Watson,2021-10-20 This book addresses the interconnected issues of public memory race and heritage tourism exploring the ways in which historical tourism shapes

collective understandings of America's earliest engagements with race. It includes contributions from a diverse group of humanities scholars including early Americanists and scholars from communication, English, museum studies, historic preservation, art and architecture, Native American studies, and history. Through eight chapters, the collection offers varied perspectives and original analyses of memory making and re-making through travel to early American sites, bringing needed attention to the considerable role that tourism plays in producing and possibly unsettling racialized memories about America's past. The book is an interdisciplinary effort that analyses lesser-known sites of historical and racial significance throughout North America and the Caribbean up to about 1830 to unpack the relationship between leisure travel processes of collective remembering or forgetting and the connections of tourist sites to colonialism, slavery, genocide, and oppression. *Public Memory: Race and Heritage Tourism of Early America* provides a deconstruction of the touristic experience with racism, slavery, and the Indigenous experience in America that will appeal to students and academics in the social sciences and humanities.
