**The Agrarian Seeds of Empire** Brad Bauerly, 2016-09-07 The Agrarian Seeds of Empire outlines the influence of agrarian movements on the process of US institutional capacity building between 1840-1980. Out of the mix of the developing new Nation and the expanding capitalist system emerged strong farmer's movements that produced state building processes central to American political development. It will show how the forces of state building and social movements converged to produce agro industrialization. This agro industrial developmental project was instrumental in both the development of the industrial food system and US Empire as the institutional capacities were later used to impose the same project outside of the US. These findings link together and augment existing approaches to capitalist development, International Relations and theories of the state and the food system.

**The Farmer's Political Economy** Frank Jarris Bivins, 1975 The Political Economy of the Family Farm Sue Headlee, 1991-11-30 Agriculture played an important role in the transition to capitalism in the United States in the mid nineteenth century. In her study Sue Headlee argues that the family farm system with its progressive nature and egalitarian class structure revolutionized this transition to capitalism. The family farm is examined in light of its economic and political implications showing the relationship between the family farm and fledgling industrial capitalism, a relationship that fostered the simultaneous industrial and agricultural revolutions and the creation of an agro industrial complex. Headlee focuses on the adoption of the horse drawn mechanical reaper to harvest wheat by family farmers in the 1850s. The neoclassical economic explanation with its emphasis on the farm as a profit maximizing firm is criticized for its lack of recognition of the role of the family farm's egalitarian class structure. This look at the economic history of the United States has lessons for the Third World today; agricultural development is vital to the transition to capitalism; the agrarian class structures of Third World countries may be holding back that transition; and a family farm land reform approach would lead to increases in productivity and in the material well being of society. Headlee's analysis supports three important debates in political economy thus providing the historical and theoretical context for understanding the role of agriculture in the transition to capitalism in general and in the particular case of the United States. Her findings conclude that agrarian class structures can explain the differential patterns of development in pre industrial Europe. Further evidence is presented that the internal class structure of agrarian society is the crucial causal factor in the transition to capitalism and that market developments alone are not sufficient. Lastly and most controversially Headlee acknowledges the importance of the Civil War in propelling the triumph of American capitalism, allowing the Republican Party an alliance of family farmers and industrial capitalists to take control of the state from the Democratic Party of the southern plantation owners. This book will be of interest to scholars in political economy, economic history, agrarian economics and development economics.

Roots of Reform Elizabeth Sanders, 1999-08 Offering a revision of the understanding of the rise of the American regulatory state in the late 19th century, this book argues that politically mobilised farmers were the driving force behind

most of the legislation that increased national control      *The Political Economy of the Agri-Food System in Thailand* Prapimphan Chiengkul, 2017-05-08 This book adopts a neo Marxist and Gramscian approach to studying the political economy of the agricultural and food system in Thailand 1990 2014 The author argues that hegemonic forces have many measures to co opt dissent into hegemonic structures and that counter hegemony should be seen as an ongoing process over a long period of time where predominantly counter hegemonic forces constrained by political economic structural conditions may at times retain some hegemonic elements Contrary to what some academic studies suggest the author argues that localist inspired social movements in Thailand are not insular and anti globalisation      **American Agriculture and the Problem of Monopoly** Jon Lauck, 2016-02-01 The breathtaking number of mergers and joint ventures among agribusiness firms has left independent American farmers facing the power of an increasingly concentrated buying sector The origin of farmers concern with such economic concentration dates back to protests against meatpackers and railroads in the late nineteenth century Jon Lauck examines the dimensions of this problem in the American Midwest in the decades following World War II He analyzes the nature of competition within meat packing and grain markets In addition he addresses concerns about corporate entry into production agriculture and the potential displacement of a production system defined by independent family farms Lauck also considers the ability of farmers to organize in order to counter the market power of large scale agribusiness buyers He explores the use of farmer cooperatives and other mechanisms which may increase the bargaining power of farmers The book offers the first serious historical examination of the National Farmers Organization which fully embraced the bargaining power cause in the postwar period Lauck finds that independent farmers attempts at organization have been more successful than previously recognized but he also shows that their successes have been undermined by the growing concentration and power of agri business firms justifying a new approach to antitrust law in agricultural markets      *A Political Economy of Forest Resource Use* Niaz Ahmed Khan, 2018-08-16 Published in 1998 An International monograph publishing series covering new research into the green issues such as government corporate and public responses to environmental hazards the economics of green policies and the effectiveness of environmental protection programmes      **The Farmers in Politics** William Irvine, 1978-01-15 First published in 1920 this book endures as a lucid statement of a class and ideological approach to Canadian politics which with wit and passion seeks to demolish the great Canadian myths of classlessness and pragmatism      **The Political Economy of Agricultural and Food Policies** Johan Swinnen, 2018-05-24 Winner of the European Association of Agricultural Economists Book Award Food and agriculture have been subject to heavy handed government interventions throughout much of history and across the globe both in developing and in developed countries Today more than half a trillion US dollars are spent by some governments to support farmers while other governments impose regulations and taxes that hurt farmers Some policies such as price regulations and tariffs distribute income but reduce total welfare by introducing economic distortions Other policies such as public investments in

research food standards or land reforms may increase total welfare but these policies come also with distributional effects These distributional effects influence the preferences of interest groups and in turn influence policy decisions Political considerations are therefore crucial to understand how agricultural and food policies are determined to identify the constraints within which welfare enhancing reforms are possible or not and finally to understand how coalitions can be created to stimulate growth and reduce poverty

