Heart Disease In Women:

Women and Heart Disease Desmond Julian, Nanette Wenger, 2005-11-10 Despite being one of the world's biggest killers of women heart disease is under diagnosed, under treated and under managed. Why? What is going wrong? Important and ground breaking. *Women and Heart Disease* brings our attention to the inadequacies in both the diagnosis and treatment of heart disease in women. Key features written by Nanette Wenger and Peter Collins, two of the world's leading cardiologists, contributions from leaders in women's cardiac health covers all aspects of cardiovascular disease, not just coronary artery disease, fully updated. Building on the success of the best selling first edition, this is essential reading for all physicians with a particular interest in women and heart disease. *Women and Heart Disease* Desmond Julian, Nanette Wenger, 1997-04-16 This is a groundbreaking book which explains the important clinical and surgical aspects of the diagnosis and treatment of heart disease in women and seeks to improve the understanding of the difference gender makes to both the presentation of heart disease and the disease itself. Management of Cardiovascular Disease in Women Hanna Z. Mieszczańska, Gladys P. Velarde, 2014-03-24 Cardiovascular disease is the leading cause of death in women in the US, with more women dying from heart disease than men. Women may have different presentation from men and often need a different approach to diagnosis and treatment. There are also unique topics of management of heart disease in women including issues during pregnancy, lactation and menopause. Many different health care providers as well as cardiologists are involved in treating these patients. A manual reviewing diagnosis and treatment of cardiac disease in women would help providers without specific cardiology training to deliver care with greater efficiency. A practical and comprehensive guide geared towards these providers would be a highly practical and valuable resource that would be utilized in everyday practice in offices that include urban clinics, general medicine offices, obstetrics and gynecology offices as well as in the surgical subspecialties. This book will be a highly practical resource that can be directly applied to the issues that arise in everyday practice. There is no available book on the market that focuses on a broader approach to cardiac disease in women or focuses on non-cardiology providers and their trainees who have the need to know more about treatment of cardiovascular disease in women. Women And Cardiovascular Disease: Addressing Disparities In Care Kevin R Campbell, 2014-09-26 Cardiovascular disease is the number one killer of both men and women in the US and Europe today. Over the last 20 years, many innovations in technology have allowed for improved therapies for heart attack and stroke, and overall outcomes have significantly improved. Death rates from cardiovascular disease in men are declining. However, even with these improvements in care, death rates for women remain unchanged. This book will explore these gender disparities in care in depth. Specific sections will be devoted to answering the questions of why they are occurring and what healthcare providers and women can do to effect change and narrow the gender gap in cardiovascular care. Ultimately, this book is designed to open the eyes of healthcare providers, medical professionals and policy makers as well as potential female patients and should serve as a call to action to promote
