

# MASS EXTINCTIONS

A mass extinction is a sharp spike in the rate of extinction of species caused by a catastrophic event, or rapid environmental change. Scientists have been able to identify five mass extinctions in Earth's history, each of which led to a loss of more than 75 percent of animal species.

## 1. ORDOVICIAN-SILURIAN EXTINCTION 440 MILLION YEARS AGO (MA)

Scientists theorize that there were two main phases to this extinction: a glaciation event and a heating event. Abundant plant life removed carbon dioxide (CO<sub>2</sub>) from the air, causing global cooling and glacier formation. This led to a drop in sea levels, reducing habitat. Later came global warming and sea level rising again. Creatures that had adapted to the cooler climate were unable to survive the increased temperature. Since most life was marine at the time, 80% of life was lost.

86% LOSS

## 2. LATE DEVONIAN EXTINCTION—365 MA

About 75% of life died off during this period. One theory suggests that land plants developed deep roots, releasing an abundance of nutrients into the oceans that led algae. Because of this, algae blooms consumed vast amounts of oxygen (O<sub>2</sub>) in the oceans, suffocating many species. Another theory suggests that another global cooling took place, resulting in glaciation and a fall in sea level, leading to habitat loss.

75% LOSS

## 3. PERMIAN-TRIASSIC EXTINCTION—252 MA

The Permian-Triassic was the deadliest extinction in history: 90% of all life perished. Scientists believe that volcanic activity in Siberia put massive amounts of carbon dioxide, a greenhouse gas, into the atmosphere. Bacteria that thrive on CO<sub>2</sub> began producing methane, another greenhouse gas. Large quantities of both gases warmed the planet and combined with Earth's water, making the oceans and sea acidic, creating a highly toxic environment for life.

96% LOSS

## 4. TRIASSIC-JURASSIC EXTINCTION—201.3 MA

Some scientists theorize that volcanic eruptions spewed tons of CO<sub>2</sub> into the atmosphere, which trapped heat and acidified the oceans, causing this mass extinction. Other scientists contend that an asteroid or comet impact triggered the extinction. About 80% of life was lost in this extinction, including most of the dinosaurs, making way for the dinosaur's extinction.

80% LOSS

## 5. CRETACEOUS-PALEOGENE EXTINCTION—66 MA

The Cretaceous-Paleogene extinction wiped out the dinosaurs, along with 60-70% of all life on Earth. A widely accepted theory is that an asteroid landed in the Yucatán Peninsula in Mexico and killed the dinosaurs. The impact would have ejected enormous amounts of debris into the atmosphere, causing global temperatures to drop. The impact may have also caused local fires, earthquakes, tsunamis, and acid rain.

60-70% LOSS

## 6. HOLOCENE EXTINCTION 11,700 YEARS AGO TO PRESENT

The next mass extinction may already be happening. The current extinction rate is at least a thousand times greater than the "normal" extinction rate. A "normal" or background extinction rate is the average rate of extinction based on the longevity of species through time without human influence, determined by the fossil record. Scientists believe that human impact on the environment is the leading cause of extinctions today.

# Extinctions In Near Time

**Michael Eugene Harkin, David Rich  
Lewis**

## **Extinctions In Near Time:**

*Extinctions in Near Time* R. D. E. MacPhee, 1999-06-30 This book examines an important and growing issue among ecologists conservation biologists and archaeologists namely recent extinction of species and will focus on treatments of losses thought to have been caused by humans in some way over the past 40 000 years when Homo sapiens spread worldwide There is an exemplary list of leading figures in this debate and the book should have impact for the debate on current conservation issues and biodiversity

**Extinctions in Near Time** Ross D.E. MacPhee, Hans-Dieter Sues, 2013-11-09 Near time an interval that spans the last 100 000 years or so of earth history qualifies as a remarkable period for many reasons From an anthropocentric point of view the out standing feature of near time is the fact that the evolution cultural diversification and glob al spread of Homo sapiens have all occurred within it From a wider biological perspective however the hallmark of near time is better conceived of as being one of enduring repeat ed loss The point is important Despite the sense of uniqueness implicit in phrases like the biodiversity crisis meant to convey the notion that the present bout of extinctions is by far the worst endured in recent times substantial losses have occurred throughout near time In the majority of cases these losses occurred when and only when people began to ex pand across areas that had never before experienced their presence Although the explana tion for these correlations in time and space may seem obvious it is one thing to rhetori cally observe that there is a connection between humans and recent extinctions and quite another to demonstrate it scientifically How should this be done Traditionally the study of past extinctions has fallen largely to researchers steeped in such disciplines as paleontology systematics and paleoecology The evaluation of future losses by contrast has lain almost exclusively within the domain of conservation biolo gists Now more than ever there is opportunity for overlap and sharing of information

