The Role of Transit in Emergency Evacuation Transportation Research Board, 2008-12-09 TRB Special Report 294 *The Role of Transit in Emergency Evacuation* explores the roles that transit systems can play in accommodating the evacuation egress and ingress of people from and to critical locations in times of emergency The report focuses on major incidents that could necessitate a partial to full evacuation of the central business district or other large portion of an urban area According to the committee that produced the report transit agencies could play a significant role in an emergency evacuation particularly in transporting carless and special needs populations but few urban areas have planned for a major disaster and evacuation that could involve multiple jurisdictions or multiple states in a region or have focused on the role of transit and other public transportation providers in

such an incident The report offers recommendations for making transit a full partner in emergency evacuation plans and operations while cautioning emergency managers elected officials and the general public to be realistic in their expectations particularly in a no notice incident that occurs during a peak service period Transportation's Role in Emergency Evacuation and Reentry Paul Brian Wolshon,2009 A Transportation Guide for All-hazards Emergency Evacuation Deborah Matherly,2013 TRB s National Cooperative Highway Research Program NCHRP Report 740 A Transportation Guide for All Hazards Emergency Evacuation focuses on the transportation aspects of evacuation particularly large scale multijurisdictional evacuation The guidance strategies and tools in NCHRP Report 740 are based on an all hazards approach that has applicability to a wide range of notice and no notice emergency events The report follows the basic planning steps of the Federal Emergency Management Agency s Comprehensive Preparedness Guide CPG 101 Each chapter parallels one of the six main CPG steps Each chapter is further subdivided into smaller discrete tasks with cross references to tools such as templates or checklists that are shown at the end of each chapter and are on a CD ROM included with the print version of the report Publisher s description *Emergency Evacuation of Commercial Airplanes* ,2000 *Human Factors of Emergency Evacuation* Stanley R. of practical use if the knowledge is not tested in an appropriate environment In this perspective the major clinical excellence and testing laboratories for disaster response are the scenes where disasters happen Yet most of the research and reports in the field are produced in high income countries while most of the disasters happen in middle or low income countries There is thus a need to bring these two environments together in order to translate theory into practice and among people who are highly exposed and involved in the multidisciplinary management of a disaster or major incident **Survival in Emergency**
