*The Aging Family* Terry Hargrave, Suzanne Midori Hanna, 2013-06-17 As the population of the United States ages and the lifespan increases so does the number of living generations The mental health care delivery system therefore faces new challenges The United States is heading into the 21st century with multigenerational families now commonplace with up to four or five generations co existing at the same time And each generation is forced to deal with its own developmental transitions as well as complex cross generational issues When a therapist steps into this situation his or her role has to take on board the complexity of the whole family system This text highlights the issues that hold families together and often tear them apart It offers core perspectives that seek to make the work of intervention easier and more effective for the clinician Whether the therapist is called upon to intervene on behalf of elder members to deal with issues such as depression or to step in when younger members are trying to determine how best to provide eldercare the perspectives presented in *The Aging Family* aim to enrich the strategies used

*Dynamic Assessment in Couple Therapy* William J. Hiebert, Joseph P. Gillespie, Robert F. Stahmann, 1993-01-01 More and more therapists are intervening in marital conflicts without waiting to complete the formal assessment process While most texts begin with theoretical roadmaps for the process of therapy *Dynamic Assessment in Couple Therapy* shows therapists how to begin interventions during the process of assessment By detailing the procedures and techniques for using their innovative Structured Initial Interview SII the authors have designed a practical form of intervention to handle both the complexity of the marital journey and the subtle realities of marital roadblocks As outlined in this innovative book SII is a creative source of interaction that will stimulate new insights and helpful new directions for therapists and their clients

*Fundamentals Of Marital Therapy* D. Russell Crane, 2013-04-15 Published in 1996 *Fundamentals of Marital Therapy* is a valuable contribution to the field of Family Therapy

Psychological Treatment of Older Adults Michel Hersen, Vincent B. Van Hasselt, 2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago Indeed at that time relatively little attention was accorded to the psychological needs of older adults The general tenor of the field then was that older adults would not benefit from psychological intervention As we now know this was a faulty assumption that has been discredited with empirical data Indeed clinical research data adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms Given the explosion of interest in this area as evinced by increased investigatory activity national funding and media attention and the

increased number of masters and doctoral level courses devoted to this topic we felt that the time was right for a textbook in the area. Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens. Moreover, since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder, the task for clinicians in the next century will be overwhelming.

**Geriatric Mental Health Care** Gary J. Kennedy, 2001-11-02 This essential guide is designed for mental health practitioners and primary care providers without advanced training in geriatric psychiatry. Gary J. Kennedy sets forth a clear framework for understanding the interplay of medical, psychological, and social factors in frequently encountered problems among older adults. Clear guidelines are delineated for assessing and treating such conditions as depression and anxiety, dementia, psychosis, and mania, sleep disturbances, personality and somatoform disorders, substance abuse, and suicidality. Throughout the book, focuses on ways to sustain seniors' independence and overall quality of life while enhancing their adaptive capacities.
