Fiscal Policy in the Smaller Industrial Countries, 1972-82 International Monetary Fund, 1986-03-15 Written by Gisli Blondal former Advisor in the IMF's Fiscal Affairs Department the book examines the fiscal policy pursued by 13 of the smaller industrial countries over the period 1972-82 In the Red Zsafia Barta, 2018-03-06 Why do rich countries flirt with fiscal disaster Between the 1970s and the 2000s during times of peace and prosperity affluent countries like Belgium Greece Italy and Japan accumulated so much debt that they became vulnerable and exposed themselves to the risk of default In the past three decades an extensive scholarly consensus emerged that these problems were created by fiscal indiscipline the lack of sufficient concern for budgetary constraints from policy makers as they try to please voters This approach formed the foundation for the fiscal surveillance system that attempted to bring borrowing in European countries under control via a set of fiscal rules In the Red demonstrates that the problem of sustained large scale debt accumulation is an adjustment issue rather than a governance failure Irrespective of whether the original impetus for borrowing arose from exogenous changes or irresponsible decision making policy makers invariably initiate spending cuts and or tax increases when debt grows at an alarming rate for several years in a row Zsafia Barta argues that explaining why some countries accumulate substantial amounts of debt for decades hinges on understanding the conditions required to allow policy makers to successfully put into place painful adjustment measures **Scandinavian Journal of Development Alternatives**, 1988 **Publications Catalog** International Monetary Fund, 2001 Annual Report of the Executive Directors for the Fiscal Year International Monetary Fund, 1980 Finances Publiques, 1990 **The International Monetary Fund** Elisabeth P.
