Farewell Promised Land Waking From The California Dream:

Farewell, Promised Land Robert Dawson, Gray A. Brechin, 1999-01-01 Don't mistake the message of this sad and powerful book. After 150 years of pillage and pollution it is time to fight like hell for California. Mike Davis, author of *City of Quartz*. A heart-rendingly splendid book for all who love California. It combines stunning photographic documentation of the trashing of the state with an eloquent melancholy text that still offers guarded hopes for a green future. Ernest Callenbach, author of *Ecotopia*.

Farewell, Promised Land Robert Dawson, Gray Brechin, 2023-12-22 Historical accounts of California tell of flocks of birds so dense in the sky that they cast a shadow on the ground and of thunderous rivers of geese, ducks and swans moving down the state to the lagoons of Mexico and beyond. Today citizens and travelers in California take for granted skies empty of almost everything but the contrails of airplanes. But far more than wildlife is missing from California today. In text and photographs *Farewell Promised Land* documents the stark contrast between the California landscape of this past and what it has become as it traces the evolution of the California environment and looks ahead to what the future holds. When writer Gray Brechin and photographer Robert Dawson received the 1992 Dorothea Lange-Paul Taylor Prize from Duke University's Center for Documentary Studies, they began a five-year project of driving and flying around California to record the present state of its environment. This book is the result of that collaboration. In six thematic chapters dealing with Loss, Mining, Farming, Cities, Energy and Health, the authors provide a sobering look at California's environment. A concluding chapter introduces individuals and organizations now attempting to redeem the state from its present course. *Farewell Promised Land* is a superb vehicle for communicating the causes, context and seriousness of environmental and social disruptions in California. It is unique in that it successfully documents topics such as energy, health and cities and brings this information directly to bear on environmental issues. Appealing to the intellect as well as to our sense of aesthetics, Brechin and Dawson provide a timely wake-up call in this brave, honest and straightforward assessment of California's fate. Historical accounts of California tell of flocks of birds so dense in the sky that they cast a shadow on the ground and of thunderous rivers of geese, ducks and swans moving down the state to the lagoons of Mexico and beyond. Today citizens and travelers

Water and the California Dream David Carle, 2016-05-01 In the last one hundred years, imported water has transformed the environment of the Golden State and its quality of life with land ownership patterns and real estate boosterism dramatically altering both urban and rural communities. The key to this transformation has been expanded access to water from the Eastern Sierra, the Colorado River and Northern California rivers. Whoever brings the water brings the people, wrote engineer William Mulholland, under whose leadership the process of growth through irrigation began. Now using first-person voices of Californians to reveal the resulting changes, author David Carle concludes that it may be time to stop drowning the California dream of the good life with imported water. Using oral histories, contemporary newspaper articles and autobiographies, Carle explores the historic changes in California, showing how imported water has shaped the pattern of

population growth in the state Because water choices remain the primary tool for shaping California's future Carle also argues that it is possible to improve both the state's damaged environment and the quality of life if Californians will step out of this historic pattern and embrace limited water supplies as a fact of life in this naturally dry region

A Companion to California History William Deverell, David Igler, 2014-01-28 This volume of original essays by leading scholars is an innovative thorough introduction to the history and culture of California Includes 30 essays by leading scholars in the field Essays range widely across perspectives including political social economic and environmental history Essays with similar approaches are paired and grouped to work as individual pieces and as companions to each other throughout the text Produced in association with the Huntington USC Institute on California and the West

Dorothea Lange Linda Gordon, 2010-09-21 Dorothea Lange's photographs define how we remember the Depression generation now an evocative biography defines her creative struggles and enduring legacy We all know Dorothea Lange's iconic photos the Migrant Mother holding her child the gaunt men forlornly waiting in breadlines but few know the arc of her extraordinary life In this sweeping account renowned historian Linda Gordon charts Lange's journey from polio-ridden child to wife and mother to San Francisco portrait photographer to chronicler of the Great Depression and World War II Gordon uses Lange's life to anchor a moving social history of twentieth century America re-creating the bohemian world of San Francisco the Dust Bowl and the Japanese American internment camps She explores Lange's growing radicalization as she embraced the democratic power of the camera and she examines Lange's entire body of work reproducing more than one hundred images many of them previously unseen and some of them formerly suppressed Lange reminds us that beauty can be found in unlikely places and that to respond to injustice we must first simply learn how to see it

Dominion from Sea to Sea Bruce Cumings, 2009-11-17 America is the first world power to inhabit an immense land mass open at both ends to the world's two largest oceans the Atlantic and the Pacific This gives America a great competitive advantage often overlooked by Atlanticists whose focus remains overwhelmingly fixed on America's relationship with Europe Bruce Cumings challenges the Atlanticist perspective in this innovative new history arguing that relations with Asia influenced our history greatly Cumings chronicles how the movement westward from the Middle West to the Pacific has shaped America's industrial technological military and global rise to power He unites domestic and international history international relations and political economy to demonstrate how technological change and sharp economic growth have created a truly bicoastal national economy that has led the world for more than a century Cumings emphasizes the importance of American encounters with Mexico the Philippines and the nations of East Asia The result is a wonderfully integrative history that advances a strong argument for a dual approach to American history incorporating both Atlanticist and Pacificist perspectives

Valley of Heart's Delight Anne Marie Todd, 2022-10-25 This agricultural history explores the transformation of the Santa Clara Valley over the past one hundred years from America s largest fruit producing region into the technology capital of the world In the latter half of the twentieth century the region s focus shifted from fruits such as apricots and prunes to computers Both personal and public rhetoric reveals how a sense of place emerges and changes in an evolving agricultural community like the Santa Clara Valley Through extensive archival research and interviews Anne Marie Todd explores the concepts of place and placelessness arguing that place is more than a physical location and that exploring a community s sense of place can help us to map how individuals experience their natural surroundings and their sense of responsibility towards the local environment Todd extends the concept of sense of place to describe Silicon Valley as a non place where weakened or disrupted attachment to place threatens the environment and community The story of the Santa Clara Valley is an American story of the development of agricultural lands and the transformation of rural regions
