Starting the Twenty-first Century Gitta Tulea, 2018-04-17 Jürgen Habermas speaking of postmodern society remarked that extension of the means of communication not only allows a wide range of information but it also encourages permanent connections between different peoples cultures and social discourses It thus facilitates better general understanding a clarifying of real or apparent contradictions But this process becomes truly positive only when it is performed between equal members Globalization of information does not minimize the possibility of conflict or terrorism if fundamental social problems are not resolved or at least approached in an active way This volume examines the major upheavals of the twentieth century and views within the framework of these events and challenges implications for the future Values and Cultural Changes in the Postmodern World by Zygmunt Bauman explores the changing meaning of space in the globalizing environment S N Eisenstadt analyzes the destructive components of modernity and Irving Louis Horowitz draws attention to the classical values of the common universal culture Social Development and Policies in Contemporary Society by Michael M Cernea examines the importance of the applied and policy orientated research especially in the developing countries and David Marsland stresses the positive role of sociology in pointing to the possibilities of improving healthcare in modern society Societies in Transition Eastern Europe emphasizes transitions that have occurred in Eastern Europe Rozalina Rjyvkina and Leonid Kosals provide an incisive study of the situation in Russia while Jerzy J Wiatr presents a comparative analysis of postcommunist societies with special reference to Poland The Jewish World Pre and Post Holocaust by Regina Azria discusses the identity problems in the Diaspora confronting modernity Eva Etzioni Halevi considers the newly developed Israeli society from the point of view of the exercise and distribution of power and a most interesting contribution by Annette Wieviorka concerns the material and spiritual effects of the Holocaust on the Jews of France Social historians and students of Judaica as well as a general public interested in cultural pluralism will find this well developed volume essential reading

9789004128736 **Jewish Survival** Ernest Krausz, 2023-04-14 These essays address Jewish identity Jewish survival and Jewish continuity The authors account for and analyze trends in Jewish identification and the reciprocal effects of the relationship between the Diaspora and Israel at the end of the twentieth century Jewish identification in contemporary society is a complex phenomenon Since the emancipation of Jews in Europe and the major historic events of the Holocaust and the establishment of the State of Israel there have been substantial changes in the collective Jewish identity As a result Jewish identity and the Jewish process of identification had to confront the new realities of an open society its economic globalization and the impacts of cultural pluralism The trends in Jewish identification are toward fewer and weaker points of attachment fewer Jews who hold religious beliefs with such beliefs held less strongly less religious ritual observance attachment to Zionism and Israel becoming diluted and ethnic communal bonds weakening Jews are also more involved in the wider society in the Diaspora due to fewer barriers and less overt anti-Semitism This opens up possibilities for cultural integration and assimilation In Israel too there are signs of greater interest in the modern world culture The major questions addressed by this volume is whether Jewish civilization will continue to provide the basic social framework and values that will lead Jews into the twenty first century and ensure their survival as a specific social entity The book contains special contributions by Professor Julius Gould and Professor Irving Louis Horowitz and chapters on Sociological Analysis of Jewish Identity Jewish Community Boundaries and Factual Accounts from the Diaspora and Israel *Lightning Gods and Feathered Serpents* Rex Koontz, 2010-01-01 El Taj n an ancient Mesoamerican capital in Veracruz Mexico has long been admired for its stunning pyramids and ballcourts decorated with extensive sculptural programs Yet the city s singularity as the only center in the region with such a wealth of sculpture and fine architecture has hindered attempts to place it more firmly in the context of Mesoamerican history In *Lightning Gods and Feathered Serpents* Rex Koontz undertakes the first extensive treatment of El Taj n s iconography in over thirty years allowing us to view its imagery in the broader Mesoamerican context of rising capitals and new elites during a period of fundamental historical transformations Koontz focuses on three major architectural features the Pyramid of the Niches Central Plaza ensemble the South Ballcourt and the Mound of the Building Columns complex and investigates the meanings of their sculpture and how these meanings would have been experienced by specific audiences Koontz finds that the iconography of El Taj n reveals much about how motifs and elite rites growing out of the Classic period were transmitted to later Mesoamerican peoples as the cultures centered on Teotihuacan and the Maya became the myriad city states of the Early Postclassic period By reexamining the iconography of sculptures long in the record as well as introducing important new monuments and contexts *Lightning Gods and Feathered Serpents* clearly demonstrates El Taj n s numerous iconographic connections with other areas of Mesoamerica while also exploring its roots in an indigenous Gulf lowlands culture whose outlines are only now emerging At the same time it begins to uncover a largely ignored regional artistic culture of which Taj n is the crowning achievement Skull and Bones: Secret Society Revealed

