First Births in America Ronald R. Rindfuss, Ronald R. Rindfuss 1946-, S. Philip Morgan, Gray Swicegood, 1988-01-01

Demography As an Interdiscipline J. Mayone Stycos, This volume draws together some of the pioneer figures in the social science arena who have been working at the margins of demography and other social sciences These articles show the willingness of the new demography to venture into a variety of other disciplines to better appreciate its own special contributions to the world of interdisciplinary research **Demographic Research, Volume 17: Book I** Demographic Research, 2008

The Demography of South Africa Tukufu Zuberi, Amson Sibanda, Eric O. Udjo, 2016-07-22 This groundbreaking study of South Africa provides a unique look at the interplay of demographic social and economic processes in a society undergoing rapid change as a result of the collapse of apartheid It uses data from the first post apartheid census as the basis for analysis of fertility mortality within the context of HIV AIDS migration education employment and household structure These census data are complemented by large scale household surveys and data from a partial registration system to study the relationships among various demographic economic and social phenomena For the first time the demographic consequences of both the longer term impact of apartheid policies and the policies of the new South Africa are examined and compared This comprehensive reference links the demographic behavior of South Africa's various population groups to social economic and political inequalities created by policies of separate and unequal development Prepared under the auspices of the Population Studies Center at the University of Pennsylvania it is an essential resource for all scholars and practitioners in the field

The Demography of South Africa , In nine essays originating from the running Miami International Relations Group seminar the editors and contributors introduce constructivism as an alternative to studying IR from a historical and systems analytical framework They advance constructivism in the context of the perennial agent structure debate discuss international relations under social construction as in national identity feminist struggle and global Internet governance and reconstructing the discipline Paper edition unseen 22 95 Annotation copyrighted by Book News Inc Portland OR

Dynamics of Values in Fertility Change Richard Leete, 1999-04-01 The global transformation in the number of children women bear has been one of the most remarkable changes in social behaviour in the twentieth century The search for explanations of the causes in childbearing behaviour and particularly in the values attached to children remains a central research preoccupation of population scientists This book explores the dimensions of values identified as significant in their impact on fertility decisions It offers a range of perspectives on a mosaic of values perceived to be of importance in influencing the bearing and caring of children The book examines the macro and micro theories of the value of children and considers the multi dimensional nature of value change The chapters explore the nature of the mechanisms by which value change may serve to reinforce or promote the ideational essence of change and the impact of pressures for change It is observed that gender religion and culture all function as complementary lenses through which the necessity of value

maintenance or modification is viewed The book concludes that fertility behaviour is value driven but that fertility change is not necessarily driven by value change The values of most significance to fertility are more fundamental and general values rather than explicit fertility values *Family Demography in Asia* Stuart Gietel-Basten, John Casterline, Minja Kim Choe, 2018-11-30 The demographic future of Asia is a global issue As the biggest driver of population growth an understanding of patterns and trends in fertility throughout Asia is critical to understand our shared demographic future This is the first book to comprehensively and systematically analyse fertility across the continent through the perspective of individuals themselves rather than as a consequence of top down government policies Canada's Changing Families Kevin McQuillan, Zenaida R. Ravanera, 2006-01-01 In recent years two significant trends have had a substantial impact on Canadian families First Canadian families have been dramatically altered by high rates of separation and divorce declining fertility greater popularity of alternative family arrangements such as cohabitation and increasing involvement of women in paid labour Second changes occurring in the economy and the larger society have brought new pressures to bear on families In Canada's Changing Families editors Kevin McQuillan and Zenaida R. Ravanera explore how these developments have altered family life Using data collected in recent surveys by Statistics Canada contributors to this volume illustrate how transformed conditions in the labour market have forced families to alter their routines and the division of responsibilities within the household At the same time the government striving to maintain or increase the competitive position of the economy has moved to control spending restrain taxes and reduce deficits The result has been new demands on the family to provide or supplement services that might otherwise be provided by the state Canada's Changing Families is an eye opening study and one of great contemporary relevance **Policy Implications of Changing Family Formation** Linda Hantrais, Dimităr Filipov, Francesco C. Billari, 2006-01-01 Modern European societies are witnessing a number of key changes in family structures such as postponed parenthood low fertility single parenting and increased divorce rates As a consequence of the radical changes taking place in our societies family policies often result in a complex set of targeted and sometimes contradictory measures and forms of public intervention The three authors of this volume review the major demographic challenges posed by changing patterns in family and family formation and strive to identify possible policy responses by governments They stress the need for all levels of government and the private sector to adopt an integrated and balanced approach to policy in order to create cohesive and family friendly societies This volume is a thematic compilation of the background papers on the policy implications of changing family formations prepared for the European Population Conference Strasbourg 7-8 April 2005 **Demographic Changes in the United States** United States. Congress. Joint Economic Committee. Subcommittee on Economic Resources, Competitiveness, and Security Economics, 1987 Demographic Challenges for the 21st Century Johan Surkyn, 2008 Inspired by the work of Ron Lesthaeghe retired Belgian professor of demography and social science research methodology this collection of contributions is also based on a

conference entitled Demographic Challenges for the 21st Century A State of the Art in Demography During Ron Lesthaeghe's tenure he established himself as a scholar publishing highly influential work that changed the face of demography and founded the research group Interface Demography Most of his research was in the various subfields of demography historical social and economic and mainly covered populations of Europe and of sub Saharan Africa He also researched the fields of cultural change in Europe and of ethnic minority studies This book offers a collection of tributes to his contribution to demography presented by leading international demographers

