Fascination For Fish Adventures Of An Underwater Pioneer:

A Fascination for Fish David C. Powell, 2003-04-24 This autobiography is a charming and accurate telling by a modest man whose brilliant career has allowed millions to venture into the sea and feel what Dave feels when he is underwater without getting wet John E McCosker Director Emeritus Steinhart Aquarium San Francisco Dave Powell is one of the giants in the development of the modern public aquarium His great talents and skill have come from years of working with the technology of public aquariums and also from a great love of the sea This book is a wonderful tale of his adventures and misadventures as he worked to capture the essence of the ocean and bring it to public view Bruce Carlson Director Waikiki Aquarium Honolulu Gobies jellyfish coelacanth white sharks it is all here A delightfully written book detailing the experiences of the most innovative aquarist of our time This book is a must read for anyone fascinated by looking through an aquarium viewing window Jerry Goldsmith Vice President SeaWorld of California

A Fascination for Fish, 2001 This engaging memoir presents one man's lifelong love of the ocean and gives a highly personal behind the scenes look at California's magnificent and innovative aquariums David Powell for many years curator of the world renowned Monterey Bay Aquarium tells the story of his life as a pioneering aquarist

The Ocean Sunfishes Tierney M. Thys, Graeme C. Hays, Jonathan D. R. Houghton, 2020-12-10 The Ocean Sunfishes Evolution Biology and Conservation is the first book to gather into one comprehensive volume our fundamental knowledge of the world record holding charismatic ocean behemoths in the family Molidae From evolution and phylogeny to biotoxins biomechanics parasites husbandry and popular culture it outlines recent and future research from leading sunfish experts worldwide This synthesis includes diet foraging behavior migration and fisheries bycatch and overhauls long standing and outdated perceptions This book provides the essential go to resource for both lay and academic audiences alike and anyone interested in exploring one of the ocean's most elusive and captivating group of fishes

Shaping the Shoreline Connie Y. Chiang, 2009-11-17 The Monterey coast home to an acclaimed aquarium and the setting for John Steinbeck's classic novel Cannery Row was also the stage for a historical junction of industry and tourism Shaping the Shoreline looks at the ways in which Monterey has formed and been formed by the tension between labor and leisure Connie Y Chiang examines Monterey's development from a seaside resort into a working class fishing town and finally into a tourist attraction again Through the subjects of work recreation and environment the intersections of which are applicable to communities across the United States and abroad she documents the struggles and contests over this magnificent coastal region By tracing Monterey's shift from what was once the literal Cannery Row to an iconic hub that now houses an aquarium in which nature is replicated to attract tourists the interactions of people with nature continues to change Drawing on histories of immigration unionization and the impact of national and international events Chiang explores the reciprocal relationship between social and environmental change By integrating topics such as race ethnicity and class into environmental history Chiang illustrates the idea that work and play are not mutually exclusive

Monterey Bay Lindsay Hatton,2017-07-04 A beautiful debut set around the creation of the world famous Monterey Bay Aquarium and the last days of John Steinbeck's Cannery Row In 1940 fifteen year old Margot Fiske arrives on the shores of Monterey Bay with her eccentric entrepreneur father Margot has been her father's apprentice all over the world until an accident in Monterey's tide pools drives them apart and plunges her head first into the mayhem of John Steinbeck's Cannery Row Steinbeck is hiding out from his burgeoning fame at the raucous lab of Ed Ricketts the biologist known as Doc in Cannery Row Ricketts a charismatic bohemian quickly becomes the object of Margot's fascination Despite Steinbeck's protests and her father's misgivings she wrangles a job as Ricketts's sketch artist and begins drawing the strange and wonderful sea creatures he pulls from the waters of the bay Unbeknownst to Margot her father is also working with Ricketts He is soliciting the biologist's advice on his most ambitious and controversial project to date the transformation of the Row's largest cannery into an aquarium When Margot begins an affair with Ricketts she sets in motion a chain of events that will affect not just the two of them but the future of Monterey as well Alternating between past and present *Monterey Bay* explores histories both imagined and actual to create an unforgettable portrait of an exceptional woman a world famous aquarium and the beloved town they both call home **Exploration and Science** Michael Sean Reidy,Gary Kroll,Erik M. Conway,2006-12-27 This comprehensive volume explores the intricate mutually dependent relationship between science and exploration how each has repeatedly built on the discoveries of the other and in the process opened new frontiers A simple question Which came first advances in navigation or successful voyages of discovery A complicated answer Both and neither For more than four centuries scientists and explorers have worked together sometimes intentionally and sometimes not in an ongoing symbiotic partnership When early explorers brought back exotic flora and fauna from newly discovered lands scientists were able to challenge ancient authorities for the first time As a result scientists not only invented new navigational tools to encourage exploration but also created a new approach to studying nature in which observations were more important than reason and authority The story of the relationship between science and exploration analyzed here for the first time is nothing less than the history of modern science and the expanding human universe **Theorizing Animals** Nik Taylor,Tania Signal,2011-04-21 Utilising ideas from post modernism and post humanism this book challenges current ways of thinking about animals and their relationships with humans Including contributions from across the social sciences the book encourages readers to reflect upon taken for granted ways of conceptualising human relationships with animals It

