Nelson, 1968 **The Economics of Managing Crop Diversity On-farm** Edilegnaw Wale, 2012-06-25 The purpose of this book is to assess a variety of economic issues as they relate to agro biodiversity and show how addressing these issues can assist in agro biodiversity policy making This is illustrated using empirical data from some of the countries Ethiopia Nepal and Zambia which are part of the Genetic Resources Policy Initiative The empirical chapters apply the relevant economic methods including regression analysis choice experiments hedonic pricing contingent valuation and farm business income analysis The authors discuss the economics of managing crop diversity on farm in the context of crop variety attribute preferences farmers perception of agro biodiversity loss and value addition and marketing of the products of traditional crop varieties The case studies include detailed analysis of traditional varieties of groundnut maize rice sorghum and teff The results are relevant not only to GRPI countries but also to other countries concerned with the sustainable utilization of these resources Overall the studies illustrate how genetic resources issues can be integrated into rural development interventions

Sociology, Organic Farming, Climate Change and Soil Science Eric Lichtfouse, 2009-12-01 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children Sustainable agriculture is a discipline that addresses current issues such as climate change increasing food and fuel prices poor nation starvation rich nation obesity water pollution soil erosion fertility loss pest control and biodiversity depletion Novel environmentally friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy soil science molecular biology chemistry toxicology ecology economy and social sciences Indeed sustainable agriculture decipher mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries For that scientists use the system approach that involves studying components and interactions of a whole system to address scientific economic and social issues In that respect sustainable agriculture is not a classical narrow science Instead of solving problems using the classical painkiller approach that treats only negative impacts sustainable agriculture treats problem sources Because most actual society issues are now intertwined global and fast developing sustainable agriculture will bring solutions to build a safer world This book series gathers review articles that analyze current agricultural issues and knowledge then propose alternative solutions It will therefore help all scientists decision makers professors farmers and politicians who wish to build a safe agriculture energy and food system for future generations **LIVESTOCK AND AGRICULTURAL DEVELOPMENT** Dr. Bhagwat Bhaurao Gadekar, 2021-02-20

Introduction The poorest of the world's poor people comprise hundreds of millions of families existing on less than 2 per day 1 Approximately 50 percent of these families own livestock and some parts of the world will remain reliant for at least some more human generation on adapted genetic livestock resources that can cope with low input high stress production system to

provide food fibre and hides for home use and local sales serve as a source of traction and fuel meet cultural and religious needs and provide a reliable and readily convertible means of managing family resources Low literacy rates and very real risks of hunger are common problems Consequently programmes and policies have to be adjusted to their needs Older Americans in Rural Areas United States. Bygone Utopias and Farm Protest in the Rural Midwest Daniel Jaster,2021-04-09 This book explores those who long for bygone utopias times before rapid culturally destructive social change stripped individuals of their perceived agency The case of the wave of foreclosure protests that swept through the rural American Midwest during the 1930s illustrates these themes These actions embodied a utopian understanding of agrarian society that had largely disappeared by the late 19th century hundreds to thousands of people fixed public auctions of foreclosed farms returning owners property and giving them a second chance to save their farm Comparisons to later movements including the National Farmers Organization and the protests surrounding the 1980s Farm Crisis highlight the importance of culturally catastrophic social change occurring at a breakneck pace in fomenting these types of bygone utopian actions These activists and movements should cause scholars to re think what it means to be conservative and how we view conservatism helping us better understand why we re seeing a contemporary resurgence in nationalist and reactionary movements across the globe *Family Economics Review* ,1960