Violence and Social Orders Douglass C. North,John Joseph Wallis,Barry R. Weingast,2009-02-26 All societies must deal with the possibility of violence and they do so in different ways This book integrates the problem of violence into a larger social science and historical framework showing how economic and political behavior are closely linked Most societies which we call natural states limit violence by political manipulation of the economy to create privileged interests These privileges limit the use of violence by powerful individuals but doing so hinders both economic and political development In contrast modern societies create open access to economic and political organizations fostering political and economic competition The book provides a framework for understanding the two types of social orders why open access societies are both politically and economically more developed and how some 25 countries have made the transition between the two types

Literate Education in the Hellenistic and Roman Worlds Teresa Morgan,1998 This book offers an assessment of the content structures and significance of education in Greek and Roman society Drawing on a wide range of evidence including the first systematic comparison of literary sources with the papyri from Graeco Roman Egypt Teresa Morgan shows how education developed from a loose repertoire of practices in classical Greece into a coherent system spanning the Hellenistic and Roman worlds She examines the teaching of literature grammar and rhetoric across a

range of social groups and proposes a model of how the system was able both to maintain its coherence and to accommodate pupils widely different backgrounds needs and expectations In addition Dr Morgan explores Hellenistic and Roman theories of cognitive development showing how educationalists claimed to turn the raw material of humanity into good citizens and leaders of society

Beyond the Alamo Raúl A. Ramos,2009-11-30 Introducing a new model for the transnational history of the United States Raul Ramos places Mexican Americans at the center of the Texas creation story He focuses on Mexican Texan or Tejano society in a period of political transition beginning with the year of Mexican independence Ramos explores the factors that helped shape the ethnic identity of the Tejano population including cross cultural contacts between Bexarenos indigenous groups and Anglo Americans as they negotiated the contingencies and pressures on the frontier of competing empires

Media Tactics in the Long Twentieth Century Marie Cronqvist,Fredrik Mohammadi Norén,Emil Stjernholm,2024-08-08 Integrating media studies with history *Media Tactics in the Long Twentieth Century* explores the dynamic relationship between tactics and strategies in recent history Drawing on examples from a range of different countries and world regions and looking at the infrastructures entanglements and institutions involved the volume makes a strong case for media tactics as a new field of scholarly inquiry and for the importance of a historically informed approach In contrast to strategic communication approaches this media historical intervention contributes to new knowledge about the practical implementation of strategies First foregrounding tactics as an object of study the volume then counters the presentism of contemporary studies by adding a necessary historical perspective Moreover the book theoretically disentangles the concept of strategy from an abstract contemporary buzzword to concrete hands on actions which in turn reveals the complexity of using media strategies and media tactics in reality This volume will interest scholars and students working in the field of media and communication in general and in the subfields of strategic communication public relations media history and propaganda studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Targeting social assistance in fragile settings: An experiment on community-based targeting Abay, Kibrom A.,Berhane, Guush,Gilligan, Daniel O.,Tafere, Kibrom,Taffesse, Alemayehu Seyoum,2024-11-13 Targeting is an important but challenging process in the design and delivery of social and humanitarian assistance programs Community based targeting CBT approaches are often preferred for their local information advantages especially when data driven methods are not feasible However how different variants of CBT approaches fare under various constraints and environments remains unclear For example it is not obvious whether agents involved in CBT maximize the number of beneficiaries or the intensity of transfers when given different levels of discretion or they face budget constraints

We implemented a clustered randomized control trial among community leaders in 180 villages in Ethiopia to evaluate how community leaders target and allocate resources when they face budget constraints and are in the presence absence of discretion We find that under resource constraints community leaders prefer to maximize the number of beneficiaries even at the expense of thinly spreading budgets reducing average transfers to beneficiaries Community leaders are keen to minimize exclusion errors even at the expense of increased inclusion errors suggesting that community leaders may be sensitive to potential communal repercussions and hence prefer to accommodate beneficiaries who would otherwise be excluded based on survey based measures and indicators of poverty Consistent with this we find that offering community leaders some level of discretion helps them reduce exclusion errors and include those most deprived or those affected by armed conflicts Finally we find that community leaders are more vulnerable to favoritism when real stakes rather than hypothetical are involved budgets are relatively larger and they lack discretion We offer nuanced evidence about the implications of implementing CBT designs in the absence of incentives for community leaders to reveal how they use local information