**Palaeobiology II** Derek E. G. Briggs, Peter R. Crowther, 2001-03-05 Palaeobiology A Synthesis was widely acclaimed both for its content and production quality Ten years on Derek Briggs and Peter Crowther have once again brought together over 150 leading authorities from around the world to produce Palaeobiology II Using the same successful formula the content is arranged as a series of concise articles taking a thematic approach to the subject rather than treating the various fossil groups systematically This entirely new book with its diversity of new topics and over 100 new contributors reflects the exciting developments in the field including accounts of spectacular newly discovered fossils and embraces data from other disciplines such as astrobiology geochemistry and genetics Palaeobiology II will be an invaluable resource not only for palaeontologists but also for students and researchers in other branches of the earth and life sciences Written by an international team of recognised authorities in the field Content is concise but informative Demonstrates how palaeobiological studies are at the heart of a range of scientific themes

*American Megafaunal Extinctions at the End of the Pleistocene* Gary Haynes, 2008-12-23 The volume contains summaries of facts theories and unsolved problems pertaining to the unexplained extinction of dozens of genera of mostly large terrestrial mammals which

occurred ca 13 000 calendar years ago in North America and about 1 000 years later in South America Another equally mysterious wave of extinctions affected large Caribbean islands around 5 000 years ago The coupling of these extinctions with the earliest appearance of human beings has led to the suggestion that foraging humans are to blame although major climatic shifts were also taking place in the Americas during some of the extinctions The last published volume with similar but not identical themes *Extinctions in Near Time* appeared in 1999 since then a great deal of innovative exciting new research has been done but has not yet been compiled and summarized Different chapters in this volume provide in depth resum s of the chronology of the extinctions in North and South America the possible insights into animal ecology provided by studies of stable isotopes and anatomical physiological characteristics such as growth increments in mammoth and mastodont tusks the clues from taphonomic research about large mammal biology the applications of dating methods to the extinctions debate and archeological controversies concerning human hunting of large mammals

*The Anthropology of Extinction* Genese Marie Sodikoff,2012 The *Anthropology of Extinction* offers compelling explorations of issues of widespread concern

**Encyclopedia of Biodiversity** ,2013-02-05 The 7 volume *Encyclopedia of Biodiversity* Second Edition maintains the reputation of the highly regarded original presenting the most current information available in this globally crucial area of research and study It brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it Major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity The science of biodiversity has become the science of our future It is an interdisciplinary field spanning areas of both physical and life sciences Our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future Second edition includes over 100 new articles and 226 updated articles covering this multidisciplinary field from evolution to habits to economics in 7 volumes The editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research readers can be assured that they are reading material that has been meticulously checked and reviewed by experts Approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms

**Understanding the Cultural Landscape** Bret Wallach,2005-01-02 This compelling book offers a fresh perspective on how the natural world has been imagined built on and transformed by human beings throughout history and around the globe Coverage ranges from the earliest societies to preindustrial China and India from the emergence in Europe of the modern world to the contemporary global economy The focus is on what the places we have created say about us our belief systems and the ways we make a living Also explored are the social and environmental consequences of human activities and how conflicts over the meaning of progress are reflected in today s urban rural and suburban landscapes Written in a highly engaging style this ideal undergraduate level human geography text is illustrated with over 25 maps and

70 photographs Note Visit [www.greatmirror.com](http://www.greatmirror.com) for many additional photographs by Bret Wallach related to the themes addressed in this book

