Heated Discharge Control and Management Alternatives - Small Water Bodies and Rivers Canada. Dept. of the Environment. Environmental Protection Service. Water Pollution Control Directorate, J. F. MacLaren, 1977 *Heated Discharge Control and Management Alternatives* James MacLaren Company, Canada. Water Pollution Control Directorate, 1977 Basic concepts of waste heat management on shallow and deep small water bodies and rivers are reviewed and examples are given This study defines a small water body as a body in which the far field hydrothermal effects of a heated discharge can be detected in a major portion or practically all of the water body Environmental effects due to warming of a small natural water body are consequently not limited to the immediate area of the outfall The report divides small water bodies into three categories rivers nonstratified water bodies and stratified water bodies Management and control alternatives for each category are discussed as well as the biological effects of various cooling systems and methods for prediction and thermal modelling Emphasis is placed on the significance of site specific variations and the necessity for consideration of all alternatives before selection of a cooling system for a particular site Advances in Modeling the Management of Stormwater Impacts William James, 1996-01-01 Why bother documenting conference proceedings Simple accountability What we are doing to the environment today and the arguments we use to justify it will seem incomprehensible in the future This popular series demonstrates state of the art methods models and techniques for water quality management and related environmental issues The material is peer reviewed for readability as well as merit The coverage is multidisciplinary and includes many opposing views Features Selected Water Resources Abstracts , 1990-07 Environmental Effects of Dams and Impoundments in Canada R. M. Baxter, Pierre Glaude, Canada. Department of Fisheries and Oceans, 1980 Survey of the environmental consequences of dam construction and water impoundment in Canada in the past to alert environmentalists and engineers to the problems that may be associated with such activities in the future Immediate direct and obvious effects and long term effects are identified and biological consequences of dams and reservoirs are noted The impact of these activities on native communities is discussed **Resources in Education** , 1979-04 **Civil Engineering Hydraulics Abstracts** , 1985 **Review of Heated Discharge Management and Control Alternatives** Canada. Water Pollution Control Directorate, James MacLaren Company, 1975 This report presents a review of current literature and foreign legislation dealing with heated discharges from thermal power plants Management and control alternatives are discussed with particular reference to the problems associated with once through cooling systems discharging into large water bodies **Circulation Models of Lakes and Inland Seas** Theodore J. Simons, Canada. Department of Fisheries and Oceans, 1980 The purpose of this monograph is to present a state of the art report on models of large scale water circulations in lakes and seas Specifically this review is intended to provide the necessary background information for investigations of material transports and water quality problems in large natural basins In view of the

multidisciplinary nature of such studies treatment of the present material starts from basic physical and mathematical principles