National Political Elites, European Integration and the Eurozone Crisis Nicolò Conti,Borbála Göncz,José Real-Dato,2018-06-18 The global financial economic and sovereign debt crisis since 2008 has led to increases in political disaffection among citizens a loss of legitimacy of political institutions the discredit of mainstream parties and the rise of extremist or anti system political alternatives This comparative volume sheds greater light on this critical juncture in the recent history of the European Union EU by focusing on the evolution of attitudes of national political elites It examines whether the crisis has affected the legitimacy of the EU integration project as perceived by national political elites and consequently if the elite consensus that constituted one of the most solid fundamentals supporting that project has been eroded Analysing these changes across the different dimensions in which support for the EU is organized and its relationship with the evolution of support towards European integration among citizens in member states the book addresses a basic question How have these events affected the perceptions of the EU of national political elites Ultimately it sheds light on the evolution of the relationship between the perception of the EU and the national contexts as well as the likely evolution of the project of European integration in the near future This book will be of key interest to scholars and students of political elites EU politics European integration political parties and more broadly to comparative politics European studies and sociology

Lahav,2004-04-22 With almost a quarter of the world's migrants Europe has been attempting to regulate migration and harmonize immigration policy at the European level. The central dilemma exposed is how liberal democracies can reconcile the need to control the movement of people with the desire to promote open borders, free markets and liberal standards. Gallya Lahav's book traces ten years of public opinion and elite attitudes toward immigration cross nationally to show how and why increasing EU integration may not necessarily lead to more open immigration outcomes. Empirical evidence reveals that support from both elite and public opinion has led to the adoption of restrictive immigration policies despite the requirements of open borders. Unique in bringing together original data on European legislators and national elites, longitudinal data on public opinion and institutional and policy analyses, this 2004 study provides an important insight into the processes of European integration and globalization more broadly. London's 'Big Bang' Moment and its Architectural Conversations

Stephen Rosser,2025-06-30 This book explores the topic of architecture as a component of public discourse focussing on the reception of four high profile developments in the City of London, the UK capital's financial district, dating from the final years of the twentieth century. During this time the City's mode of operation, culture and built environment were all transformed as a result of the market deregulation process labelled 'Big Bang'. It was also a period which saw the subject of architecture attracting public and media attention, becoming a prominent feature of national conversation. The book examines the extensive and often contentious discourse generated by the four case study projects. It looks at how these projects were viewed and interpreted retrospectively when they had become part of the City's long and rich history. Topics explored include building and urban form on the eve of the millennium, the place of new development in a setting of unique historic importance, the iconic building and celebrity architect, and the role of then Prince Charles as an architectural critic. Also referenced are many of the broader issues of the day, including the Thatcher government policies and the preoccupations concerning London's infrastructure, public realm, inner city areas and inequalities. Furthermore, ranging across the discourse is the theme of the relationship between buildings and global finance, foreshadowing later controversies concerning London's post-millennial towers and their impact on the capital's skyline. The book will be of interest to researchers and students of late twentieth century British architecture and urban development, London's history and UK public discourse in the 1980s, a decade of profound political, economic and social change. **The Emergence of**

Organizations and Markets John F. Padgett, Walter W. Powell,2012-10-14 A dynamic framework for studying social emergence. The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty. Where do new alternatives, new organizational forms and new types of people come from? Combining biochemical insights about the origin of life with innovative and historically oriented social network analyses, John Padgett and Walter Powell develop a theory about the emergence of organizational market and biographical novelty from the coevolution of multiple social networks. They demonstrate that novelty arises from spillovers across intertwined networks in

different domains In the short run actors make relations but in the long run relations make actors This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies Padgett and Powell build on the biochemical concept of autocatalysis the chemical definition of life and then extend this autocatalytic reasoning to social processes of production and communication Padgett and Powell along with other colleagues analyze a very wide range of cases of emergence They look at the emergence of organizational novelty in early capitalism and state formation they examine the transformation of communism and they analyze with detailed network data contemporary science based capitalism the biotechnology industry regional high tech clusters and the open source community
