Hamburgers in Paradise Louise O. Fresco,2015-10-27 A fascinating exploration of our past present and future relationship with food For the first time in human history there is food in abundance throughout the world More people than ever before are now freed of the struggle for daily survival yet few of us are aware of how food lands on our plates Behind every meal you eat there is a story Hamburgers in Paradise explains how In this wise and passionate book Louise Fresco takes readers on an enticing cultural journey to show how science has enabled us to overcome past scarcities and why we have every reason to be optimistic about the future Using hamburgers in the Garden of Eden as a metaphor for the confusion surrounding food today she looks at everything from the dominance of supermarkets and the decrease of biodiversity to organic foods and GMOs She casts doubt on many popular claims about sustainability and takes issue with naive rejections of globalization and the idealization of true and honest food Fresco explores topics such as agriculture in human history poverty and development and surplus and obesity She provides insightful discussions of basic foods such as bread fish and meat and intertwines them with social topics like slow food and other gastronomy movements the fear of technology and risk food and climate change the agricultural landscape urban food systems and food in art The culmination of decades of

research Hamburgers in Paradise provides valuable insights into how our food is produced how it is consumed and how we can use the lessons of the past to design food systems to feed all humankind in the future

Deforesting the Earth Michael Williams, 2003 Clearing in the deep past Reaching out europe and the wider world The global forest

The Final Empire Wm. H. Kötke, 2007-11 In spite of its tough message there is much compassion and humanity in The Final Empire Right away as you begin to read this work you sense increasingly the grand perspective in K tke s words He is not speaking of anarchy He is offering vital common sense It s just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to humankind A demand for radical change A re envisioning of our part in the community of life and the precepts of individuality And Mr K tke provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance The Final Empire is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels Prairie Fire and Taming the Dragon

Who Guards the Guardians? Peter Raine, 2003 This book attempts to link ecology philosophy and theology through an

exploration of a new model of intercultural dialogue Case studies provide practical and theoretical applications which lead to a deeper understanding of not only environmental guardianships but also the fundamental relationship between human beings and nature s being

Vestal Fire Stephen J. Pyne,2012-04-01 Stephen Pyne has been described as having a consciousness composed of equal parts historian ecologist philosopher critic poet and sociologist At this time in history when many people are trying to understand their true relationship with the natural environment this book offers a remarkable contribution breathtaking in the scope of its research and exhilarating to read Pyne takes the reader on a journey through time exploring the terrain of Europe and the uses and abuses of its lands as well as through migration and conquest many parts of the rest of the world Whether he is discussing the Mediterranean region Russia Scandinavia the British Isles central Europe or colonized islands whether he is considering the impact of agriculture forestry or Enlightenment thinking the author brings an unmatched insight to his subject Vestal Fire takes its title from Vesta Roman goddess of the hearth and keeper of the sacred fire on Mount Olympus But the book s title also suggests the strengths and limitations of Europe s peculiar conception of fire and through fire of its relationship to nature Between the untamed fire of the wilderness and the tended fire of the hearth lies a never ending dialectic in which human beings struggle to control natural forces and processes that in fact can sometimes be directed but never wholly dominated or contained

Balearic Islands David and Susie Baggaley, The twelfth edition of this renamed popular title covers Ibiza Formentera Mallorca Cabrera and Menorca The only fully comprehensive pilot guide to the Spanish islands in English Balearic Islands offers guidance and information to

yacht charterers or cruising sailors looking to explore this popular cruising ground It s been revised and updated for the Royal Cruising Club Pilotage Foundation by David and Susie Baggaley whose Beneteau 42 Kookaburra was based in Addaya Menorca for several years The authors share their knowledge enthusiastically and authoritatively offering a taste of the culture of the Balearics with information about the islands as a destination alongside in depth data on the marinas ports and delightful cala anchorages for which the islands are so popular The introductory sections contain detail on regulations marine reserves and environmental concerns climate weather and practical considerations for yachts both mono and multi hull Imray chartlets have been updated throughout There are also many attractive new photographs which are informative to the navigator

Reintegrating Fragmented Landscapes Richard J. Hobbs, Denis A. Saunders, 2012-12-06 Social historians will look back on the 1980s as a period when a global consciousness of the environment developed Stimulated by major issues and events such as oil and chemical spills clearing of rainforests pollution of waterways and towards the end of the decade concern over the greenhouse effect concern for the environment has become a major social and political force Unfortunately the state of the environment and its future management are still very divisive issues Often at a local level concern for the environment is the antithesis of development The debate usually focusses on the possible negative environmental impacts of an activity versus the expected positive economic impacts It is a very difficult task to integrate development and conservation yet it is towards this objective that the sustainable development debate is moving The issues in the central wheatbelt of Western Australia are typical of the environment versus development debate It is undoubted that the development of the area which involved clearing the native vegetation has had a major impact upon the original ecosystems Many of the natural habitats are threatened and local extinction of flora and fauna species is a continuing process Moreover there are clear signs that land degradation processes such as dryland salinity are depleting the land resource

The Redesigned Earth John T. Tanacredi, 2019-12-12 This book provides insight into the basic aspects of ecology that impact or are affected by engineering practices Ecological principals are described and discussed through the lens of the influences that built structures have on the Earth s biological geological and chemical systems The text goes on to elucidate the engineering influences that have or will influence the face of the Earth These influences redesign the Earth either by destroying natural systems and replacing them with highly subsidized systems or by attempting to restore highly disturbed or contaminated systems with the basic natural systems that were originally present