will be of interest to those in the broad field of human animal studies as well as those within most social science and humanities disciplines including sociology anthropology philosophy and social theory **The Golden Shore** David Helvarg, 2016-09-01 From the first human settlements to the latest marine explorations The Golden Shore tells the tale of the history culture and changing nature of California's coasts and ocean David Helvarg takes the reader on both a geographic and literary journey along the state's 1,100 mile Pacific coastline from the Oregon border to the San Diego/Tijuana international border fence and out into its whale seal and shark rich offshore seamounts rock isles and kelp forests Part history part travelogue part love letter The Golden Shore captures the spirit of the California coast and its mythic place in American culture Molecules of Nature Paul F. Torrence, 2017-12-13 Molecules of nature are created by living organisms in their quest to survive and thrive in Earth's challenging environments This age-old evolutionary struggle has produced an immense library of chemicals from which humans have selected invaluable therapeutics critical to modern medicine Natural products presently provide half of all prescription medications and 70% of all cancer drugs The success of continued drug development from natural products depends upon the diversity of molecules of nature which in turn depends upon biodiversity Unfortunately human-caused damage to the environment from pollution to habitat loss to overexploitation of resources is causing unprecedented ecological damage and death of species a mass extinction event Unless this biotic crisis is obviated humanity will lose a primary source of future novel medicines This book assembles a powerful argument for nature's critical role in providing medicines for humanity and how that irreplaceable service is threatened by the extinction crisis A sampling of the molecules of nature employed in modern medicine reads like a catalog of biodiversity For example one of the most prescribed drugs in the United States is lisinopril which controls high blood pressure Lisinopril originated from the venom of a deadly viper from the Amazonian forests A denizen of US southwestern deserts provided a therapeutic for type II diabetes The ancient horseshoe crab of the US Atlantic coast enables a critical test for deadly endotoxins in medical products of all kinds Once a diagnosis of acute lymphocytic leukemia in children was a death sentence A tropical flower from Madagascar provided two natural products that changed a 90% fatality rate to a 90% cure rate The Pacific Yew tree from the US northwest was discovered to contain the potent anticancer agent Taxol now vital in the treatment of breast and ovarian cancers and Kaposi's sarcoma This book tells the fascinating story of these and other medicines It also summarizes some of the driving forces of the Sixth Mass Extinction and shows how it threatens at least half of the planet's species with extinction We rightly ask What will be the future of medicine without the contribution of millions of species How many treatments for disease will be forever lost What cures are we asking future generations to forgo As we willy nilly extinguish the future of one organism after another together with all the knowledge they hold we are like the looters of the Great Library of Alexandria The final chapter challenges readers to pursue a different outcome By uniting our efforts we can still preserve many of the remaining species on our blue-green planet and the invaluable gifts they offer **Great White**

Sharks of Australia Ryan Stokes,2018-11-28 Have you ever wondered where white sharks go What do they eat Why do they attack About their design and how they behave Well look no further than this book Distilled findings from the most current scientific literature this book will give you your answers Supplemented with over 100 illustrations photos and diagrams The Great White Sharks of Australia is the all round guide to white sharks providing a comprehensive and up to date map of where white sharks abound in Australian waters as well as exploring topics such as diet biology history and behaviour as well as fascinating anecdotes

A Cultural History of the Sea in the Global Age Franziska Torma,2023-02-09 In 1972 an image became an icon Blue Marble a photograph of the Earth as seen from outer space The picture features prominently the globe's water covered surface The ocean connects nature and culture in the modern world Within the time span of 100 years the sea changed its cultural meaning from a dangerous place to an endangered environment This volume traces diverse processes of oceanic transformation in the Anthropocene it follows scientists seafarers diplomats and filmmakers from ship decks to the arenas of political decision making on land The essays lead from underwater dumping grounds to islands in the south pacific Tiny organisms like plankton and charismatic megafauna like whales accompanied the human voyages The presence of the animals challenges common notions of human culture The global age has to take non human agents into account to fully understand the cultural history of the seas

American Scientist ,2003 *Global Perspectives on the Biology and Life History of the White Shark* Michael L. Domeier,2012-02-03 Inspired by the International White Shark Symposium in 2010 *Global Perspectives on the Biology and Life History of the White Shark* incorporates the most important contemporary research findings into a single peer reviewed book This beautifully illustrated reference represents a historic change in the context of White Shark *Carcharodon carcharias* research Once considered one of the most poorly understood and difficult sharks to study this timely book recognizes a new sophisticated focus on the White Shark raising its status from obscurity to enlightenment The *Global Perspectives on the Biology and Life History of the White Shark* celebrates the White Shark as the most studied shark in the sea Within the chapters one can find new insights into a vast range of topics such as behavior physiology migration patterns habitat preferences daily activity patterns molecular genetics reproductive biology and new research methods The book also delves into population monitoring and policy options for managers and researchers
