

MEDICINE TODAY, with all its multimillion-dollar glories and astounding techniques, is failing patients in a most basic way: It cannot, or will not, insure against medical care within the profession without bringing down as many people as killed by medical errors today as die in traffic accidents. The Institute of Medicine of the National Academy of Sciences recently estimated that as many as 10,000 patients die each year from medical errors committed in accredited hospitals. They die surrounded by the highest technical medical care in the world and shrouded by the deepest secrecy.

Dependent medicine has historically had difficulty identifying negligent patients and is such. They cause no problems and require no treatment. All victims of negligent patient care require a criterion of care as the medical profession.

No one doubts that American medicine at its best is first-class. The current is successful upon thousands and delicate neurosurgeries, liver transplant and coronary bypass operations have enhanced the quality of life for millions of Americans. Medical students and hospital interns learn the science from every nation in the world.

The progress of our medical excellence and eagerly read of the latest research news, but we don't hear about the numbers of errors made by physicians and surgeons because of the deeply entrenched conspiracy of silence among doctors and medical personnel. It is as though the Hippocratic Oath stated, "Do no harm, but if you do, keep your mouth shut." What we continue to accept medical standards of care not to be questioned by anyone. First, do no harm, but only say "Yes," if you provide the care for the long-suffering disease.

Williams,2023-06-07 Saul s Damascus Road event is one of the most dramatic events in the Bible and for so many different reasons that can and has directly impacted the lives of so many Christians The reasons for that event that have so impacted my life are the following Jesus spoke to Saul and that alone would be enough but Jesus also identified Saul as being My perfect tool and Saul the zealous Pharisee because he was so well versed in God s Word rapidly recognized that beginning with Abram before Abraham God s plan would eventually include both Jew and Gentile Jesus s resurrection from flesh to spirit and Saul s transformation from zealous Pharisee to becoming the apostle to the Gentiles has helped me see how God s plan includes me But Saul s Damascus Road event took place thousands of years ago and Christians today are left to marvel at how Saul and his many associates could begin to travel those well established Roman roads and slowly and oh so painfully begin to create nests of believers within the throngs of idol worshippers and more importantly how those widely scattered nests would take root and slowly become the Church that Martin Luther would feel compelled to challenge Jesus and Martin Luther are the only two who have walked this earth and been able to initiate historical eras Renaissance to Reformation is a historical milestone that got its birth because one isolated monk in one of the fragmented provinces of ununified Germany finally recognized what allowed Saul Paul to create those original nests of believers so long ago justification by faith of Romans 1 17 Dozens of books have been written about Saul Paul and Martin Luther and a dozen of books about all the popes beginning with Peter But connecting the dots over those fifteen centuries allowed Paul s final monumental letter to the Romans to really come alive Both Paul and Martin Luther were making history while they were writing history and history comes alive by connecting the dots **Medicine, Malpractice and Misapprehensions** V.H. Harpwood,2007-12-04 There is now incontrovertible evidence that medical mistakes and mishaps occur in significant numbers every year This book examines the uncertainty and some of the myths surrounding errors and claims in healthcare and places the arguments surrounding the so called compensation culture on a stronger statistical and hence epistemological basis Find the Black Box Dr. Ira Williams,2013-08-12 200 000 preventable deaths each year in the US healthcare system is like having 20 Boeing 747 airliners crashing each week Things are bad in our nations healthcare delivery system people are dying needlessly in hospitals every single day In Find the Black Box author
