## First Computers:

**The First Computers** Raul Rojas, Ulf Hashagen, 2002-07-26 This history of computing focuses not on chronology what came first and who deserves credit for it but on the actual architectures of the first machines that made electronic computing a practical reality The book covers computers built in the United States Germany England and Japan It makes clear that similar concepts were often pursued simultaneously and that the early researchers explored many architectures beyond the von Neumann architecture that eventually became canonical The contributors include not only historians but also engineers and computer pioneers An introductory chapter describes the elements of computer architecture and explains why being first is even less interesting for computers than for other areas of technology The essays contain a remarkable amount of new material even on well known machines and several describe reconstructions of the historic machines These investigations are of more than simply historical interest for architectures designed to solve specific problems in the past may suggest new approaches to similar problems in today's machines Contributors Titiimaea F Ala ilima Lin Ping Ang William Aspray Friedrich L Bauer Andreas Brennecke Chris P Burton Martin Campbell Kelly Paul Ceruzzi I Bernard Cohen John Gustafson Wilhelm Hopmann Harry D Huskey Friedrich W Kistermann Thomas Lange Michael S Mahoney R B E Napper Seiichi Okoma Hartmut Petzold Ra l Rojas Anthony E Sale Robert W Seidel Ambros P Speiser Frank H Sumner James F Tau Jan Van der Spiegel Eiti Wada Michael R Williams The First Computers Guy De la Bédoyère, 2005 One of a series of titles which looks at some key scientific advances of the last century how they came about and their repercussions Computer For Beginners V.K.Jain, 1989 Update Reading books is a kind of enjoyment Reading books is a good habit We bring you a different kinds of books You can carry this book where ever you want It is easy to carry It can be an ideal gift to yourself and to your loved ones Care instruction keep away from fire *Computer Fundamentals* DP Nagpal, 2008 Today computer has become an integral part of our life Some experts think that eventually the person who does not know how to use a computer will be handicapped in performing his or her job To become computer literate you should not only know the use of computers but also how and where they can be used If you are taking a course to familiarize yourself with the world of computers *Computer Fundamentals* serves as an interesting and informative guide in your journey to computer literacy **The First Computers** Charles A. Jortberg, 1997 Surveys the history of devices leading up to modern computer systems from ancient celestial calculators and abacuses to punched card systems and the Univac *The Early Computer Industry* A. Gandy, 2012-11-30 Uses case studies to explore why large scale electronics failed to win a leadership position in the early computer industry and why IBM a firm with a heritage in the business machines industry succeeded The cases cover both the US and the UK industry focusing on electronics giants GE RCA English Electric EMI and Ferranti *Computer HardWare* Pavel Bartoš, 1991 When writing this book we tried to create a material that would serve as a comprehensive guide to the world of computer hardware Our goal was to offer readers not only theoretical knowledge but also practical skills that can be used in

real situations We believe that this textbook will be useful not only for high school students but also for the general public who are interested in technologies and their applications When creating the content we were based on many years of experience in education and practice in the field of information technology We tried to cover a wide range of topics from basic components of a personal computer to more complex issues such as overclocking microprocessors or configuring RAID systems Each topic is supplemented with practical examples and exercises that help to better understand the given issue
