Embracing Contraries

Nicholas Burbules

Embracing Contraries:

Embracing Contraries Peter Elbow, 1986 Peter Elbow's widely acclaimed and novel theories on the writing process set out in *Writing without Teachers* and *Writing with Power* have earned him the reputation of a leading innovator in the field. Now Elbow has drawn together twelve of his essays on the nature of learning and teaching which together form a comprehensive synthesis of his philosophy of education. At once theoretical and down to earth, this collection will appeal not only to teachers and students of education but to all those with a love of learning. What Elbow asks is natural in studying learning and teaching: What are our assumptions about how the mind ought to function in learning and teaching? Elbow explores the contraries in the educational process in particular his theory that clear thinking can be enhanced by inviting indecision, incoherence and paradoxical thinking. The essays written over a period of twenty-five years are engaged in a single enterprise to arrive at insights or conclusions about learning and teaching while still doing justice to the rich messiness of intellectual inquiry. Elbow discusses the value of interdisciplinary teaching, his theory of cooking, an interaction of conflicting ideas, the authority relationship in teaching and the value of specifying learning objectives. A full section is devoted to evaluation and feedback both of students and faculty. Finally, Elbow focuses on the need to move beyond the skepticism of critical thinking to what he calls methodological belief: an ability to embrace more than one point of view. About the Author: Peter Elbow is Director of the Writing Program at the State University of New York at Stony Brook. He has also taught at MIT, Franconia College, Evergreen State College and Wesleyan University. The famed innovator in writing instruction shares his philosophy of education.

Everyone Can Write Peter Elbow, 2000-03-30 This new collection of essays brings together the best of Elbow's writing since the publication of *Embracing Contraries* in 1987. The volume includes sections on voice, the experience of writing, teaching and evaluation. Implicit throughout is Elbow's commitment to humanizing the profession and his continued emphasis on the importance of binary thinking and nonadversarial argument. The result is a compendium of a master teacher's thoughts on the relation between good pedagogy and good writing; it is sure to be of interest to all professional teachers of writing and will be a valuable book for use in graduate composition courses.

[The New Handbook of Teacher Evaluation](#) Jason Millman, Linda Darling-Hammond, 1990 The 25 chapters in this handbook examine evaluation purposes, processes and methods and discuss how they shape the implementation and outcomes of evaluation. Following an introduction in chapter 1, the nine chapters in Part I consider the purposes of evaluation. Chapters 3, 4 and 5 are concerned with the evaluation processes that determine selection into teaching, preservice evaluation, licensure and certification. Chapters 6, 7 and 8 focus on how evaluation may support the development of greater teaching competencies for beginning and veteran teachers. Chapters 9 and 10 consider school accountability and school improvement. Part II examines the various methods used to evaluate teachers along with their strengths and limitations as applied to the many purposes of evaluation. Chapters 11 and 12 deal with two methods for evaluating inservice teachers: classroom observations and ratings of classroom

performance while chapter 13 deals with teacher self assessment Chapters 14 and 15 deal with less widely used methods the use of student test scores and the use of teacher portfolios Chapters 16 through 18 address the use of formal tests to evaluate teachers for licensure or certification and chapter 19 discusses combining evaluation data from multiple sources for decision making In Part III some of the system wide concerns that developers and users of evaluation plans must confront are discussed Chapters explore legal ethical administrative and economic aspects of teacher evaluation and ways to improve and support teacher evaluation The use of personnel standards to improve teacher evaluation is also discussed Each chapter contains references Contains six figures and four tables SLD **Writing-Based Teaching** Teresa Vilardi, Mary K.

