Haydn Washington,2019-10-01 The culmination of over three decades of writing by environmental scientist and writer Haydn Washington this book examines the global environmental crisis and its solutions Many of us know that something is wrong with our world that it is wounded At the same time we often don't know why things have gone wrong or what can be done Framing the discussion around three central predicaments the ecological the social and the economic Washington provides background as to why each of these are in crisis and presents steps that individuals can personally take to heal the world Urging the reader to accept the reality of our problems he explores practical solutions for change such as the transition to renewable energy rejection of climate denial and the championing of appropriate technology as well as a readjustment in ethical approaches The book also contains 19 solution boxes by distinguished environmental scholars With a focus on positive personal solutions this book is an essential read for students and scholars of environmental science and environmental philosophy and for all those keen to heal the world and contribute towards a sustainable future

Recarbonizing global soils - A technical manual of recommended management practices Food and Agriculture Organization of the United Nations,Intergovernmental Technical Panel on Soils,2021-09-08 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was

proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals, in particular Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss, with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments, including the advantages, drawbacks, and constraints. This manual presents different sustainable soil management (SSM) practices at different scales and in different contexts, supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications. Volume 4 includes 51 case studies dealing with cropland, grassland, integrated systems, and farming approaches.

The School Garden Curriculum Kaci Rae Christopher, 2019-04-23
 Sow the seeds of science and wonder and inspire the next generation of Earth stewards. The School Garden Curriculum offers a unique and comprehensive framework enabling students to grow their knowledge throughout the school year and build on it from kindergarten to eighth grade. From seasonal garden activities to inquiry projects and science skill building, children will develop organic gardening solutions, a positive land ethic, systems thinking, and instincts for ecological stewardship. The world needs young people to grow into strong scientifically literate environmental stewards. Learning gardens are great places to build this knowledge, yet until now there has been a lack of a multi-grade curriculum for school-wide teaching aimed at fostering a connection with the Earth. The book offers a complete K-8 school-wide framework. Over 200 engaging weekly lesson plans ready to share. Place-based activities, immersive learning, and hands-on activities. Integration of science, critical thinking, permaculture, and life skills. Links to Next Generation Science Standards. Further resources and information sources. A model and guide for all educators. The School Garden Curriculum is the complete package for any school wishing to use ecosystem perspectives, science, and permaculture to connect children to positive land ethics, personal responsibility, and wonder while building vital lifelong skills. AWARDS FINALIST 2019 Foreword INDIES Education.

Taking Food Public Psyche Williams Forson, Carole Counihan, 2013-09-13
 The field of food studies has been growing rapidly over the last thirty years and has exploded since the turn of the millennium. Scholars from an array of disciplines have trained fresh theoretical and methodological approaches onto new dimensions of the human relationship to food. This anthology capitalizes on this particular cultural moment to bring to the fore recent scholarship that focuses on innovative ways people are recasting food in public spaces to challenge hegemonic practices and meanings. Organized into five interrelated sections on food production, consumption, performance, diasporas, and activism, articles aim to provide new perspectives on the changing meanings and uses of food in the twenty-first century.
