Official Gazette of the United States Patent and Trademark Office United States. Patent and Trademark Office,2001

The Glass House Boys of Pittsburgh James L. Flannery,2009-10-11 At the end of the nineteenth century Pittsburgh was leading the nation in glass production and glass bottle plants in particular relied heavily on adolescent and younger males for their manufacturing process These glass house boys worked both day and night as plants ran around the clock to meet production demands and remain price competitive with their newly automated rivals Boys performed menial tasks received low wages and had little to say on their own behalf By the turn of the century most states had enacted laws banning children from working at night and coupled with compulsory education requirements had greatly reduced the use of children in industry In western Pennsylvania however child labor was deeply entrenched and Pennsylvania lawmakers lagged far behind the rest of the nation In The Glass House Boys of Pittsburgh James L Flannery presents an original and compelling examination of legislative clashes over the singular issue of the glass house boys He reveals the many societal economic and political factors at work that allowed for the perpetuation of child labor in this industry and region Through extensive research in Pennsylvania state legislature archives National Child Labor Committee reports and union and industry journals Flannery uncovers a complex web of collusion between union representatives industrialists and legislators that kept child labor reform at bay Despite national pressure a concerted effort by reformers and changes to education laws the slow defeat of the glass house exception in 1915 came about primarily because of technological advances in the glass bottle industry that limited the need for child labor **A Journal of Natural Philosophy, Chemistry, and the Arts** ,1812 *The London, Edinburgh, and Dublin philosophical magazine and journal of science* Naturforschende Gesellschaft in Zürich,1856
