Through the Eye of the Whale Jana Mitzoda, 2021-07-07 Life can be a conscious voyage on the sea of dreams surfing the waves of love This book is a response to the calling of my soul who longed to tell her story which might inspire people to open up to live their story according to their own inner wisdom Our soul keeps us constantly connected to the Source and you might already have your preferred way of communicating with it Whether through prayer meditation dreaming or by listening to intuition body awareness breath flow the language of nature or the magic of synchronicity everyone has access to their guidance within We all carry a unique gift we have come here to develop and that makes each being an original work of art While we live we are fully responsible for our mental physical emotional and spiritual condition We were born into a specific body and background potentially aware of how on a deeper level everything is interconnected at the level of body soul humanity our planet and the universe at large Creating this book has become a three year journey of healing self acceptance and increasing awareness of the uniqueness of my own journey Where is the place on Earth where I am supposed to be I asked myself a few years ago During that time my natural desire to grow my awareness on the path to mastery in being myself attracted many kindred spirits who whom we support each other We enjoy being and living this mystery together The dream of our soul holds the idea of what it wants to experience and create for ages and across lifetimes The task of our human self is to open up to this big dream of the soul and allow it to reconcile anything that is not aligned with this great soul's intent in our current life Each of us moves within the flow of life as an endless experiment Collectively we are on Earth in the middle of a war for our consciousness and energy The only way out of the chaos is through higher vibrational states of being such as love peace and joy It all starts with our thoughts emotions words and actions Let's not wait for any savior to tell us what to do Instead let's turn inward To the truth about the light of the Source which is our essence Let's anchor in the awareness that we are love and thus allow our body to radiate it in the form of light outside of us A few years ago I had a dream in which I was presented with a list of values that will be fundamental on Earth in the future I missed humanity among them Our soul heart empathy and humanness these qualities are now needed more than ever before As the old structures of the outside world fall apart and we are seemingly constrained by restrictions we are presented a life chance to immerse ourselves inside and by consciously sailing the endless sea of dreams on the waves of love to return to our essence which is crystal clear love Only when we harmonize within may the outside world change The game we play here therefore begins and ends inside each of us

Cognitive Behavior Therapy with Children W. Edward Craighead, Andrew W. Meyers, 2013-11-21 Recent estimates Hallahan Kauffman 1978 indicate that over 4 7 million children 7 3% of the child population under the age of 19 are labeled emotionally disturbed mentally retarded or learning disabled Moreover many of these children remain unserved or are inadequately served The past decade has produced an increasing concern with the mental health needs of these children and their families This trend had as much impact in behavior therapy as it did in any other branch of the helping professions Behavioral work with children with its emphasis on skill development and environmental modification helped to build into child psychotherapy a true preventive mental health orientation The ease of delivery and application of behavioral procedures allowed parents and other caregivers to become meaningfully involved in the clinical process and so facilitated therapy gains and the maintenance and generalization of those gains Perhaps the most significant change in behavior therapy in the 1970s was the move beyond interventions derived strictly from learning theories to applications based on knowledge from a variety of psycho logical research areas The cognitive mediational activities of the client have received

special attention and this book presents the conceptual methodological and clinical issues in contemporary cognitive behavior therapy with children