**Proceedings RMRS.**, 1998 **Twilight of the Mammoths** Paul S. Martin, 2007-05-08 Paul S. Martin's innovative ideas on late quaternary extinctions and wildlife restoration have fueled one of science's most stimulating recent debates He expounds them vividly here and defends them eloquently A must read David Rains Wallace author of *Beasts of Eden* This is a marvelous read by a giant in American prehistory about one of the greatest mysteries in the earth sciences Tim Flannery author of *The Eternal Frontier* Whether or not you agree with Paul Martin he has shaped how we think about our Pleistocene ancestors and their role in transforming this planet Ross D E MacPhee Curator of Mammalogy American Museum of Natural History *Connecting Mountain Islands and Desert Seas*, 2005 **Macroecology: Concepts and Consequences** British Ecological Society. Symposium, 2003-08 Macroecology Concepts and Consequences brings together for the first time major researchers in the field to present overviews of current thinking about the form and determinants of macroecological patterns Each section presents different viewpoints on the answer to a key question in macroecology such as why are most species rare why are most species small bodied and why are most species restricted in their distribution **Foundations of the Earth** H.H. Shugart, 2014-07-08 Where were you when I laid the foundation of the earth God asks Job in the Whirlwind Speech but Job cannot reply This passage which some environmentalists and religious scholars treat as a green creation myth drives renowned ecologist H H Shugart's extraordinary investigation in which he uses verses from God's speech to Job to explore the planetary system animal domestication sea level rise evolution biodiversity weather phenomena and climate change Shugart calls attention to the rich resonance between the Earth's natural history and the workings of religious feeling the wisdom of biblical scripture and the arguments of Bible ethicists The divine questions that frame his study are quintessentially religious and the global changes humans have wrought on the Earth operate not only in the physical chemical and biological spheres but also in the spiritual realm Shugart offers a universal framework for recognizing and confronting the global challenges humans now face the relationship between human technology and large scale environmental degradation the effect of invasive species on the integrity of ecosystems the role of humans in generating wide biotic extinctions and the future of our oceans and tides **End of the Megafauna: The Fate of the World's Hugest, Fiercest, and Strangest Animals** Ross D E MacPhee, 2018-11-13 The fascinating lives and puzzling demise of some of the largest animals on earth Until a few thousand years ago creatures that could have been from a sci fi thriller including gorilla sized lemurs 500 pound birds and crocodiles that weighed a ton or more roamed the earth These great beasts or megafauna lived on every habitable continent and on many islands With a handful of exceptions all are now gone What caused the disappearance of these prehistoric behemoths No one event can be pinpointed as a specific cause but several factors may have played a role Paleomammalogist Ross D E MacPhee explores them all examining the leading extinction theories weighing the evidence and presenting his own conclusions He shows how theories of human overhunting

and catastrophic climate change fail to account for critical features of these extinctions and how new thinking is needed to elucidate these mysterious losses Along the way we learn how time is determined in earth history how DNA is used to explain the genomics and phylogenetic history of megafauna and how synthetic biology and genetic engineering may be able to reintroduce these giants of the past Until then gorgeous four color illustrations by Peter Schouten re create these megabeasts here in vivid detail      Encyclopedia of Quaternary Science Cary Mock,2013-03-25 The second revised edition of the Encyclopedia of Quaternary Science Four Volume Set provides both students and professionals with an up to date reference work on this important and highly varied area of research There are lots of new articles and many of the articles that appeared in the first edition have been updated to reflect advances in knowledge since 2006 when the original articles were written The second edition will contain about 375 articles written by leading experts around the world This major reference work is richly illustrated with more than 3 000 illustrations most of them in colour Research in the Quaternary sciences has advanced greatly in the last 10 years especially since topics like global climate change geologic hazards and soil erosion were put high on the political agenda This second edition builds upon its award winning predecessor to provide the reader assured quality along with essential updated coverage Contains 357 broad ranging articles 4310 pages written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field Facilitates teaching and learning The first edition was regarded by many as the most significant single overview of Quaternary science ever yet Editor in Chief Scott Elias has managed to surpass that in this second edition by securing even more expert reviews whilst retaining his renowned editorial consistency that enables readers to navigates seamlessly from one unfamiliar topic to the next      *Whales, Whaling, and Ocean Ecosystems* James A. Estes,2006 A must read for anyone interested in the ecology of whales this timely and creative volume is sure to stimulate new research for years to come Annalisa Berta San Diego State University      **Of Books and Beasts** Matt Bille,2021-12-02 In the controversial field of cryptozoology plagued by long lost accounts and internet fantasies the essential core of usable information is largely maintained in books Science writer and cryptozoology researcher Matt Bille offers 400 reviews of significant books in cryptozoology supporting sciences like biology and cryptozoological fiction Matt s selections based on 45 years of reading and writing on zoology and cryptozoology favor reliable science and history providing an essential foundation for enthusiasts and skeptics alike The search for unknown animals starts here Looking for a concise but reliable survey of the most noteworthy cryptozoological books past and present Look no further here it is Dr Karl P N Shuker Zoologist      Extinction and Biogeography of Tropical Pacific Birds David W. Steadman,2006-10-15 Publisher Description      **Stochastic Population Dynamics in Ecology and Conservation** Russell Lande,Steinar Engen,Bernt-Erik Sæther,2003 All populations fluctuate stochastically creating a risk of extinction that does not exist in deterministic models with fundamental consequences for both pure and applied ecology This book provides the most comprehensive introduction to

