**The Embryological Treatises of Hieronymus Fabricius of Aquapendente** Fabricius (ab Aquapendente), 1942

Fabricius wrote at great length on embryology inventing many theories some of which were false His illustrations marked a great advance on previous work Fabricius recorded for the first time the dissection of several embryos Morton s medical bibliography 5th ed 1991 p 88 **Coming To** Timothy M. Harrison, 2020-10-10 In *Coming To* Timothy M Harrison uncovers the forgotten role of poetry in the history of the idea of consciousness Drawing our attention to a sea change in the English seventeenth century when over the course of a half century conscience made a sudden shift to consciousness he traces a line that leads from the philosophy of Ren Descartes to the poetry of John Milton from the prenatal memories of theologian Thomas Traherne to the unresolved perspective on natality consciousness and ethics in the philosophy of John Locke Each of these figures responded to the first person perspective by turning to the origins of how human thought began Taken together as Harrison shows this unlikely group of thinkers sheds new light on the emergence of the concept of consciousness and the significance of human natality to central questions in the fields of literature philosophy and the history of science
