## **First Jet Aircraft:**

**Jet Pioneers** Tim Kershaw,2004-03-18 In April 1941 Britain s first jet left the ground at a grass airfield 4 miles from Gloucester Cathedral It was the start of a revolution in air travel military and civilian During the 1940s Britain s first ever jet aircraft the world s first jet fighter in squadron service and the first jet to hold the world air speed record were all designed built and flown in the Gloucester and Cheltenham area The story of Frank Whittle s invention and dogged development of the jet engine is well known But the account of how his invention was put into the air has never been fully told This book tells the story of how the men and women of north Gloucestershire made Whittle s engine fly    [The History of German Aviation](#)

Wolfgang Wagner,1998 This book the first in a multi volume history of German aviation provides a comprehensive and detailed analysis of of jet aircraft design and development in Germany The solid description unique photo material historical documents numerous drawings and complete data tables published for the first time make this book not only a gripping story but also an indispensable reference work for anyone with an interest in the development of aviation In August 1939 in Germany a small propellerless aircraft took off on its maiden flight under conditions of utmost secrecy the world s first jet aircraft Apart from Ernst Heinkel Hans Joachim Pabst von Ohain inventor of the turbojet engine and a small circle of their co workers no one suspected the profound effect that the successful flight of the tiny He 178 would have on aviation Spurred on by Heinkel s success very high speed aircraft were also put into the air by Messerschmitt Arado and Junkers On the other hand the designers of jet engines initially encountered almost insuperable problems for in wartime high quality raw materials such as nickel cobalt and molybdenum were unobtainable and substitute materials had to be used in their place But the designers who were rushing ahead with their own projects found a way around this with the help of experienced test pilots in 1940 the Heinkel 280 the first twin engined jet aircraft was flown without engines as a towed glider Messerschmitt installed an auxiliary piston engine in the nose of its twin engined Me 262 Arado equipped its twin engined Ar 234 with jet engines intended for ground tests only The test pilots became accustomed to landing on just one working engine or none at all In spite of shortages of strategic materials and the use of replacements jet engines reached the production stage by the end of the war But it was only possible to put small numbers of the very high speed aircraft into service too late to have any decisive effect on the war The development work on these first jet aircraft led to a tremendous technological leap forward it was the beginning of advanced technology in aircraft design    **Comet!** Graham M. Simons,2013 Young or old everyone has heard of the Lancaster bomber Such is the legacy handed down by this aviation icon that although it is not the most numerous aircraft ever built two are still flying today one in Britain and another in Canada with many proudly displayed in museums throughout the world it is up there with the Spitfire and the Flying Fortress in terms of affection nostalgia and lasting fame    [Aviation Firsts](#) Joshua Stoff,2012-04-26 Curious about the first person to be born in an airplane which American president was the first to fly or who built the world s first helicopter Answers to these and other aviation related questions can be found in this

**Early Jet Fighters 1944-1954** Leo Marriott,2020-03-30 In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period Using over 200 archive photographs he covers the pioneering German designs then the range of experimental and operational fighters constructed by the Soviets the French and the Swedes The sheer variety of the designs that manufacturers came up with during this short intense period of innovation mean that the book is fascinating reading Several

of the most famous jet fighters feature prominently in the rare photographs and are analysed in the expert text including the Messerschmitt Me 262 the Heinkel He 162 the MiGs 15 17 and 19 the Dassault Ouragan and the Saab J29 But perhaps the most rewarding aspect of the book is its record of experimental projects which tested new concepts that rapidly became established elements of jet aircraft design The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them

*Making Jet Engines in World War II* Hermione Giffard,2016-10-10 Our stories of industrial innovation tend to focus on individual initiative and breakthroughs With Making Jet Engines in World War II Hermione Giffard uses the case of the development of jet engines to offer a different way of understanding technological innovation revealing the complicated mix of factors that go into any decision to pursue an innovative and therefore risky technology Giffard compares the approaches of Britain Germany and the United States Each approached jet engines in different ways because of its own war aims and industrial expertise Germany which produced more jet engines than the others did so largely as replacements for more expensive piston engines Britain on the other hand produced relatively few engines but by shifting emphasis to design rather than production found itself at war s end holding an unrivaled range of designs The US emphasis on development meanwhile built an institutional basis for postwar production Taken together Giffard s work makes a powerful case for a more nuanced understanding of technological innovation one that takes into account the influence of the many organizational factors that play a part in the journey from idea to finished product