stochastic population dynamics combining classical background material with a variety of modern approaches including new and previously unpublished results by the authors illustrated with examples from bird and mammal populations and insect communities Demographic and environmental stochasticity are introduced with statistical methods for estimating them from field data The long run growth rate of a population is explained and extended to include age structure with both demographic and environmental stochasticity Diffusion approximations facilitate the analysis of extinction dynamics and the duration of the final decline Methods are developed for estimating delayed density dependence from population time series using life history data Metapopulation viability and the spatial scale of population fluctuations and extinction risk are analyzed Stochastic dynamics and statistical uncertainty in population parameters are incorporated in Population Viability Analysis and strategies for sustainable harvesting Statistics of species diversity measures and species abundance distributions are described with implications for rapid assessments of biodiversity and methods are developed for partitioning species diversity into additive components Analysis of the stochastic dynamics of a tropical butterfly community in space and time indicates that most of the variance in the species abundance distribution is due to ecological heterogeneity among species so that real communities are far from neutral Throwing Fire Alfred W. Crosby, 2002-04-08 Historian Alfred W Crosby looks at hard accurate throwing and the manipulation of fire as unique human capabilities Humans began throwing rocks in prehistory and then progressed to javelins atlatls bows and arrows We learned to make fire by friction and used it to cook drive game burn out rivals and alter landscapes In historic times we invented catapults trebuchets and such flammable liquids as Greek Fire About 1 000 years ago we invented gunpowder which accelerated the rise of empires and the advance of European imperialism In the 20th century gunpowder weaponry enabled us to wage the most destructive wars of all time peaking at the end of World War II with the V 2 and atomic bomb Today we have turned our projectile talents to space travel which may make it possible for our species to migrate to other bodies of our solar system and even other star systems

**Native Americans and the Environment** Michael Eugene Harkin, David Rich Lewis, 2007-01-01 Often cited as one of the most decisive campaigns in military history the Seven Days Battles were the first campaign in which Robert E Lee led the Army of Northern Virginia as well as the first in which Lee and Thomas Stonewall Jackson worked together

This is likewise one of the factors by obtaining the soft documents of this **Extinctions In Near Time** by online. You might not require more get older to spend to go to the book opening as skillfully as search for them. In some cases, you likewise attain not discover the notice Extinctions In Near Time that you are looking for. It will utterly squander the time.

However below, gone you visit this web page, it will be so very simple to get as competently as download guide Extinctions In Near Time

It will not admit many get older as we accustom before. You can accomplish it while operate something else at home and even in your workplace. fittingly easy! So, are you question? Just exercise just what we present under as with ease as evaluation **Extinctions In Near Time** what you with to read!

### **Extinctions In Near Time Introduction**

Extinctions In Near Time Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Extinctions In Near Time Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Extinctions In Near Time : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Extinctions In Near Time : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Extinctions In Near Time Offers a diverse range of free eBooks across various genres. Extinctions In Near Time Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Extinctions In Near Time Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Extinctions In Near Time, especially related to Extinctions In Near Time, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Extinctions In Near Time, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Extinctions In Near Time books or magazines might include. Look for these in online stores or libraries. Remember that while Extinctions In Near Time, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Extinctions In Near Time eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short

stories for free on their websites. While this might not be the Extinctions In Near Time full book , it can give you a taste of the authors writing style.Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Extinctions In Near Time eBooks, including some popular titles.

### FAQs About Extinctions In Near Time Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Extinctions In Near Time is one of the best book in our library for free trial. We provide copy of Extinctions In Near Time in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Extinctions In Near Time. Where to download Extinctions In Near Time online for free? Are you looking for Extinctions In Near Time PDF? This is definitely going to save you time and cash in something you should think about.
