**Ethnicity and Sociopolitical Change in Africa and Other Developing Countries** Santosh C. Saha,2008-03-07 This

edited collection of essays answers a basic question posed by contemporary discourse on state building How might people s identification with a particular ethnic group matter Essays in this book use an integrated multi disciplinary approach to understanding regional and local community culture and socio political development in developing countries especially in Sub Saharan Africa to argue that the state as well as civil society confers on cultural differences a legitimacy that can be achieved in no other way but by positive cooperation Contributors from different countries look at local patterns in state building and modernization as they have unfolded over the course of the last fifty years They claim that the people and ethnic groups in most developing countries adhere to a concept of popular sovereignty that testifies that aspects of positive and moral ethnicity can contribute to social change as in China economic development as in India or in a democratization process as in Rwanda and Burundi The eventual methodological assumption made by these essays presumes that ethnic conflicts in such countries as Cyprus Turkey India and Rwanda have no moral sanction ethnicity has not assumed a political ideology One conclusion reached by the contributors is that some form of accommodation between opposing ethnically diversified groups as well as between state and ethnic elements is feasible Human Rights Mechanism in South Asia Shveta

Dhaliwal,2016-10-04 This book provides an ideological framework for the establishment of a comprehensive human rights system in South Asia Presents theoretical bases for a human rights mechanism Studies existing international frameworks under United Nations and regional initiatives in Europe the Americas Africa and Asia especially the Arab world and East Asia Examines the state of human rights in 8 countries in South Asia including the SAARC region Afghanistan Bangladesh Bhutan India Nepal Maldives Pakistan and Sri Lanka Uses a multi disciplinary approach bringing together law religion culture and contemporary political theories of regionalism **Relations of NDA and UPA with Neighbours** Raj Kumar Singh,2010

**Contemporary India with Controversial Neighbours** Raj Kumar Singh,2011 Ibss: Political Science: 1994 British Library of Political and Economic Science at the London School of Economics,1995-12-08 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences US-Pakistan Relationship A.Z. Hilali,2017-07-05 Hilali provides an excellent study into the US Pakistan partnership under the Reagan administration The book explores the causes of Pakistan s involvement in the Afghanistan war and the United States support to prevent Soviet adventurism It shows that Pakistan was the principal channel through which assistance was provided to Afghan freedom fighters it also provided access to its military bases to use against the Soviet Union The study looks at the consequences of the war on Pakistan and explains how it became enmeshed within its domestic politics Furthermore it evaluates the role of Pakistan as a key partner in the global coalition against terrorism and discusses how General Pervez Musharraf brought about Pakistan s development towards a progressive moderate and democratic society Ideally suited to courses on foreign policy *Regional Powers and Small State Security* K. **The Business of Martyrdom** Jeffrey W Lewis, 2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology The Business of Martyrdom argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows The Business of Martyrdom to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon
