The Emergence of Modern Aesthetic Theory Simon Grote, 2017-10-26 Broad in its geographic scope and yet grounded in original archival research this book situates the inception of modern aesthetic theory the philosophical analysis of art and beauty in theological contexts that are crucial to explaining why it arose Simon Grote presents seminal aesthetic theories of the German and Scottish Enlightenments as outgrowths of a quintessentially Enlightenment project the search for a natural foundation of morality and a means of helping naturally self interested human beings transcend their own self interest This conclusion represents an important alternative to the standard history of aesthetics as a series of preludes to the achievements of Immanuel Kant as well as a reinterpretation of several canonical figures in the German and Scottish Enlightenments It also offers a foundation for a transnational history of the Enlightenment without the French philosophes at its centre while solidly endorsing historians growing reluctance to call the Enlightenment a secularising movement

Imperial Sceptics Gregory Claeys, 2010-08-26 *Imperial Sceptics* provides a highly original analysis of the emergence of opposition to the British Empire from 1850 1920 Departing from existing accounts which have focused upon the Boer War and the writings of John Hobson Gregory Claeys proposes a new chronology for the contours of resistance to imperial expansion Claeys locates the impetus for such opposition in the late 1850s with the British followers of Auguste Comte Tracing critical strands of anti imperial thought through to the First World War Claeys then scrutinises the full spectrum of socialist writings from the early 1880s onwards revealing a fundamental division over whether a new conception of socialist imperialism could appeal to the electorate and satisfy economic demands Based upon extensive archival research and utilising rare printed sources *Imperial Sceptics* will prove a major contribution to our understanding of nineteenth century political thought shedding new light on theories of nationalism patriotism the state and

Polish Republican Discourse in the Sixteenth Century Dorota Pietrzyk-Reeves,2020-04-09 Exploring republican ideas and concepts that developed in sixteenth century Poland under the impact of humanism and the Renaissance as well as political and constitutional changes this is a landmark study of republican discourse in sixteenth century Poland Lithuania It provides a conceptual and contextual analysis of the rich political literature and debate which animated intellectual life and political reasoning during the Polish Lithuanian Commonwealth and effectively demonstrates its republican character Using a comparative perspective Dorota Pietrzyk Reeves situates the Polish republican discourse within both the classical and early modern republican traditions bringing together contexts and ideas that have traditionally been overlooked by scholars of early modern Europe In addition she also underlines the originality of Polish concepts such as the relationship between law liberty and virtue as key elements of a well ordered commonwealth and the vision of a mixed res publica that had a monarchical character This book is an invaluable resource for anyone interested in European intellectual history and the early modern republican tradition
