Fisheries Dependent Regions:

Fisheries Dependent Regions David Symes, 2000-01-28 Fisheries dependent regions FDRs serve as a crucial barometer for measuring the economic and social impacts of fisheries policy. While some more favoured regions benefit from the modernisation and centralisation of fishing activity, many fishing dependent communities in remoter FDRs are drawn into a downward spiral of prosperity provoked by reduced levels of catch and increasing regulation. The uneven pattern of development poses particular problems for policy makers across the spectrum of fisheries management: economic development and social welfare, which are addressed in Fisheries Dependent Regions through expert accounts of the current situation in Europe. By examining these issues and exploring ways of improving our understanding of the specific dynamics of FDRs, the book makes a vital and unique contribution to the ongoing debate on reform of fisheries policy. Inshore Fisheries Management

David Symes, Jeremy Phillipson, 2013-06-29 Despite their importance in terms of employment and income generation, inshore fisheries have been a neglected area of study. The review of the common fisheries policy, especially in the light of the need to re-examine the derogation which reserves access to the inshore zone to coastal state vessels, provides an opportunity to redress the balance. With contributions from leading authorities on fisheries management, the book takes an in-depth look at seven European countries, examining the basis for the definition of inshore fisheries, evaluating their status and describing the salient characteristics of their management. The national studies form the basis for cross-cultural analyses of the social organisation, cultural norms, economic objectives and institutional structures of inshore fisheries in Europe. Finally, a number of key issues relating to the future of inshore fisheries management in a more integrated approach are examined. Overall, the volume reaffirms the invaluable role played by inshore fisheries in the local and regional economies of Europe's complex coastline. **Use of Property Rights in Fisheries Management** Ross Shotton, 2000-01-01 The session was closed with papers that provided a prognosis on the future development of property rights in fisheries management. Thus the conference papers addressed the theory and application of property. **Structural Change in Fisheries Dealing with the Human Dimension** OECD, 2007-09-14 This conference proceedings analyses the social issues and policy challenges that arise from fisheries adjustment policies and how OECD member countries are meeting those challenges.
