Dyker, 2004 In this collection of essays David A Dyker explores some of the most difficult and fascinating aspects of the process of transition from autocratic real socialism to a capitalism that is sometimes democratic sometimes authoritarian The stress is on the economic dimension of transformation but the author sets the economic drama firmly within a political economy framework and a historical perspective Trends in key economic variables are analysed against the background of the struggle between different social and political groups for power and

command over resources While the book pays due attention to topical issues like EU enlargement the underlying perspective is a long term one Transition is viewed not as a set of once and for all institutional changes or a process of short term stabilisation but as a historic opportunity to solve the inherited problem of poverty and underdevelopment in Central East Europe and the former Soviet Union The book ends with a critical assessment of how economics as a discipline has coped with the challenge of that historic opportunity Profiles of American Colleges ,1996 This brand new edition of Barron s world famous college directory is in fact three information sources in one The main section presents up to date profiles of more than 1 650 accredited four year colleges a special section features an Index of College Majors and two computer disks one which operates on Windows the other on Macintosh help students prepare college application forms and letters and offer capsule profiles of all schools listed in the book *Bibliographic Guide to Business and Economics* New York Public Library.