**Small Farmers, Slavery, and the Political Economy of Kentucky's Green River, 1790-1850**

Christopher P. Petzold, 2010 This study focuses on the expansion of the Green River's economic and political importance within Kentucky and how it impacted small farmers of the region It challenges the idea that small farmers played an insignificant role in the agriculture and industry of the antebellum South Qualitative data including journals and letters are used to understand small farmers' reactions to market expansion Quantitative data including agricultural and population censuses are used to determine small farmers' participation in the economy Small farmers actively participated in commercial exchanges of crops and livestock and encouraged the growth of a transportation infrastructure to market their goods Economic development within the region revolutionized activity within the political arena As the economic infrastructure matured small farmers elected politicians who sought to expand commerce and safeguard markets

**The Political Economy of Agricultural Policy Reform in India** Regina Birner, Surupa Gupta, Neeru Sharma, 2011 Agricultural policy reform is one of the major challenges facing India today Such reform is required to reduce poverty through faster agricultural growth and to promote more sustainable use of natural resources while ensuring food security Subsidy policies that promote the use of fertilizer and of electricity for groundwater irrigation are in particular need of reform While subsidies for these two inputs played a crucial role in achieving India's Green Revolution they have been criticized during the past decade for benefitting large scale farmers more than smallholders placing a fiscal burden on the state and having negative environmental effects By analyzing the evolution of these input subsidy policies and examining the political processes involved in efforts to reform them this study throws new light on the factors that have so far prevented a move toward more pro poor and environmentally sustainable agricultural input policies in India The authors show that electoral politics institutional factors and policy paradigms or belief systems all play an important role in blocking reform They identify several policy reform options as well as political strategies that can overcome past obstacles to reform Community based policy solutions new coalitions for policy reform fresh approaches to the policy debate innovative and consensus oriented forms of deliberation and effective use of research based knowledge can all make positive contributions to Indian policy reform The analyses and proposals presented in this study will be a valuable resource for policymakers and stakeholders concerned with the politics of agricultural development

Political Economy of the Spanish Miracle Diego Ayala, 2023-12-05 In the 1950s and 1960s Spain underwent one of the most rapid processes of economic development the world had ever seen Most existing analyses of this process explain the Spanish Miracle as a

product of the unleashing of market forces and of changes in economic policy made by the Franco regime in the 1950s

**Political Economy of the Spanish Miracle** provides an alternative explanation of Spanish economic development analyzing the Miracle from an interdisciplinary political economy perspective that treats capitalist growth as a complex and dynamic interaction between capitalists workers and the state The Spanish Miracle is linked to changes in Spanish society produced by the Spanish Civil War to the class structure of the regime brought to power by that Civil War and to the interaction between domestic social struggles under the Franco regime and Spain s insertion into the international political economy of the Cold War capitalist world Ambitious in scope **Political Economy of the Spanish Miracle** both revises conventional understandings of Spanish economic growth and situates Spain within comparative discussions of development in the twentieth century This book will be of great interest to readers in political economy economic sociology historical sociology and Spanish and European history more broadly

*The Political Economy of Grand Strategy* Kevin Narizny,2007 A nation s grand strategy rarely serves the best interests of all its citizens Instead every strategic choice benefits some domestic groups at the expense of others When groups with different interests separate into opposing coalitions societal debates over foreign policy become polarized along party lines Parties then select leaders who share the priorities of their principal electoral and financial backers As a result the overarching goals and guiding principles of grand strategy as formulated at the highest levels of government derive from domestic coalitional interests In *The Political Economy of Grand Strategy* Kevin Narizny develops these insights into a comprehensive theoretical framework for understanding the dynamics of security policy The focus of this analysis is the puzzle of partisanship The conventional view of grand strategy in which state leaders act as neutral arbiters of the national interest cannot explain why political turnover in the executive office often leads to dramatic shifts in state behavior Narizny in contrast shows how domestic politics structured foreign policymaking in the United States and Great Britain from 1865 to 1941 In so doing he sheds light on long standing debates over the revival of British imperialism the rise of American expansionism the creation of the League

of Nations American isolationism in the interwar period British appeasement in the 1930s and both countries decisions to enter World War I and World War II

**New Farmers' Movements in India** Tom Brass, 1995 The essays in this collection focus on the reasons for and background to the emergence during the 1980s of the new farmers movements in India In addition to a more general consideration of the economic political and theoretical dimensions of this development there are case studies which cover the farmer s movements in Maharashtra Uttar Pradesh Punjab and Karnataka

**Rescaling International Political Economy** Darel E. Paul, 2024-11-01 A major trend in recent years in political and economic geography has been the increasingly sophisticated use of the concept of scale Rescaling International Political Economy sits squarely in geographical debates regarding scale and globalization but Darel Paul does it within the framework of international political economy In particular he argues for

the importance of subnational states and localities in creating globalization and focuses on regions in North America  
Alongside his arguments about scalar transformations Paul looks at how the processes serve transnational capital and how they work to construct the transnational capitalist class which currently rules the globe His regulationist approach which stresses how the centrality of state institutions in managing the global economy will revolutionize how we think about globalization
