Smith,2016-04-15 The single most influential culinary trend of our time is fast food It has spawned an industry that has changed eating the most fundamental of human activities From the first flipping of burgers in tiny shacks in the western United States to the forging of neon signs that spell out Pizza Hut in Cyrillic or Arabic scripts the fast food industry has exploded into dominance becoming one of the leading examples of global corporate success And with this success it has become one of the largest targets of political criticism blamed for widespread obesity cultural erasure oppressive labor practices and environmental destruction on massive scales In this book expert culinary historian Andrew F Smith explores why the fast food industry has been so successful and examines the myriad ethical lines it has crossed to become so As he shows fast food plain and simple devised a perfect retail model one that works everywhere providing highly flavored calories with speed economy and convenience But there is no such thing as a free lunch they say and the costs with fast food have been enormous an assault on proper nutrition a minimum wage labor standard and a powerful pressure on farmers and ranchers to deploy some of the worst agricultural practices in history As Smith shows we have long known about these problems and the fast food industry for nearly all of its existence has been beset with scathing expos s boycotts protests and government interventions which it has sometimes met with real changes but more often with token gestures blame passing and an unrelenting gauntlet of lawyers and lobbyists Fast Food ultimately looks at food as a business an examination of the industry s options and those of consumers and a serious inquiry into what society can do to ameliorate the problems this cheap and tasty product has created **Colours of the Soul** June McLeod,2012-09-21 Colors are all around us but also within us We not only have our favorite colour our auras have their own color Our chakras have their different colors Tuning in to our colors rebalances our selves with nature and
