One hundred years before Freud's striking psychoanalytic case histories the narrative psychological case history emerged in the second half of the eighteenth century in Germany as an epistemic genre Gianna Pomata that cut across the disciplines of medicine philosophy law psychology anthropology and literature It differed significantly from its predecessors in theology jurisprudence and medicine Rather than subsuming the individual under an established classification moral precept category or type the narrative psychological case history endeavored to articulate the individual in its very individuality thereby constructing a self in its irreducible singularity The presentation and analysis of several significant psychological case histories their theory and practice as well as the controversies surrounding their utility validity and function for an envisioned science of the soul constitutes the core of the book

Close and distant F Moretti readings of key texts and figures in the discussion regarding empirical psychology *psychologia empirica* experiential psychology *Erfahrungsseelenkunde* and medical psychology *medizinische Psychologie* such as Christian Wolff J C Krüger J C Bolton Ernst Nicolai J A Unzer J G Sulzer J G Herder Friedrich Schiller Jacob Friedrich Abel Marcus Herz Karl Philipp Moritz J C Reil Ernst Platner and Immanuel Kant provide the disciplinary historical scientific context within which this genre comes to the fore As the first systematic argument concerning the early history of this genre my thesis is that the psychological case history evolved as part of a pastoral apparatus of care concern guidance and direction for what it fashioned as the unique individual as the discursive medium in a process by which the soul became a self The narrative psychological case history was in fact a meta genre that transcended traditional boundaries of history and fiction medicine and philosophy psychology and anthropology and sought for the first time to explicitly link the experience history memory fantasy previous trauma or suffering of a unique individual to illness deviance aberration and crime In a word it demonstrated as Freud later said of his own case histories in *Studies on Hysteria* the intimate relation between the history of suffering and the symptoms of illness *die innige Beziehung zwischen Leidensgeschichte und Krankheitssymptome* This genre not only had a profound and far reaching effect on the evolution of German and European literature one thinks of the rich traditions of the *Novella* and the *Fallgeschichte* from Goethe Büchner R L Stevenson Edgar Allan Poe and Chekhov to Kafka and beyond but in shaping modern literature the clinical sciences and
