has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today s unstable global political situation **OECD**

Fontaubert,Joshua Gill,Jun Rentschler,Jason Russ,Esha Zaveri,2023-06-15 Clean air land and oceans are critical for human

health and nutrition and underpin much of the world's economy. Yet they suffer from degradation, poor management and overuse due to government subsidies. Detox Development Repurposing Environmentally Harmful Subsidies examines the impact of subsidies on these foundational natural assets. Explicit and implicit subsidies estimated to exceed US \$7 trillion per year not only promote inefficiencies but also cause much environmental harm. Poor air quality is responsible for approximately 1 in 5 deaths globally. And as the new analyses in this report show, a significant number of these deaths can be attributed to fossil fuel subsidies. Agriculture is the largest user of land worldwide, feeding the world and employing 1 billion people, including 78 percent of the world's poor. But it is subsidized in ways that promote inefficiency, inequity and unsustainability. Subsidies are shown to drive the deterioration of water quality and increase water scarcity by incentivizing overextraction. In addition, they are responsible for 14 percent of annual deforestation, incentivizing the production of crops that are cultivated near forests. These subsidies are also implicated in the spread of zoonotic and vector-borne diseases, especially malaria. Finally, oceans support the world's fisheries and supply about 3 billion people with almost 20 percent of their protein intake from animals. Yet they are in a collective state of crisis, with more than 34 percent of fisheries overfished, exacerbated by open access regimes and capacity-increasing subsidies. Although the literature on subsidies is large, this report fills significant knowledge gaps using new data and methods. In doing so, it enhances understanding of the scale and impact of subsidies and offers solutions to reform or repurpose them in efficient and equitable ways. The aim is to enhance understanding of the magnitude, consequences and drivers of policy successes and failures in order to render reforms more achievable.

Agricultural Trade Liberalization and the Least Developed Countries

Niek Koning, Per Pinstrup-Andersen, 2007-05-07. Developing countries as a group stand to gain very substantially from trade reform in agricultural commodities. *Agricultural Trade Liberalization and the Least Developed Countries* is the first book to address important questions relating to this subject. The authors are world renowned experts on international trade and development and they address a very important and timely issue.

The EU Budget: The UK Rebate and the CAP - Phasing them both out? Jorge Núñez Ferrer, 2007. The CEPS Task Force on the EU budget began its deliberations shortly after the December 2005 Council Decision embracing all aspects of the budget and culminating after more than a year of preparation in this report. This report offers a structure for evaluating the EU's expenditures and future reform options based on a set of guiding principles drawn from the EU Treaties and precepts of good governance. It goes on to identify the misallocation of resources as a central cause of the net balance disputes that plague the system and undermine its fairness. To ensure that the EU is able to act in areas of real value, the report concludes that improvements in the rationale for the expenditures and an increase in the quality of interventions must occur in tandem with an elimination of distortions in the resources mechanism.

Economics and Policies of an Enlarged Europe Carlo Altomonte, Mario Nava, 2006-01-01

Increasingly policies and laws commonly agreed within the EU shape the political and economic scenarios of nation states in Europe. However, the same European context is radically changing essentially due to three major recent developments: the adoption of the Euro, EU enlargement to the east, and the implementation of the Lisbon Strategy of structural reforms for growth and competitiveness. The book presents a thorough economic analysis of these three events and of their implications for both existing and potential EU policies and objectives. Carlo Altomonte and Mario Nava have written a very rigorous text in an accessible and jargon-free style ensuring easy acquisition of invaluable insights into the European economic set-up and the possible evolution of EU policies, including an update on the reform of the Growth and Stability Pact and of the 2007-13 Financial Perspectives. The accessibility of economic concepts combined with the methodological rigour of this up-to-date text will be of great interest to both policy makers and students.

Jack Goody between Social Anthropology and World History
Chris Hann, Han F. Vermeulen, A giant of British social anthropology. Jack Goody (1919-2015) laboured for sixty years to transcend the view that anthropology was the study of other cultures. He wanted to move it in the direction of a more sociological, postcolonial, comparative social science. The most important precondition for this science was the freeing of world history from centuries of Eurocentric bias. From his base in Cambridge, Goody's influence and inspiration spread out internationally. In Germany, as a long-term adviser to the Max Planck Society, he played a key role in the establishment of the Max Planck Institute for Social Anthropology in Halle Saale in 1999. This volume presents twelve Goody Lectures delivered in Halle between 2011 and 2022, together with an unpublished lecture given in 2004 by Goody himself and biographical and bibliographical essays by the editors.