Chang, 2009-11-10 Written by the team at Bard College's Institute for Writing and Thinking this book is designed to provide practical guidance regarding the challenges and potential of writing based teaching and suggestions for how to adapt the practices to particular classroom situations The contributors share candid first hand accounts of what it is like to make writing central to teaching in secondary schools and colleges As teachers of literature composition poetry mathematics anthropology and education they offer philosophical and theoretical reflections practical guidance and personal stories about how to help students become better more fluent writers close readers and reflective thinkers This book will be of interest to writing center directors for what it says about how to do collaborative learning and revision and seeing writing as a way to build community and to writing teachers for how it demystifies freewriting focused freewriting and dialectical notebooks

Vernacular Eloquence Peter Elbow, 2012-01-13 Since the publication of his groundbreaking books *Writing Without Teachers* and *Writing with Power* Peter Elbow has revolutionized how people think about writing Now in *Vernacular Eloquence* he makes a vital new contribution to both practice and theory The core idea is simple we can enlist virtues from the language activity most people find easiest speaking for the language activity most people find hardest writing Speech with its spontaneity naturalness of expression and fluidity of thought has many overlooked linguistic and rhetorical merits Through several easy to employ techniques writers can marshal this wisdom of the tongue to produce stronger clearer more natural writing This simple idea it turns out has deep repercussions Our culture of literacy Elbow argues functions as though it were a plot against the spoken voice the human body vernacular language and those without privilege making it harder than necessary to write with comfort or power Giving speech a central role in writing overturns many empty preconceptions It causes readers to think critically about the relationship between speech writing and our notion of literacy Developing the political implications behind Elbow's previous books *Vernacular Eloquence* makes a compelling case that strengthening writing and democratizing it go hand in hand **A Pedagogy of Possibility** Kay Halasek, 1999 The author reconceives composition studies from a Bakhtinian perspective focusing on both the discipline's theoretical assumptions and its pedagogies Halasek explores the implications of Bakhtin's work and provides a model of scholarship balanced between practice and theory **Renewing Rhetoric's Relation to Composition** Shane Borrowman, Stuart Brown, Thomas

Miller, 2010-02-25 Examining the development of rhetoric and composition using the writings of Theresa Jarnagin Enos as a basis for studies of broader trends this book explores topics including the historical relations of rhetoric and composition their evolution within programs of study and Enos's research on gender Re-Thinking Reason Kerry S. Walters, 1994-01-01 Challenges the widespread assumption that good thinking is logical thinking and that college students should learn better after taking a course in critical thinking The 14 contributors argue for and provide a richer model of thinking that acknowledges the importance of faculties traditionally downplayed or discouraged Addressed to educators Annotation copyright by Book News Inc Portland OR *Teaching Arguments* Jennifer Fletcher, 2023-10-10 No matter where students live lead after graduation one of the most essential tools we can teach them is how to comprehend analyze and respond to arguments Students need to know how writers and speakers' choices are shaped by elements of the rhetorical situation including audience occasion and purpose In *Teaching Arguments* Rhetorical Comprehension Critique and Response Jennifer Fletcher provides teachers with engaging classroom activities writing prompts graphic organizers and student samples to help students at all levels read write listen speak and think rhetorically Fletcher believes that with appropriate scaffolding and encouragement all students can learn a rhetorical approach to argument and gain access to rigorous academic content *Teaching Arguments* opens the door and helps them pay closer attention to the acts of meaning around them to notice persuasive strategies that might not be apparent at first glance When we analyze and develop arguments we have to consider more than just the printed words on the page We have to evaluate multiple perspectives the tension between belief and doubt the interplay of reason character and emotion the dynamics of occasion audience and purpose and how our own identities shape what we read and write Rhetoric teaches us how to do these things *Teaching Arguments* will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated persuasive arguments a major cornerstone for being not just college and career ready but ready for the challenges of the world **Teaching and Learning STEM** Richard M. Felder, Rebecca Brent, 2024-03-19 The widely used STEM education book updated *Teaching and Learning STEM: A Practical Guide* covers teaching and learning issues unique to teaching in the science technology engineering and math STEM disciplines Secondary and postsecondary instructors in STEM areas need to master specific skills such as teaching problem solving which are not regularly addressed in other teaching and learning books This book fills the gap addressing topics like learning objectives course design choosing a text effective instruction active learning teaching with technology and assessment all from a STEM perspective You'll also gain the knowledge to implement learner centered instruction which has been shown to improve learning outcomes across disciplines For this edition chapters have been updated to reflect recent cognitive science and empirical educational research findings that inform STEM pedagogy You'll also find a new section on actively engaging students in synchronous and asynchronous online courses and content has been substantially revised to reflect recent developments in instructional technology and online course development and delivery

