Expressing The World:

New Feminist Perspectives on Embodiment Clara Fischer, Luna Dolezal, 2018-02-16 Despite several decades of feminist activism and scholarship women's bodies continue to be sites of control and contention both materially and symbolically. Issues such as reproductive technologies, sexual violence, objectification, motherhood and sex trafficking among others constitute ongoing pressing concerns for women's bodies in our contemporary milieu, arguably exacerbated in a neoliberal world where bodies are instrumentalized as sites of human capital. This book engages with these themes by building on the strong tradition of feminist thought focused on women's bodies and by making novel contributions that reflect feminists' concerns both theoretically and empirically about gender and embodiment in the present context and beyond. The collection brings together essays from a variety of feminist scholars who deploy diverse theoretical approaches including phenomenology, pragmatism and new materialisms in order to examine philosophically the question of the current status of gendered bodies through cutting edge feminist theory.

The World Atlas of Language Structures Martin Haspelmath, Matthew S. Dryer, David Gil, Bernard Comrie, 2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages. 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels, tone systems, gender, plurals, tense, word order and body part terminology. Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question. The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features. The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages. The Atlas will be especially valuable for linguistic typologists, grammatical theorists, historical and comparative linguists and for those studying a region such as Africa, Southeast Asia, North America, Australia and Europe. It will also interest anthropologists and geographers. More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics. No institution involved in language research can afford to be without it.
