First International Congress On Cataract Surgery Florence 1978:

First International Congress on Cataract Surgery Florence, 1978 J. François, I. Esente, E. Maumenee, 2012-12-06

Numerous drugs administered either generally or locally have shown a cataractogenic action. From a pathogenic point of view a distinction must be made between drugs which modify the transparency of the lens due to accumulation of mercuric silver gold salts etc from those influencing its metabolism. Among the latter Triparanol antimitotic drugs various phenothiazinic derivatives corticosteroids and certain miotics cause the most significant damage. It is necessary to indicate the most frequent reports which evidence a relationship between a prolonged oestroprogestinic therapy and alterations of the lens transparency. The authors also indicate pathogenic mechanisms which probably cause iatrogenic cataracts.
