Of Sacred Lands and Strip Malls Ronald Loewe, 2016-09-15 A twenty two acre strip of land known as Puvungna lies at the edge of California State University s Long Beach campus The land indisputably owned by California is also sacred to several Native American tribes And these twenty two acres have been the nexus for an acrimonious and costly conflict over control of the land Of Sacred Lands and Strip Malls tells the story of Puvungna from the region s deep history through years of struggle between activists and campus administration and ongoing reverberations from the conflict As Loewe makes clear this is a case study with implications beyond a single controversy at stake in the legal battle is the constitutionality of state codes meant to protect sacred sites from commercial development and the right of individuals to participate in public hearings The case also raises questions about the nature of contract archaeology applied anthropology and the relative status of ethnography and ethnohistorical research It is a compelling snapshot of issues surrounding contemporary Native American

landscapes Humans Versus Nature Daniel R. Headrick, 2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

A summary & review of early american history , *The Gold Crusades* Douglas Fetherling, George Fetherling, 1997-01-01 Among the hordes of starry eyed argonauts who flocked to the California gold rush of 1849 was an Australian named Edward Hargraves He left America empty handed only to find gold in his own backyard The result was the great Australian rush of the 1850s which also attracted participants from around the world A South African named P J Marais was one of them Marais too returned home in defeat only to set in motion the diamond and gold rushes that transformed southern Africa And so it went Most previous historians of the gold rushes have tended to view them as acts of spontaneous nationalism Each country likes to see its own gold rush as the one that either shaped those that followed or epitomized all the rest In *The Gold Crusades A Social History of Gold Rushes 1849 1929* Douglas Fetherling takes a different approach Fetherling argues that the gold rushes in the United States Canada Australia New Zealand and South Africa shared the same causes and results the same characters and characteristics He posits that they were in fact a single discontinuous event an expression of the British imperial experience and nineteenth century liberalism He does so with dash and style and with a sharp eye for the telling anecdote the out of the way document and the bold connection between seemingly unrelated disciplines Originally published by Macmillan of Canada 1988 *Gold Rushes and Mining Camps of the Early American West* Vardis Fisher, Opal Laurel Holmes, Opal Laurel Fisher, 1968 Distributed by the University of Nebraska Press for Caxton Press Vardis Fisher and Opal Laurel Holmes bring together the stories of all of the remarkable men and women and all of the violent contrasts that made up one of the most enthralling chapters in American history Fisher a respected scholar and versatile creative writer devoted three years to the writing of this book **Story of the California Gold Rush Coloring Book** Peter F.
