Pope, 2012-12-01 Combining innovative archaeological analysis with historical research Peter E Pope examines the way of life that developed in seventeenth century Newfoundland where settlement was sustained by seasonal migration to North America's oldest industry the cod fishery The unregulated English settlements that grew up around the exchange of fish for wine served the fishery by catering to nascent consumer demand The English Shore became a hub of transatlantic trade linking Newfoundland with the Chesapeake New and old England southern Europe and the Atlantic islands Pope gives special attention to Ferryland the proprietary colony founded by Sir George Calvert Lord Baltimore in 1621 but later taken over by the London merchant Sir David Kirke and his remarkable family The saga of the Kirkes provides a narrative line connecting social and economic developments on the English Shore with metropolitan merchants proprietary rivalries and international competition Employing a rich variety of evidence to place the fisheries in the context of transatlantic commerce Pope makes Newfoundland a fresh point of view for understanding the demographic economic and cultural history of the expanding North Atlantic world **Fish on Friday (EasyRead Large Bold Edition)** Brian M. high internal transportation costs limited domestic market integration while at the same time the Castilian capital city of Madrid drew resources from surrounding Spanish regions as it pursued its quest for centralization According to this view powerful Madrid thwarted trade over large geographic distances by destroying an integrated network of manufacturing towns in the Spanish interior Challenging this long held view Regina Grafe argues that decentralization not a strong and powerful Madrid is to blame for Spain's slow march to modernity Through a groundbreaking analysis of the market for bacalao dried and salted codfish that was a transatlantic commodity and staple food during this period Grafe shows how peripheral historic territories and powerful interior towns obstructed Spain's economic development through jurisdictional obstacles to trade which exacerbated already high transport costs She reveals how the early phases of globalization made these regions much more externally focused and how coastal elites that were engaged in trade outside Spain sought to sustain their positions of power in relation to Madrid Distant Tyranny offers a needed reassessment of the haphazard and regionally diverse process of state formation and market integration in early modern Spain showing how local and regional agency paradoxically led to legitimate governance but economic backwardness
