Victor E. Kappeler,Gary W. Potter,2017-07-18 The social construction of crime is often out of proportion to the threat posed The media and advocacy groups shine a spotlight on some crimes and ignore others Street crime is highlighted as putting everyone at risk of victimization while the greater social harms from corporate malfeasance receive far less attention Social arrangements dictate what is defined as crime and the punishments for those who engage in the proscribed behavior Interest groups promote their agendas by appealing to public fears Justifications often have no basis in fact but the public accepts the exaggerations and blames the targeted offenders The net widening effect of more laws and more punishment catches those least able to defend themselves This innovative alternative to traditional textbooks provides insightful observations of myths and trends in criminal justice Fourteen chapters challenge misconceptions about specific crimes or aspects of the criminal justice system Kappeler and Potter dissect popular images of crimes and criminals in a cogent compelling and engaging manner They trace the social construction of each issue and identify the misleading statistics and fears that form the basis of myths and the collateral damage of basing policies on mythical beliefs The authors encourage skepticism about commonly accepted beliefs offer readers a fresh perspective and urge them to analyze important issues from novel vantage points

According to many clinical psychologists when the mind is forced to endure a horrifying experience it has the ability to bury the entire memory of it so deeply within the unconscious that it can only be recalled in the form of a flashback triggered by a sight a smell or a sound Indeed therapists and lawyers have created an industry based on treating and litigating the cases of people who suddenly claim to have recovered memories of everything from child abuse to murder This book reveals that despite decades of research there is absolutely no controlled scientific support for the idea that memories of trauma are routinely banished into the unconscious and then reliably recovered years later Since it is not actually a legitimate psychological phenomenon the idea of recovered memory and the movement that has developed alongside it is thus closer to a dangerous fad or trendy witch hunt **The Lost City Of Atlantis: Myth Or Reality?** Anonymous, The Lost City of

The moment of contact between two peoples two alien societies marks the opening of an epoch and the joining of histories What if it had happened differently The stories that indigenous peoples and Europeans tell about their first encounters with one another are enormously valuable historical records but their relevance extends beyond the past Settler populations and indigenous peoples the world over are engaged in negotiations over legitimacy power and rights These struggles cannot be dissociated from written and oral accounts of contact moments which not only shape our collective sense of history but also

guide our understanding of current events For all their importance contact stories have not been systematically or critically evaluated as a genre Myth and Memory explores the narratives of indigenous and newcomer populations from New Zealand and across North America from the Lost Colony of Roanoke on the Atlantic seaboard of the United States to the Pacific Northwest and as far as Sitka Alaska It illustrates how indigenous and explorer accounts of the same meetings reflect fundamentally different systems of thought and focuses on the cultural misunderstandings embedded in these stories The contributors discuss the contemporary relevance production and performance of Aboriginal and European contact narratives and introduce new tools for interpreting the genre They argue that we are still in the contact zone striving to understand the meaning of contact and the relationship between indigenous and settler populations
