War II Carl J. Schneider,Dorothy Schneider,2014-07 Firsthand accounts and brief biographies describe how Americans were affected by the events surrounding World War II Europe on the Path to Self-Destruction Jack L. Schwartzwald,2022-07-19

Between the years 1815 and 1945 Europe achieved unrivaled global dominance only to see it shattered by two world wars This frenetic rise and fall was attended by immense societal change In 1815 Europe remained largely agricultural and dependent upon horsepower By 1945 the power of the atom had been unleashed Two industrial revolutions occurred in the interim the first founded upon coal iron and steam the second upon oil steel electricity and internal combustion The implications for humanity were profound This concise yet comprehensive study is divided into three sections In section one the map of Europe emerges in its modern visage as unrestrained nationalist fervor gives rise to an assemblage of new nation states In section two the continent attains global hegemony as massive industrialization fuels a mad scramble for colonial markets and raw materials In section three a cauldron of national ethnic and class hatreds spawn the rise of totalitarianism and the overthrow of European hegemony in two calamitous world wars By tracing the events and undercurrents of this vital period in European history this book offers trenchant insights for the lay reader and the student of history alike

Abraham Rothberg,1962 A Peripheral Weapon? David J. Childs,1999-09-30 The tank was arguably the most important technological innovation that developed during World War I however without the support of the British Army and the allocation of important wartime resources it would have remained merely a peripheral weapon For far too long the depiction of the British War Office and GHQ France as anti technological and cavalry oriented has persisted While some historians have recently challenged this view much of the traditional versus progressive school of thought in regard to the

production and employment of the tank still survives By posing the question was the tank a peripheral weapon this work reveals the vital role of the War Office in the production and employment of this stunning new weapon The War Office was behind the creation of the original Tank Committee the New or Advisory Tank Committee the Tank Directorate and the Tank Board It was these bodies particularly the Tank Board established in 1918 that facilitated the crucially important liaison between the users of tanks in France and the producers at the Ministry of Munitions Without War Office involvement in this way without its continued orders for more and better tanks and without the consistently high priority status accorded to tank production by General Haig it is inconceivable that the tank would have reached the level of technical sophistication and therefore usefulness that it had by late 1918 **Siege** Abraham Rothberg,Michael O'Keefe,Pierce Griffin Fredericks,1966

28 June Alan Sharp,2014-08-15 On June 28 1919 the Peace Treaty was signed in the Hall of Mirrors at Versailles five years to the day after the assassination of Archduke Franz Ferdinand in Sarajevo triggered Europe s precipitous descent into war This war was the first conflict to be fought on a global scale By its end in 1918 four empires had collapsed and their minority populations which had never before existed as independent entities were encouraged to seek self determination and nationhood Following on from Haus s monumental thirty two Volume series on the signatories of the Versailles peace treaty The Makers of the Modern World 28 June looks in greater depth at the smaller nations that are often ignored in general histories and in doing so seeks to understand the conflict from a global perspective asking not only how each of the signatories came to join the conflict but also giving an overview of the long term consequences of their having done so
