Faba Bean In The Nile Valley Report:

Faba Bean in the Nile Valley M.C. Saxena,R.A. Stewart,1983-04-30 **Faba Bean In the Nile Valley : Report on the First Phase of the ICARDA** Saxena Mohan,1983 Faba Bean Improvement G. Hawtin,Colin Webb,2012-12-06 Faba beans formerly known as broad beans are among the oldest crops in the world It has in fact been claimed with some justification that the Pyramids were built on faba beans They are today a major crop in many countries such as China Egypt and the Sudan and are widely grown for human food throughout the Mediterranean region in Ethiopia and in parts of Latin America In recent years there has been a growing interest in faba bean production as a protein source for stock feed in parts of Europe North America and Australia The publication served by this preface arose from the first International Faba Bean Conference held in Cairo Egypt on March 7 11 1981 which provided a suitable forum for the review of many scientifically important aspects of the improvement of the crop Leading faba bean specialists from four continents who participated were able not only to contribute from their personal expertise in relevant subjects but in return to gain from their experience of Nile Valley conditions and from close contact with so many of the world's faba bean scientists The conference was supported in the main by the ICARDA/IFAD Nile Valley Faba Bean Project Additional support was received from a number of other organisations and institutions whose help is gladly acknowledged These included the Agricultural Research Council ARC of the Egyptian Ministry of Agriculture G T Z of Germany IDRC of Canada the National Research Center of Egypt and Cairo University **Faba Bean in the Nile Valley** Mohan C. Saxena,1983-01-01 In 1977 the Consultative Group on International Agricultural Research CGIAR established the International Center for Agricultural Research in the Dry Areas ICARDA with the aim of focussing on the problems confronting crop and animal production in the Near East and North Africa with special emphasis on rainfed agriculture The main base of ICARDA's activities is at its principal research station near Aleppo in northern Syria From here a wide range of research activities have been developed throughout the region served in close collaboration with the national programs This report concerns the activities of one such collaborative research project covering Egypt and the Sudan the ICARDA IFAD Nile Valley Project on Faba Beans It is by far the largest of ICARDA's collaborative projects and also the most successful Faba Beans are an important food crop in many countries of the region and as such are a main focus of ICARDA's food legume program together with lentils and chickpeas However Aleppo does not provide a suitable environment in which to conduct research of relevance to the irrigated agriculture of Egypt and northern Sudan two countries in which faba beans are immensely important in the diets particularly of the poorer sector in both countries **The Role of Legumes in the Farming Systems of the Mediterranean Areas** A.E. Osman,M.M. Ibrahim,M.A. Jones,1990-01-31 Legumes are an important source of protein for humans and animals They provide nutritionally rich crop residues for animal feed and play a key role in maintaining the productivity of soils particularly through biological nitrogen fixation They are therefore of immense value in rainfed farming systems The International Center for

Agricultural Research in the Dry Areas ICARDA has a responsibility for research on food pasture and forage legumes The Center also has the broad objective of improving livestock production in rainfed farming systems Although food legumes have been known and grown by farmers in the WANA region for a long time their productivity has remained low and variable Forage legumes on the other hand are not so well known by farmers of the region and their role in the farming systems is not so well understood Thus we need to develop the concept of using forage legumes as crops and to fit them into cropping systems In its efforts to increase the productivity of food legumes and develop the legume based crop livestock systems ICARDA has established a network of scientists in the different National Agricultural Research Systems in the region To further strengthen this network ICARDA convened a workshop on The Role of Legumes in the Farming Systems of Mediterranean Areas in Tunis Tunisia 20-24 June 1988 This workshop was co sponsored by UNDP who also contributed funds for this publication **Faba Beans, Kabuli Chickpeas, and Lentils in the 1980s** Mohan C. Report International Center for Agricultural Research in the Dry Areas, 2002 **World crops: Cool season food legumes** R.J. Summerfield, 2012-12-06 The genesis of the International Food Legume Research Conference IFLRC can be traced back to 1983 and so this Volume the Proceedings of that Conference has had a gestation period of close to five years Professor Norman Simmonds the perennial Book Review Editor of *Experimental Agriculture* has expressed the opinion vol 22 p 201 1986 that Many symposia volumes are just plain awful Elsewhere *Nature* vol 312 pp 201-2 1984 Anthony Watkinson then a

Commissioning Editor at Oxford University Press has described several reasons which have led him to believe that Conference proceedings symposia are generally disliked To put it mildly this type of publication has a bad name The problems from an author s perspective of contributing to any many authored publication are aired in an exchange of correspondence in *Biologist* vol 30 pp 123 and 180 1983 and vol 31 pp 3 and 69 1984 And from the editor s viewpoint D J Weatherall then Nuffield Professor of Clinical Medicine at the University of Oxford has described *Nature* vol 317 p

Muehlbauer,W.J. Kaiser,2012-12-06 The goal of the Second International Food Legume Research Conference held in Cairo Egypt was to build on the success of the first conference held nearly 6 years earlier at Spokane Washington USA It was at that first conference where the decision was made to hold the second Conference in Egypt and so near the ancestral home of these food legume crops It has been a long held view that the cool season food legumes had their origin in the Mediterranean basin and the Near east arc and there is little doubt that food legumes were a staple food of the ancient Egyptian civilization The cool season food legumes have the reputation for producing at least some yield under adverse conditions of poor fertility and limited moisture i e in circumstances where other crops are likely to fail completely Yields of cool season food legumes are particularly poor in those regions where they are most important to local populations The influx of more profitable crops such as wheat maize and soybeans have gradually relegated the food legumes to marginal areas with poor fertility and limited water which exposes them to even greater degrees of stress In the past two decades production of food legumes has declined in most of the developing countries while at the same time it has expanded greatly in Canada Australia and most notably in Turkey *Annual Report for ...