Childlessness in Europe: Contexts, Causes, and Consequences Michaela Kreyenfeld, Dirk Konietzka, 2017-01-11 This book is published open access under a CC BY 4.0 license This open access book provides an overview of childlessness throughout Europe It offers a collection of papers written by leading demographers and sociologists that examine contexts causes and consequences of childlessness in countries throughout the region The book features data from all over Europe It specifically highlights patterns of childlessness in Germany France the United Kingdom Finland Sweden Austria and Switzerland An additional chapter on childlessness in the United States puts the European experience in perspective The book offers readers such insights as the determinants of lifelong childlessness whether governments can and should counteract increasing childlessness how the phenomenon differs across social strata and the role economic uncertainties play In addition the book also examines life course dynamics and biographical patterns assisted reproduction as well as the consequences of childlessness Childlessness has been increasing rapidly in most European countries in recent decades This book offers readers expert analysis into this issue from leading experts in the field of family behavior From causes to consequences it explores the many facets of childlessness throughout Europe to present a comprehensive portrait of this important demographic and sociological trend

Demographic Change in Germany Ingrid Hamm, Helmut Seitz, Martin Werding, 2007-09-27 This book provides an up to date summary of the consequences of demographic aging for labor markets financial markets economic growth social security schemes and public finances in Germany essentially reflecting the present state of knowledge in any of these areas All contributions are written by leading experts in their fields and are based on results that emerge at the forefront of current research

The Changing Transition to Adulthood Francis Goldscheider, Calvin Goldscheider, 1999-06-14 This book places changes in leaving and returning home in the context of the major events of 20th century America The authors examine the reasons children ultimately leave home to live on their own and how the pattern has changed throughout the 20th century Using data

from the National Survey of Families and Households Goldscheider and Goldscheider have constructed these patterns for when children leave home and what the most important criteria for doing so are to different groups in America including men women Blacks Hispanics Whites and different religious groups and social classes *An Introduction to Population* Helen Ginn Daugherty, 1995-07-21 Discussing the scope and key concepts of the study of population it considers the basic processes of fertility mortality migration population composition demography data and population processes and assesses the problems within the field Handbook of Marriage and the Family Marvin B. Sussman, Suzanne K. Steinmetz, Gary W. Peterson, 2013-06-29 To know where we are going as scholars educators and practitioners in the field of marriage and family life we first need to know where we have been A perusal of early texts on marriage and family life provides some thought provoking insights into the accuracy of the saying what goes around comes around It is interesting to note who has been considered to be in a position to provide information on marriage and family life Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p **Beyond Six Billion** National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on Population, Panel on Population Projections, 2000-09-11 Is rapid world population growth actually coming to an end As population growth and its consequences have become front page issues projections of slowing growth from such institutions as the United Nations and the World Bank have been called into question *Beyond Six Billion* asks what such projections really say why they say it whether they can be trusted and whether they can be improved The book includes analysis of how well past U N and World Bank projections have panned out what errors have occurred and why they have happened Focusing on fertility as one key to accurate projections the committee examines the transition from high constant fertility to low fertility levels and discusses whether developing countries will eventually attain the very low levels of births now observed in the industrialized world Other keys to accurate projections predictions of lengthening life span and of the impact of international migration on specific countries are also explored in detail How good are our methods of population forecasting How can we cope with the inevitable uncertainty What population trends can we anticipate *Beyond Six Billion* illuminates not only the forces that shape population growth but also the accuracy of the methods we use to quantify these forces and the uncertainty

surrounding projections The Committee on Population was established by the National Academy of Sciences NAS in 1983 to bring the knowledge and methods of the population sciences to bear on major issues of science and public policy The committee s work includes both basic studies of fertility health and mortality and migration and applied studies aimed at improving programs for the public health and welfare in the United States and in developing countries The committee also fosters communication among researchers in different disciplines and countries and policy makers in government international agencies and private organizations The work of the committee is made possible by funding from several government agencies and private foundations *People, Population Change and Policies* Charlotte Höhn, Dragana Avramov, Irena E. Kotowska, 2008-03-08 This two volume work explores social cohesion and the demographic challenges of low birth rates and population aging Authors approach the topic from the perspective of citizens and policymakers analyzing attitudes from 14 European countries on demographic trends and expectations towards private networks and public policies Volume 2 focuses on family and family change value of children fertility intentions and views on work family balance

Infertility in the Modern World Gillian R. Bentley, C. G. Nicholas Mascie-Taylor, 2000-11-30 An interdisciplinary perspective on the ways in which human biology and culture can affect fertility
