongoing geopolitical trends. Central to his thesis is the need for Malaysia to create a middle-class society in which the economic structure supports the creation of dignified jobs with decent pay for all Malaysians. Chin Tong is no stranger to the centrality of jobs in the pursuit of a good life, having grown up selling lottery tickets alongside his mother and waiting tables as a teenager to make ends meet for his working-class family. His eventual experience as a Member of Parliament for over a

decade and a Deputy Minister in two different administrations further confirmed his beliefs that good jobs are the crucial missing component in Malaysia's growth engine. In this book Chin Tong takes us on a whirlwind tour of Malaysia's socio-economic history: what went wrong after the first growth miracle of 1988-1997 and how to make things right this time around. Ultimately the book tells the story of how to fulfil Chin Tong's undying wish for a Malaysia where everyone has a chance to live a good life with a good job under a responsible and kind state.

Mental Health Economics Denise Razzouk, 2017-08-26. The main objective of this work is to provide a book with high quality content that becomes a reference and support for graduate course Mental Health, Public Health and Epidemiology and for research in the domain of health economics applied to mental health. Also this book might be useful for policymakers on formulating mental health policies. Key messages of this book are based on: a mental illness represents a huge cost for society and for health care; b health economics applied to mental health could help in the optimization of resource allocation for mental health care and for better decision making in terms of balancing costs and benefits; c interventions and treatment should be also chosen in general medical practice and in public decision policy according to cost effectiveness, burden of disease and equity principles; d quality of care is related with better outcomes, higher quality of life for clients and with lower costs for society and health system; e best value for money; f it is possible to decrease the burden of mental disorders with cost effective treatments. The book is divided in four main topics: 1 Introduction to Health Economics applied to Mental Health: this section is an overview of basic principles, concepts and methods used in Economics and Health Economics to enable students to make critical appraisal of Health Economics texts and also to design research studies in this topic; 2 Health Economics applied to the evaluation of quality and costs of Mental Health Services: this section presents results of Brazilian studies on the costs of mental health care: hospital, outpatient care, residential care, informal care, methods on the measurement of costs and it discusses issues related with public policies, decisions and quality of mental health care in the low and middle income countries context. There is also an overview of quality indicators of mental health care and instruments to evaluate mental health services and costs; 3 Health Economics applied to evaluate treatment of mental disorders: This section presents a review of cost effectiveness of pharmacological treatments and other interventions applied for treating the most burdensome mental disorders such as depressive and anxiety disorders, bipolar disorders, psychosis, alcohol and drug disorders, dementia and hyper attention deficit disorders; 4 Health Economics burden and indirect costs of mental disorders: This section highlights the social and economic burden caused by mental illness under societal perspective focusing on stigma, unemployment, indirect costs in the workplace, absenteeism and presenteeism, the relationship between poverty and mental disorders, global health and social determinants of mental health and on the costs of mental disorders: depression, anxiety, psychosis, alcohol and drug disorders. We present some instruments to measure indirect costs of mental disorders.
