Eyewitness Memory:

Understanding Eyewitness Memory Sean M. Lane, Kate A. Houston, 2021-05-25 An essential overview of how perception and memory affect eyewitness testimony In 1981 sixteen year old Michael Williams was convicted on charges of aggravated rape based on the victim's eyewitness testimony No other evidence was found linking him to the attack After nearly twenty four years Williams was released after three separate DNA analyses proved his innocence The victim still maintains that Williams was the culprit This heartbreaking case is but one example of eyewitness error In *Understanding Eyewitness Memory* Sean M Lane and Kate A Houston delve into the science of eyewitness memory They examine a number of important topics from basic research on perception and memory to the implications of this research on the quality and accuracy of eyewitness evidence The volume answers questions such as How do we remember and describe people we've encountered What is the nature of false and genuine memories How do emotional arousal and stress affect what we remember *Understanding Eyewitness Memory* offers a brilliant overview of how memory and psychology affect eyewitness testimony where quality and accuracy can mean the difference between wrongful imprisonment and true justice

Applied Issues in Investigative Interviewing, Eyewitness Memory, and Credibility Assessment Barry S. Cooper, Dorothee Griesel, Marguerite Ternes, 2013-02-01 Contingent on funding being available a Festschrift will be held in honor of Dr John Yuille's career as a Forensic Psychologist. He has become one of the most visible and respected Canadian psychologists worldwide. In light of his upcoming retirement in December 2006 the Festschrift will recognize Dr Yuille's achievements in the areas of eyewitness memory research i.e. pioneering a new research paradigm that grants better validity investigative interviewing i.e. the development and use of the Step Wise Interview Protocol and credibility assessment i.e. introducing Statement Validity Analysis to North America. New directions for future work will be explored at the workshop. The focus of this Festschrift will be three fold: 1 International: Dr Yuille's work has influenced law enforcement practices and stimulated research in and outside of Canada. The international and multicultural aspects of the work that Dr Yuille has inspired will be reflected and promoted by this workshop. 2 Interdisciplinary: Dr Yuille is internationally known as an expert consultant and trainer to law enforcement. As such Dr Yuille's work has also influenced other disciplines e.g. the law, social work, oral history. The participants of this Festschrift will gain insight into other professionals' perspectives and foster potential collaborations on future projects. 3 Emphasis on applied research: A hallmark of Dr Yuille's research has been the application of field and archival methods which made his work directly applicable to forensically relevant contexts. The potential future directions of applied forensic research will be discussed at this Festschrift. The importance of the subject at this time: A lack of integrative models in the literatures of eyewitness memory and the assessment of truthfulness and deception. Presenters of the Festschrift have recently developed such models and will discuss them at the Festschrift. Publishing these models and their discussions will spark further research to validate or modify them. New pioneering field research based on such integrative models has recently been conducted. This book would be one of the first publications of the results. **Memory** Alan Baddeley, Michael W. Eysenck, Michael C.
