It commences with the archaeological records from the multiple homelands of agriculture, and extends into discussions that draw on linguistic and genomic information about the human past, featuring new findings from the last ten years of research. Through twelve chapters, the text examines the latest evidence and leading theories surrounding the early development of agricultural practices through data drawn from across the anthropological discipline―primarily archaeology, comparative linguistics, and biological anthropology―to present a cohesive history of early farmer migration. Founded on the author's insights from his research into the agricultural prehistory of East and Southeast Asia―on of the best focus areas for the teaching of prehistoric archaeology―this book offers an engaging account of how prehistoric humans settled new landscapes. The second edition has been thoroughly updated with many new maps and illustrations that reflect the multidisciplinary knowledge of the present day. Authored by a leading scholar with wide-ranging experience across the fields of anthropology and archaeology, First Farmers, Second Edition includes information on: The early farming dispersal hypothesis in current perspective, plus operational considerations regarding the origins and dispersals of agriculture The archaeological evidence for the origins and spreads of agriculture in the Eurasian, African and American continents The histories of the language families that spread with the first farming populations, and the evidence from biological anthropology and ancient DNA that underpins our modern knowledge of these migrations Drawing evidence from across the sub-disciplines of anthropology to present a cohesive and exciting analysis of an important subject in the study of human population history, Farmers First, Second Edition is an important work of scholarship and an excellent introduction to multiple methods of anthropological and archaeological inquiry for the beginner student in prehistoric anthropology and archaeology, human migration, archaeology of East and Southeast Asia, agricultural history, comparative anthropology, and more disciplines across the anthropology curriculum.

History Without Borders Geoffrey C. Gunn, 2011-08-01 Astride the historical maritime silk routes linking India to China premodern East and Southeast Asia can be viewed as a global region in the making over a long period Intense Asian commerce in spices silks and ceramics placed the region in the forefront of global economic history prior to the age of imperialism Alongside the correlated silver trade among Japanese Europeans Muslims and others China's age old tributary trade networks provided the essential stability and continuity enabling a brilliant age of commerce Though national perspectives stubbornly dominate the writing of Asian history even powerful state centric narratives have to be re examined with respect to shifting identities and contested boundaries This book situates itself in a new genre of writing on borderland zones between nations especially prior to the emergence of the modern nation state It highlights the role of civilization that developed along with global trade in rare and everyday Asian commodities raising a range of questions regarding unequal development intraregional knowledge advances the origins of globalization and the emergence of new Asian hybridities

beyond and within the conventional boundaries of the nation state Chapters range over the intra Asian trade in silver and ceramics the Chinese junk trade the rise of European trading companies as well as diasporic communities including the historic Japan towns of Southeast Asia and many types of technology exchanges While some readers will be drawn to thematic elements this book can be read as the narrative history of the making of a coherent East Southeast Asian world long before the modern period

Frontiers in the Study of Ancient Plant Remains, 2023-11-16 In the last two decades plant biology has developed rapidly ranging from molecular genetics cell biology and physiology to ecology and evolutionary issues both for economic species and species unrelated to humans These topics have received intensive attention however there is still a large gap in the study of plant biology in prehistoric times especially those closely related to humans The identification of plant species in archaeological sites plays an important role in exploring the paleoenvironment the origin and spread of agriculture and the relationship between humans and nature In this research topic we welcome progress in all aspects of ancient plant fossil research especially phytoliths starches pollen and carbonized seeds from the mechanisms of plant fossil formation to their phytosystematics and the associated paleoecology and paleoenvironment

Past Human Migrations in East Asia Alicia Sanchez-Mazas,Roger Blench,Malcolm D. Ross,Ilia Peiros,Marie Lin,2008-07-25 The study of the prehistory of East Asia is developing very rapidly In uncovering the story of the flows of human migration that constituted the peopling of East Asia there exists widespread debate about the nature of evidence and the tools for correlating results from different disciplines Drawing upon the latest evidence in genetics linguistics and archaeology this exciting new book examines the history of the peopling of East Asia and investigates the ways in which we can detect migration and its different markers in these fields of inquiry Results from different academic disciplines are compared and reinterpreted in the light of evidence from others to attempt to try and generate consensus on methodology Taking a broad geographical focus the book also draws attention to the roles of minority peoples hitherto underplayed in accounts of the region s prehistory such as the Austronesian Tai Kadai and Altaic speakers whose contribution to the regional culture is now becoming accepted Past Human Migrations in East Asia presents a full picture of the latest research on the peopling of East Asia and will be of interest to scholars of all disciplines working on the