Plan and deliver lessons that actively engage students in person or online Assess students progress and help ensure retention of all concepts learned Help students develop skills in problem solving self directed learning critical thinking teamwork and communication Meet the learning needs of STEM students with diverse backgrounds and identities The strategies presented in Teaching and Learning STEM don t require revolutionary time intensive changes in your teaching but rather a gradual integration of traditional and new methods The result will be a marked improvement in your teaching and your students learning Visit Author s site at <https://educationdesignsinc.com/book>

Playing to Get Smart Elizabeth Jones, Renatta M. Cooper, 2006 Practicing what it preaches Playing to Get Smart will be a playful reading experience for teachers and parents alike With jokes riddles and stories sprinkled throughout the authors show how important play is for children of all ethnic and socioeconomic groups from birth to age 8 This provocative challenge to teachers and parents of young children demonstrates why play is the most effective way for children to develop critical life skills such as thinking creatively and social problem solving It explains why teachers need to provide opportunities for quality play and why parents need to understand the benefits of play for their children

Post-process Theory Thomas Kent, 1999 Breaking with the still dominant process tradition in composition studies post process theory or at least the different incarnations of post process theory discussed by the contributors represented in this collection of original essays endorses the fundamental idea that no codifiable or generalizable writing process exists or could exist Post process theorists hold that the practice of writing cannot be captured by a generalized process or a big theory Most post process theorists hold three assumptions about the act of writing writing is public writing is interpretive and writing is situated The first assumption is the commonsensical claim that writing constitutes a public interchange By interpretive act post process theorists generally mean something as broad as making sense of and not exclusively the ability to move from one code to another To interpret means more than merely to paraphrase it means to enter into a relationship of understanding with other language users And finally because writing is a public act that requires interpretive interaction with others writers always write from some position or some place Writers are never nowhere they are situated Leading theorists and widely published scholars in the field contributors are Nancy Blyler John Clifford Barbara Couture Nancy C DeJoy Sidney I Dobrin Elizabeth Ervin Helen Ewald David Foster Debra Journet Thomas Kent Gary A Olson Joseph Petraglia George Pullman David Russell and John Schilb

Foundations for Sustainability Daniel A. Fiscus, Brian D. Fath, 2018-11-16 Foundations for Sustainability A Coherent Framework of Life Environment Relations challenges existing assumptions on environmental issues and lays the groundwork for a new paradigm bringing a greater understanding of what is needed to help create an environmentally and economically sustainable future which to date has been an uphill battle and not an obvious choice The book presents the case for a paradigm based on a multi model of life as organism life as ecosystem and life as biosphere as opposed to the singular assumption that life can be viewed solely as an organism All backed with well cited research from top investigators from

around the world this book is a must have resource for anyone working in ecology environmental science or sustainability Introduces a holistic systemic approach and a synthesis of the systemic root cause that underlies many surface symptoms that are part of individual environmental problems climate water energy etc Complements current piecemeal approaches in order to solve many interconnected environmental problems which share root causes Provides tests and thought experiments to challenge current views on sustainability leveraging the power of critical thinking to find new solutions Gives insights on how to find solutions by blending interdisciplinary and transdisciplinary focuses with disciplinary specialization in ecology and ecosystem science Bridges concepts and methods from math to ecology to human development

