s Education London studied art history at Cambridge University and his books have won several international awards and include *Just Look Just Imagine* and *Looking into Paintings* Emotions, Passions, and Power in Renaissance Italy Fabrizio Ricciardelli, Andrea Zorzi, 2025-10-01 Emotions depend on language cultural practices expectation and moral beliefs Hate fear cruelty and love are always turning history into the history of passion and lust because emotional life is always ready to overflow intellectual life This fascinating study of emotion in Renaissance Italy shows that emotions are built and created by the society in which they are expressed and conditioned The contributors examine among others the emotional language of the court around public execution religious practices and during outbreaks of disease *William Henry Wishard, a Doctor of the Old School* Elizabeth Moreland Wishard, 1920 Songs for Dead Parents Erik Mueggler, 2017-12-02 In a society that has seen epochal change over a few generations what remains to hold people together and offer them a sense of continuity and meaning In *Songs for Dead Parents* Erik Mueggler shows how in contemporary China death and the practices surrounding it have become central to maintaining a connection with the world of ancestors ghosts and spirits that socialism explicitly disavowed Drawing on more than twenty years of fieldwork in a mountain community in Yunnan Province *Songs for Dead Parents* shows how people view the dead as both material and immaterial as effigies replace corpses tombstones replace effigies and texts eventually replace tombstones in a long process of disentangling the dead from the shared world of matter and memory It is through these processes that people envision the cosmological underpinnings of the world and assess the social relations that make up their community Thus state interventions aimed at reforming death practices have been deeply consequential and Mueggler traces the transformations they have wrought and their lasting effects Windows of the Soul Martin Henry Porter, 2005 In early modern Europe there was a small group of books on the art of physiognomy which claimed to provide self knowledge through an interpretation of external features How To Make a Human Clive Gifford, 2024-10-22 Could you build a human body from scratch The best way to understand how something works is to take it apart and put it back together again But how would you make your very own human body Where would you start What would you need And how would you fix everything together This book is a step by step guide Of course it wouldn't be quite so easy in practice But after reading this book you'll certainly know what we humans are made of The Anthropic Principle: A Universe Built for Man Anthony Walsh, 2023-01-10 The Copernican Principle states that humankind is an insignificant assemblage of chemical scum living on an accidental planet in a suburb of a purposeless universe Many prominent scientists including Nobel laureate physicists have questioned this scurrilous principle which has led physicists to propose the Anthropic Principle This principle posits a purposeful link between the structure of the universe and the existence of humankind and its specialness The numerous features of the universe are so freakishly fine tuned for the existence of intelligent life that physicists are beginning to come to grips with the notion that our universe is profoundly purposeful and that there is a powerful and incredibly intelligent Mind behind it all American Journal of Public Health , 1983 Includes section Books and reports