reconstruction of the peopling of East and North East Asia *Early Mesoamerican Social Transformations* Richard G. Lesure, 2011-10-04 Between 3500 and 500 bc the social landscape of ancient Mesoamerica was completely transformed At the beginning of this period the mobile lifeways of a sparse population were oriented toward hunting and gathering Three millennia later protourban communities teemed with people These essays by leading Mesoamerican archaeologists examine developments of the era as they unfolded in the Soconusco region along the Pacific coast of Mexico and Guatemala a region that has emerged as crucial for understanding the rise of ancient civilizations in Mesoamerica The contributors explore topics including the gendered division of labor changes in subsistence the character of ceremonialism the emergence of social inequality and large scale patterns of population distribution and social change Together they demonstrate the contribution of Soconusco to cultural evolution in Mesoamerica and challenge what we thought we knew about the path toward social complexity **The Southeast Asia Connection** Sing C. Chew, 2018-03-28 The contribution of Southeast Asia to the world economy during the late prehistoric and early historic periods has not received much attention It has often been viewed as a region of peripheral enterprises especially in the early centuries of the current era Recent archaeological evidence revealed the existence of established and productive polities in Southeast Asia in the early parts of the historic period and earlier This book recalibrates these interactions of Southeast Asia with other parts of the world economy and gives the region its due instead of treating it as little more than of marginal interest *Paleoeconomics* Ola Olsson, 2024-10-17 This accessible and insightful textbook provides a comprehensive introduction to the economics of prehistory By presenting a chronological account of the beginnings of economics and human society it charts the key developments in early human history from the evolution of social norms and colonizing of unknown continents to the development of early technology and the transition to agricultural food production Particular attention is given to how human capital the natural environment social capital and the spread of knowledge and technical skills propelled economic development during prehistory The origin of modern concerns including wealth inequality stratified societies and environmental change are thoughtfully presented through the examining of the birth of the first states and human civilization This book provides a thrilling account of human evolution and economic development from its African origins and hunter gather days through to the invention of agriculture and the rise of early states Bringing together ideas from across economic history the political economy anthropology and evolutionary biology it will be relevant to students and general readers interested in these topics **A Companion to Chinese Archaeology** Anne P. The Oxford Handbook of Prehistoric Oceania Ethan E. Cochrane, Terry L. Hunt, 2018 Oceania was the last region on earth to be permanently inhabited with the final settlers reaching Aotearoa New Zealand approximately AD 1300 This is about the same time that related Polynesian populations began erecting Easter Island's gigantic statues farming the valley slopes of Tahiti and similar islands and moving finely made basalt tools over several thousand kilometers of open ocean between Hawai'i the Marquesas the Cook Islands and archipelagos in between The remarkable prehistory of Polynesia is one chapter of Oceania's human story Almost 50 000 years prior people entered Oceania for the first time arriving in New Guinea and its northern offshore islands shortly thereafter a biogeographic region labelled Near Oceania and including parts of Melanesia Near Oceania saw the independent development of agriculture and has a complex history resulting in the greatest linguistic diversity in the world Beginning 1000 BC after millennia of gradually accelerating cultural change in Near Oceania some groups sailed east from this space of inter visible islands and entered Remote Oceania rapidly colonizing the widely

separated separated archipelagos from Vanuatu to Samoa with purposeful return voyages and carrying an intricately decorated pottery called Lapita From this common cultural foundation these populations developed separate but occasionally connected cultural traditions over the next 3000 years Western Micronesia the archipelagos of Palau Guam and the Marianas was also colonized around 1500 BC by canoes arriving from the west beginning equally long sequences of increasingly complex social formations exchange relationships and monumental constructions All of these topics and others are presented in *The Oxford Handbook of Prehistoric Oceania* written by Oceania's leading archaeologists and allied researchers Chapters describe the cultural sequences of the region's major island groups provide the most recent explanations for diversity and change in Oceanic prehistory and lay the foundation for the next generation of research [Archaeology of Asia](#) Miriam T. Stark, 2008-04-15 This introduction to the archaeology of Asia focuses on case studies from the region's last 10 000 years of history Comprises fifteen chapters by some of the world's foremost Asia archaeologists Sheds light on the most compelling aspects of Asian archaeology from the earliest evidence of plant domestication to the emergence of states and empires Explores issues of cross cultural significance such as migration urbanism and technology Presents original research data that challenges readers to think beyond national and regional boundaries Synthesizes work previously unavailable to western readers
