Diller Scofidio + Renfro Edward Dimendberg, 2013-03-20 In Diller Scofidio Renfro Architecture after Images

Edward Dimendberg offers the first comprehensive treatment of one of the most imaginative contemporary design studios. Since founding their practice in 1979, Elizabeth Diller and Ricardo Scofidio have integrated architecture, urban design, media art, and the performing arts in a dazzling array of projects which include performances, art installations, and books in addition to buildings and public spaces. At the center of this work is a fascination with vision and a commitment to questioning the certainty and security long associated with architecture. Dimendberg provides an extensive overview of these concerns and the history of the studio, revealing how principals Elizabeth Diller, Ricardo Scofidio, and Charles Renfro continue to expand the definition of architecture, question the nature of space and vision in contemporary culture, and produce work that is endlessly surprising and rewarding, from New York's High Line to *Blur*, an artificial cloud, and *Facsimile*, a video screen that moves around a building facade. Dimendberg also explores the relation of work by DS+R to that by earlier modernists such as Marcel Duchamp and John Hejduk. He reveals how the fascination of the architects with evolving forms of media technology and building materials has produced works that unsettle distinctions among architecture and other media. Based on interviews with the architects, their clients, and collaborators, as well as unprecedented access to unpublished documents, sketchbook entries, and archival records, *DS+R* is the most thorough consideration of DS+R in any language. Illustrated with many previously unpublished renderings in addition to photos from significant contemporary photographers, this book is an essential study of one of the most significant and creative architecture and design studios working today.

Sight and Embodiment in the Middle Ages S. Biernoff, 2002-07-01 This book breaks new ground by bringing postmodern writings on vision and embodiment into dialogue with medieval texts and images, an interdisciplinary strategy that illuminates and complicates both cultures. This is an invaluable reference work for anyone interested in the history and theory of visuality, and it is essential reading for scholars of art, science, or spirituality in the medieval period.

The Image in Dispute Dudley Andrew, 1997 Photography, cinema, and video have irrevocably changed the ways in which we view and interpret images. Indeed, the mechanical reproduction of images was a central preoccupation of twentieth-century philosopher Walter Benjamin, who recognized that film would become a vehicle not only for the entertainment of the masses but also for consumerism and even communism and fascism. In this volume, experts in film studies and art history take up the debate begun by Benjamin about the power and scope of the image in a secular age. Part I aims to bring Benjamin's concerns to life in essays that evoke specific aspects and moments of the visual culture he would have known. Part II focuses on precise instances of friction within the traditional arts brought on by this century's changes in the value and mission of images. Part III goes straight to the image technologies themselves: photography, cinema, and video, to isolate distinctive features of the visual cultures they help constitute. As we advance into the postmodern era in which images play an ever more central role in conveying perceptions and information, this anthology provides a crucial context for understanding the apparently

irreversible shift from words to images that characterized the modernist period It will be important reading for everyone in cultural studies film and media studies and art history **Popular Electricity and the World's Advocate** ,1909