The Argument Culture Deborah Tannen, 2012-10-24 In her number one bestseller *You Just Don't Understand* Deborah Tannen showed why talking to someone of the other sex can be like talking to someone from another world Her bestseller *Talking from 9 to 5* did for workplace communication what *You Just Don't Understand* did for personal relationships Now Tannen is back with another groundbreaking book this time widening her lens to examine the way we communicate in public in the media in politics in our courtrooms and classrooms once again letting us see in a new way forces that have been powerfully shaping our lives *The Argument Culture* is about a pervasive warlike atmosphere that makes us approach anything we need to accomplish as a fight between two opposing sides The argument culture urges us to regard the world and the people in it in an adversarial frame of mind It rests on the assumption that opposition is the best way to get anything done The best way to explore an idea is to set up a debate the best way to cover the news is to find spokespeople who express the most extreme polarized views and present them as both sides the best way to settle disputes is litigation that pits one party against the other the best way to begin an essay is to oppose someone and the best way to show you're really thinking is to criticize and attack Sometimes these approaches work well but often they create more problems than they solve Our public encounters have become more and more like having an argument with a spouse You're not trying to understand what the other person is saying you're just trying to win the argument But just as spouses have to learn ways of settling differences without inflicting real damage on each other so we as a society have to find constructive and creative ways of resolving disputes and differences Public discussions require making an argument for a point of view not having an argument as in having a fight The war on drugs the war on cancer the battle of the sexes politicians' turf battles in the argument culture war metaphors pervade our talk and shape our thinking Tannen shows how deeply entrenched this cultural tendency is the forms it takes and how it affects us every day sometimes in useful ways but often causing rather than avoiding damage In the argument culture the quality of information we receive is compromised and our spirits are corroded by living in an atmosphere of unrelenting contention Tannen explores the roots of the argument culture the role played by gender and how other cultures suggest alternative ways to negotiate disagreement and mediate conflicts and make things

better in public and in private wherever people are trying to resolve differences and get things done The Argument Culture is a remarkable book that will change forever the way you perceive the world You will listen to our public voices in a whole new way

Illegal Alphabets and Adult Biliteracy Tomás Mario Kalmar, 2015-03-02 How do illegal aliens chart the speech sounds of colloquial English This book is timeless in offering an unusually direct entry into how a group of Mexican fruit pickers analyze their first encounter with local American speech in a tiny rural Midwestern community in the United States Readers see close up how intelligently migrant workers help each other use what they already know the alphabetic principle of one letter one sound to teach each other from scratch at the very first contact a language which none of them can speak They see how and why the strategies adult immigrants actually use in order to cope with English in the real world seem to have little in common with those used in publicly funded bilingual and ESL classrooms What's new in this expanded edition of Tom's Mario Kalmar's landmark *Illegal Alphabets and Adult Biliteracy* are in depth commentaries from six distinguished scholars Peter Elbow Ofelia Garc a James Paul Gee Herv Varenne Luis V zquez Le n Karen Velasquez who bring to it their own personal professional and multi disciplinary viewpoints

Teaching And Its Predicaments Nicholas Burbules, 2019-05-20 Teaching is a complex and challenging endeavour Teachers are continually faced with difficult choices in which competing values are set in tension with one another The interests of all students and of other groups and constituencies can rarely be served at the same time Different educational goals each desirable in and of itself often place

Teacher Evaluation Kenneth D. Peterson, 2000-05-19 The original edition published in August 1995 challenges current teacher evaluation and school practice The book discusses stages of teacher choice teacher responsibilities for evaluation and suggests ways for teachers to become more involved and in control of their own evaluation Combining information and techniques from his academic studies and evaluation experiences Peterson presents a coherent field tested set of new practices for teacher evaluation The revised edition adds new chapters on the role of the principal in changed teacher evaluation how districts can transition from current practice to improved practices the use of national standards developments in using pupil achievement data and puts a new emphasis on developing sociologically The Internet as a resource for local development is encouraged 67 web sites are recommended as starting points New resources for local development have been added from extensive field testing and analysis forms have been improved and district level principles have been assembled Substantial material has been added on the topic of responding to deficient teacher practice Finally the research literature has been augmented

Yoga Minds, Writing Bodies Christy I. Wenger, 2015-05-01 This book argues for the inclusion of Eastern influenced contemplative education in writing studies as a means of exploring the active engagement writers maintain with their bodies throughout the composing process It explores how this engagement can be navigated by integrating yoga and mediation into the instruction and practice of writing
